Giyani App For 2016:

Energy Efficiency in the Minerals Industry Kwame Awuah-Offei, 2017-10-31 This book presents a state of the art analysis of energy efficiency as applied to mining processes From ground fragmentation to mineral processing and extractive metallurgy experts discuss the current state of knowledge and the nagging questions that call for further research It offers an excellent resource for all mine managers and engineers who want to improve energy efficiency to boost both production efficiency and sustainability It will also benefit graduate students and experienced researchers looking for a comprehensive review of the current state of knowledge concerning energy efficiency in the minerals industry World report on the health of refugees and migrants, 2022-07-20 Worldwide more people are on the move now than ever before yet many refugees and migrants face poorer health outcomes than the host populations Addressing their health needs is therefore a global health priority and integral to the principle of the right to health for all The key is to strengthen and maintain health systems by ensuring that they are refugee and migrant sensitive and inclusive Health outcomes are influenced by a whole host of determinants However refugees and migrants face additional determinants such as precarious legal status discrimination social cultural linguistic administrative and financial barriers lack of information about health entitlements low health literacy and fear of detention and deportation This groundbreaking publication outlines current and future opportunities and challenges and provides several strategies to improve the health and well being of refugees and migrants It is an advocacy tool for national and international policy makers involved in health and migration Evidence on the health of refugees and migrants remains fragmented comparable data across countries and over time are urgently needed to track progress towards the health related United Nations Sustainable Development Goals With only 8 years until the 2030 target date to transform our world the time to act is now **Recent Advances in Environmental Sustainability** Peiyue Li, Vetrinurugan Elumalai, 2023-07-25 This volume presents a selection of contributions from international environmental scholars and water researchers The book includes significant topics on earth and environmental sciences such as water resources and water quality soil quality and sediment contamination air pollution and climate change and issues related to clean production The themes were chosen according to the current global issues covering major aspects of their respective fields The aim of the book was to discover advances experiences and innovative ideas on issues related to earth and environmental sciences to share experiences and research findings discuss challenges encountered and solutions in order to have opportunities to establish productive new academic and industry research collaborations **Confinement, Punishment and Prisons in Africa** Marie Morelle, Frédéric Le Marcis, Julia Hornberger, 2021-05-10 This interdisciplinary volume presents a nuanced critique of the prison experience in diverse detention facilities across Africa The book stresses the contingent porous nature of African prisons across both time and space It draws on original long term ethnographic research undertaken in both Francophone and Anglophone settings which are grouped in four parts The first part examines how the prison has imprinted

itself on wider political and social imaginaries and in turn how structures of imprisonment carry the imprint of political action of various times The second part stresses how particular forms of ordering emerge in African prisons It is held that while these often involve coercion and neglect they are better understood as the product of on going negotiations and the search for meaning and value on the part of a multitude of actors The third part is concerned with how prison life percolates beyond its physical perimeters into its urban and rural surroundings and vice versa It deals with the popular and contested nature of what prisons are about and what they do especially in regard to bringing about moral subjects The fourth and final part of the book examines how efforts of reforming and resisting the prison take shape at the intersection of globally circulating models of good governance and levels of self organisation by prisoners The book will be an essential reference for students academics and policy makers in Law Criminology Sociology and Politics

Enhancing Food Production System

Resilience for Food Security Facing a Changing Environment Liming Ye, Ping Zhu, 2023-11-28 As the dominant source of the human food supply the global land system underlies the foundation of the livelihood and wellbeing of humanity on Earth On the one hand the growth rate in the land system's productive capacity of food has played a key role in global food provision Technological breakthroughs in wheat and rice production during the past few decades for instance have greatly contributed to the maintenance of this growth rate in many parts of the world On the other hand however the terrestrial food production system is facing increasing challenges from environmental stressors ranging from climate change air pollution to land degradation Whether and how the global land system will support the food security of more than 10 billion people in the 21st century while minimizing its environmental footprint remains an open question to debate It is inevitable that the global food production system has to be shifted from focusing on production expansion to land system resilience so that the dual goals of sustainable production and environmental friendliness can be simultaneously achieved
