Rogers,2011-04-17 In our scientific age an understanding of physics is part of a liberal education Lawyers bankers governors business heads administrators all wise educated people need a lasting understanding of physics so that they can enjoy those contacts with science and scientists that are part of our civilization both materially and intellectually They need knowledge and understanding instead of the feelings all too common that physics is dark and mysterious and that physicists are a strange people with incomprehensible

interests Such a sense of understanding science and scientists can be gained neither from sermons on the beauty of science nor from the rigorous courses that colleges have offered for generations when the headache clears away it leaves little but a confused sense of mystery Nor is the need met by survey courses that offer a smorgasbord of tidbit they give science a bad name as a compendium of information or formulas The non scientist needs a course of study that enables him to learn real science and make its own with delight For lasting benefits the intelligent non scientist needs a course of study that enables him to learn genuine science carefully and then encourages him to think about it and use it He needs a carefully selected framework of topics not so many that learning becomes superficial and hurried not so few that he misses the connected nature of scientific work and thinking He must see how scientific knowledge is built up by building some scientific knowledge of his own by reading and discussing and if possible by doing experiments himself He must think his own way through some scientific arguments He must form his own opinion with guidance concerning the parts played by experiment and theory and he must be shown how to develop a taste for good theory He must see several varieties of scientific method at work And above all he must think about science for himself and enjoy that These are the things that this book encourages readers to gain by their own study and thinking Physics for the Inquiring Mind is a book for the inquiring mind of students in college and for other readers who want to grow in scientific wisdom who want to know what physics really is *Salters Horners Advanced Physics*, 2001 The Salters Horners Advanced Physics series places physics into social industrial environmental and historical contexts and covers the A Level specifications in place from September 2000 This A2 Level student book features maths support notes and applications led illustrations of physics **Universe, Human Species, Reality** Jacques Vanier, 2025-08-11 Universe Human Species Reality A Physicalist Approach describes the functioning of the material universe with the use of intermediate mathematical language The book uses a physicalist approach in the sense that it is based entirely on physical phenomena and on reality and does not use philosophical or theological argumentation based on abstract reasoning not anchored in physical observations Using these observations the book develops the argument that the principle of least action plays a most important role in the functioning of the universe Furthermore if we extend our study we may find an answer to some questions that have not been answered yet As examples we may mention a few of those such as the exact nature of the Big Bang the essence of life and the nature of the intellect brain gap This book should be of interest to undergraduate students in physics and biology and to the general science reader Key Features Addresses our understanding of the complete basic physics of the universe Uses a physicalist approach rather than a philosophical and theological approach in studying the nature of the universe Gives a rather unique conclusion relative to the functioning of the universe including Homo sapiens In Quest of the Stars and Galaxies Theo Koupelis, 2010-02-04 Available with WebAssign Author Theo Koupelis has set the mark for a student friendly accessible introductory astronomy text with In Quest of the Universe He has now developed a new text to accommodate those course that focus mainly on stars and galaxies Ideal for the one term
