

Moments - moment of a force is the turning effect of a force on an object

Particles collide and create pressure
Upthrust - upward force on the object due to a fluid, caused by the fluid pressure

The boat displaces the water. The more the object enters the water the more water is displaced = more upthrust

Using a lever (eg spanner) exerts a greater force on the load than the force exerted on the lever (force multiplier)

Oil has lower density than water so it is at a higher water level
Air is less dense at higher altitudes so less pressure

(mass of A x velocity of A) = (mass of B x velocity of B)
Dependent on mass, velocity change and impact time
Longer impact time = reduced impact force

Conserving momentum - in closed systems, the total momentum before a collision is equal to the total momentum after the collision (provided no external factors)

Feature	Reason
Seat belt	Spreads out force and increases impact time reducing force
Helmetts	Increase impact time reducing force
Air bags	Spreads out force and increases impact time reducing force
Crumple zones	Increase impact time reducing force
Child car seats	Spreads out the force. Rear facing protects boy against impact
Side impact bars	Increase impact time reducing force
Collapsing steering wheel	Increase impact time reducing force

Physics Paper 2 TRIPLE

The greater a liquid's density, the greater the pressure
Water at same depth is at same pressure

SOUND WAVES - LONGITUDINAL WAVES
Sound waves vibrate the ear drum, which sends signals to the brain
High frequency = high pitch
High amplitude = high volume

P Waves	S Waves	L Waves
Primary waves	Secondary waves	Long waves
Longitudinal	Transverse	
Last about 1min	Occur a few minutes later	Travel much slower than P & S waves
Pass through mantle and outer core	Pass through mantle only	Only pass through the core

SEISMIC WAVES

Distance travelled by wave = $v \times \text{speed of ultrasound waves in body} \times \text{time taken}$

Ultrasound - used for prenatal scans of a foetus, vital organs and muscles.

Flexible Query Answering Systems FQAS 2004 held in Lyon France on June 24-26 2004 FQAS is the premier conference for researchers and practitioners concerned with the vital task of providing easy, flexible and intuitive access to information for every type of need. This multidisciplinary conference draws on several research areas including databases, information retrieval, knowledge representation, soft computing, multimedia, and human computer interaction. With FQAS 2004, the FQAS conference series celebrated its tenth anniversary as it has been held every two years since 1994. The overall theme of the FQAS conferences is innovative query systems aimed at providing easy, flexible and intuitive access to information. Such systems are intended to facilitate retrieval from information repositories such as databases, libraries, and the Web. These repositories are typically equipped with standard query systems that are often inadequate for users. The focus of FQAS is the development of query systems that are more expressive, informative, cooperative, productive, and intuitive to use.

The Alloy Data Center, part of the National Standard Reference Data System, has two primary functions. One is to stimulate cooperation and coordination among the existing data centers in the area of the physical properties of well characterized alloys. The final data generated by these centers for publication should be consistent with one another where correlation or possible overlap exists. The other purpose is the collection from publications as well as private communications, evaluation and publication of data in some areas where special competence exists in the Alloy Physics Section. Of interest to the center are metals, semimetals, intermetallic compounds, and alloys. Excluded are those materials which have ill defined constitutions and heat treatments. An automated system was developed to meet the bibliographic needs of the center. This system will be described as well as the specific properties of interest. The system presently contains a complete annotated file dealing with NMR Knight shift measurements. The soft X-ray spectroscopy compilation is being kept up to date with the same system.
