Using statistics to tell a story, veteran teacher educator Robert Rosenfeld pushes readers away from simply performing a calculation to truly understanding the statistical concepts themselves. In addition to helping educators develop this statistical habit of mind, Rosenfeld also focuses on developing an understanding of the statistics in published research and on interpreting school data which can be applied in school assessment and educational research. Features of this must-read resource include numerous exercises and activities throughout that are related specifically to the world of educators and are designed to foster conversation and small group discussion. Connections drawn between statistics and the regular mathematics curriculum to aid teachers who do classroom-based action research. A section covering the basic concepts of standardized tests such as summative versus formative assessment and standards-based versus norm-referenced tests. Accessibly written and conversational in tone. *Statistics for K-8 Educators* provides the technical foundation to help teachers make good sense of quantitative information connected to their classrooms and to their schools.
