

Question Sheet for Creating a New Nation (with answers)

1. In the opening minutes of Episode 6, Historian Gordon Wood remarked that George Washington's resignation of his commission and taking leave of public life at the end of the Revolutionary War was an "electrifying event throughout the world." Why was it so electrifying?

Wood was referring to the fact that Washington, who had just led a successful revolution and commanded a large army, gave up control of that army rather than using it to seize power himself. Wood remarked that no other commander in world history had done anything like that before.

2. Wood also mentions the difficulty of "bringing together separate states." Why do you think the states might have resisted having a national government instead of 13 separate governments?

Students will probably note that the states were worried about "trading one tyrant (George III) for another (a strong central government)." They may also note that the states might have resisted because they had developed separate identities as independent states, and it would have been very difficult for them to give up sovereignty and give authority to a central government.

3. In Episode 6, Abigail Adams writes a letter to her sister in which she refers to the "inherited power" of British nobility and aristocracy saying, "There's a servility of manners here, a distinction between nobility and common citizens, which, happily, is foreign to Americans." Do you agree with Abigail Adams's statement? Explain your view.

Many may disagree, due to treatment of African-American slaves or women during the period. However, some may note that the end of the war allowed all white men some level of equality in society and gave all an opportunity to raise themselves in society.

4. In the episode, Alexander Hamilton laments the inaction of the government to enforce the law put forth by the Articles of Confederation. Review the Articles. List at least three issues or problems you see that would back up Hamilton's view.

Student answers will vary, but some possible examples include:

In Article 2, each state is given its own sovereignty, freedom and independence, making it very difficult for a central government to carry out its actions or enforce laws or foreign policy.

Since each state would be sovereign, each state could develop its own currency, which would undermine the national economy.

Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree *Monthly Review*, 1957

consider ways in which subalterns her term for the indigenous dispossessed in colonial societies were able to achieve agency this paper concentrates specifically on describing the ways in which western scholars inadvertently reproduce hegemonic structures in their work Spivak is herself a scholar and she remains acutely aware of the difficulty and dangers of presuming to speak for the subalterns she writes about As such her work can be seen as predominantly a delicate exercise in the critical thinking skill of interpretation she looks in detail at issues of meaning specifically at the real meaning of the available evidence and her paper is an attempt not only to highlight problems of definition but to clarify them What makes this one of the key works of interpretation in the Macat library is of course the underlying significance of this work Interpretation in this case is a matter of the difference between allowing subalterns to speak for themselves and of imposing a mode of speaking on them that however well intentioned can be as damaging in the postcolonial world as the agency stifling political structures of the colonial world itself By clearing away the detritus of scholarly attempts at interpretation Spivak takes a stand against a specifically intellectual form of oppression and marginalization
