

7th GRADE MATH PERFORMANCE TASKS

GEOMETRY

Name: _____ Date: _____

PLAYGROUND DESIGNER

PERFORMANCE TASK

OVERVIEW

You will step into the shoes of a playground designer. Your school has decided to build a new playground with a unique geometric structure. As the lead designer, you have been tasked with determining the measures of various angles to ensure the safety and functionality of the design.

TASK #1

Imagine you are designing a new playground for your school. The playground will have a unique geometric structure, and you have been tasked with determining the measures of various angles to ensure the safety and functionality of the design. In the playground design, there are four angles labeled as A, B, C, and D. You know that:

- Angle A is a right angle (90 degrees).
- Angle B is a supplementary angle to Angle C.
- Angle D is a complementary angle to Angle C.

To find the measures of angles B, C, and D, you need to set up and solve equations based on the given information.

Write an equation to find each angle.

TASK #2

Solve each equation that you wrote in task #1 to find the measure of each angle. Remember, Angle C is 40 degrees.

TO THE SQUARE INCH

Name: _____ Date: _____

PLAYGROUND DESIGNER

PERFORMANCE TASK

TASK #3

Now that you have found the measures of angles B, C, and D, determine if they add up to form a complete angle (360 degrees) or not. Explain your findings.

TASK #4

Within the playground structure, there are vertical angles formed. Identify the pairs of vertical angles and calculate their measures based on the information you have.

Resources in Education ,2001-10

Women and Addiction Kathleen T. Brady,Sudie E. Back,Shelly F. Greenfield,2009-04-02 For many years addiction research focused almost exclusively on men Yet scientific awareness of sex and gender differences in substance use disorders has grown tremendously in recent decades This volume brings together leading authorities to review the state of the science and identify key directions for research and clinical practice Concise focused chapters illuminate how biological and psychosocial factors influence the etiology and epidemiology of substance use disorders in women their clinical presentation course and psychiatric comorbidities treatment access and treatment effectiveness Prevalent substances of abuse are examined as are issues facing special populations

Abstract Mathematical Cognition Wolfgang Grodd,Philippe Chassy,2016-08-09 Despite the importance of mathematics in our educational systems little is known about how abstract mathematical thinking emerges Under the uniting thread of mathematical development we hope to connect researchers from various backgrounds to provide an integrated view of abstract mathematical cognition Much progress has been made in the last 20 years on how numeracy is acquired Experimental psychology has brought to light the fact that numerical cognition stems from spatial cognition The findings from neuroimaging and single cell recording experiments converge to show that numerical representations take place in the intraparietal sulcus Further research has demonstrated that supplementary neural networks might be recruited to carry out subtasks for example the retrieval of arithmetic facts is done by the angular gyrus Now that the neural networks in charge of basic mathematical cognition are identified we can move onto the stage where we seek to understand how these basics skills are used to support the acquisition and use of abstract mathematical concepts *12 YEAR-WISE CTET Paper 1 Solved Papers (2011 - 2019) - 2nd English Edition* Disha Experts,2019-09-06 **Report and Appendix** Great Britain.
