## France Since 1918:

France Since 1918 Herbert Tint, 1980      *France Since 1945* Robert Gildea, 2002-03-14 The last fifty years of French history have seen immense challenges for the French constructing a new European order building a modern economy searching for a stable political system It has also been a time of anxiety and doubt The French have had to come to terms with the legacy of the German Occupation the loss of Empire the political and social implications of the influx of foreign immigrants the rise of Islam the destruction of rural life and the threat of Anglo American culture to French language and civilization Robert Gildea s account examines the French political system and France s role in the world from 1945 to 2000 He looks at France s attempt to recover national greatness after the Second World War its attempt to deal with the fear of German resurgence by building the European Community and its struggle to preserve its Empire He also discusses the Algerian War and its legacy and the later development of a neo colonialism to preserve its influence in Africa and the Pacific Gildea also examines the rise and fall of the two Republics the rise of and fall of De Gaulle and the revolution of 1968 along with topics such as the construction of the myth of the Resistance the painful truths of French involvement in anti Semitic persecution and France s continuing obsession with national identity      France Since 1800 D. L. L. Parry, Pierre Girard (professor of contemporary history.), 2002 In this concise history of France since 1815 David Parry and Pierre Girard examine distinctive features of contemporary France tracing their origins and investigating their continuities and transformations Each chapter focuses on a particular chronological period beginning by setting the scene in terms of political events the narrative then broadens out to consider the wider issues of society economics religion the arts gender relations and France s relationship with Europe and with the rest of the world This clearly written accessible text will appeal to undergraduates studying French history politics and culture as well as the general reader      *Peasantry and Society in France Since 1789* Annie Moulin, 1991-10-24 This book examines the social economic and cultural evolution of the peasantry in France and its place in French society since 1789      **France Since the Liberation** Gino Raymond, 2024-02-20 This book focuses on the tension between the modernising thrust that places France on a trajectory of convergence with comparable liberal democracies and the defence of a national specificity that can act as a brake complicating France s relationship with its neighbours its present and its past This ambivalence in French political and social life stems from the conscious attempt to rebuild the nation after the trauma of Occupation during World War II and the new beginning provided by the Liberation The government of the Fourth Republic embraced the pursuit of a modernisation that would enable it to regain its place among the world s leading democratic states However this modernising ambition co exists with the belief in a specific destiny and a unique sense of mission that are intrinsic to the emergence of a sense of nationhood after the revolution of 1789 Raymond defines a critical perspective that draws together historical economic social and political issues into a coherent understanding of what makes France the way it is today Written with both academic rigour and a highly accessible clarity of

style this volume is a valuable resource for students educators and researchers in French and European Studies

**National Identities in France** Brian Sudlow,2011-12-31 National Identities in France explores nationalism national identities and the various ways in which these concepts are accepted adapted discarded or internally disputed across ideological divides The popular assumption that automatically regards nationalism as a largely right wing concern occludes the many ways in which nationalism and national identities have contributed to social imagination and political or literary discourses across the right left spectrum The critical grounds on which such reflections are undertaken are rich and varied The idea of invented traditions has long suggested how such a thing as the modern nation state could vest itself in the creatively assembled robes of a dim and distant past In plotting the ground on which nationalisms are located previous studies have shown among other things the uses and limitations of the distinction of ethnic and civic nationalism Studies on national development reveal the imitative process that brought about nation building in former colonies of the Western powers Each chapter asks important questions concerning nationalism and national identities in relation to France With nationalism apparently stable distinctions collapse under the pressure of French national identity The signs are that French national identities and nationalisms are in a constant state of reinvention and negotiation of periodic crisis and constant rebirth If political classes attempt to manipulate national identity for some larger project they have no monopoly on the social imaginary National mobilization is a multiple and polysemic process not a univocal and rigid ideology *France in the Age of Organization* Jackie Clarke,2011-06-01 In interwar France there was a growing sense that organization was the solution to the nation's perceived social economic and political ills This book examines the roots of this idea in the industrial rationalization movement and its manifestations in areas as diverse as domestic organization and economic planning In doing so it shows how experts in fields ranging from engineering to the biological sciences shaped visions of a rational socio economic order from the 1920s to Vichy and beyond **Britain, 1846-1964** Martin Roberts,2001 The aim of this book is to explain how Britain's circumstances changed between 1846 1964 Britain in 1846 was by far the richest nation in the world In 1964 Britain was comparatively much less rich than the USA and though amongst the world's richest nations was losing ground to Japan and to Western Europe Because of her wealth and her navy Britain in 1846 was the most powerful nation in the world Britain in 1964 was dwarfed by the superpowers of the USA and the USSR The British Empire of the 1840s reflected Britain's power By 1964 the Empire was collapsing Only one in five men and no women could vote in the Britain of 1840s By 1964 Britain was fully democratic with all adults entitled to vote In a period of a little over a century these were some of the changes to which Britain had to adapt It was a period that marked a substantial fall in Britain's comparative power and prosperity in the world France From 1851 to the Present R. Célestin,E. DalMolin,2016-09-23 Bringing together history literature and popular culture this book provides a cultural history of France from a period of dominance in the mid 19th century to one of decline or crisis in the first few years of the third millennium Contains both chronological

narrative and a selection of primary documents in translation      *Technical Bulletin* ,1928      **The Fall of France in the Second World War** Richard Carswell,2019-02-01 This book examines how the fall of France in the Second World War has been recorded by historians and remembered within society It argues that explanations of the fall have usually revolved around the four main themes of decadence failure constraint and contingency It shows that the dominant explanation claimed for many years that the fall was the inevitable consequence of a society grown rotten in the inter war period This view has been largely replaced among academic historians by a consensus which distinguishes between the military defeat and the political demise of the Third Republic It emphasizes the contingent factors that led to the military defeat At the same time it seeks to understand the constraints within which France s policy makers were required to act and the reasons for their policy making failures in economics defence and diplomacy      **Britain and France in Two World Wars** Emile Chabal,Robert Tombs,2013-09-12 This collection examines relations between France and Britain in particular their conflicting memories of key episodes in their recent past      The Rotarian ,1920-11 Established in 1911 The Rotarian is the official magazine of Rotary International and is circulated worldwide Each issue contains feature articles columns and departments about or of interest to Rotarians Seventeen Nobel Prize winners and 19 Pulitzer Prize winners from Mahatma Ghandi to Kurt Vonnegut Jr have written for the magazine      **Army History** ,1989      Hides and Leather in France United States.
