Cassenti, 2017-06-13 This book focuses on computational modeling and simulation research that advances the current state of the art regarding human factors in simulation and applied digital human modeling It reports on cutting edge simulators such as virtual and augmented reality on multisensory environments and on modeling and simulation methods used in various applications such as surgery military operations occupational safety sports training education transportation and robotics Based on the AHFE 2017 International Conference on Human Factors in Simulation and Modeling held on July 17 21 2017 in Los Angeles California USA the book is intended as a timely reference guide for researchers and practitioners developing new modeling and simulation tools for analyzing or improving human performance It also offers a unique resource for modelers seeking insights into human factors research and more feasible and reliable computational tools to foster advances in this exciting research field

The Urban Rail Development Handbook Daniel Pulido, Georges Darido, Ramon Munoz-Raskin, Joanna Moody, 2018-09-20 Cities across the globe are looking to develop affordable environmentally friendly and socially responsible transportation solutions that can meet the accessibility needs of expanding metropolitan populations and support future economic and urban development When appropriately planned and properly implemented as part of a larger public transportation network urban rail systems can provide rapid mobility and vital access to city centers from

surrounding districts High performing urban rail services when carefully approached as development projects can help enhance quality of life by giving citizens access to employment opportunities essential services urban amenities and neighboring communities The purpose of this Handbook is to synthesize and disseminate knowledge to inform the planning implementation and operations of urban rail projects with a view towards Emphasizing the need for early studies and project planning Making projects more sustainable economically socially and environmentally Improving socioeconomic returns and access to opportunities for users Maximizing the value of private participation where appropriate and Building capacity within project implementing and managing institutions This Handbook provides experiential advice to tackle the technical institutional and financial challenges faced by decision makers considering urban rail projects It brings together the expertise of World Bank staff and the input of numerous specialists to synthesize international good practices and recommendations that are independent of commercial financial political or other interests The material presented is intended as an honest broker guide to maximize the impact and manage the challenges of urban rail systems in cities in both developed and developing countries Rather than identify a single approach this Handbook acknowledges the complexities and context necessary when approaching an urban rail development by helping to prepare decision makers to ask the right questions consider the key issues perform the necessary studies apply adequate tools and learn from international good practice all at the right time in the project development process

Computation and Big Data for Transport Pedro Diez, Pekka Neittaanmäki, Jacques Periaux, Tero Tuovinen, Jordi Pons-Prats, 2020-02-28 This book gathers the outcomes of the second ECCOMAS CM3 Conference series on transport which addressed the main challenges and opportunities that computation and big data represent for transport and mobility in the automotive logistics aeronautics and marine maritime fields Through a series of plenary lectures and mini forums with lectures followed by question and answer sessions the conference explored potential solutions and innovations to improve transport and mobility in surface and air applications The book seeks to answer the question of how computational research in transport can provide innovative solutions to Green Transportation challenges identified in the ambitious Horizon 2020 program In particular the respective papers present the state of the art in transport modeling simulation and optimization in the fields of maritime aeronautics automotive and logistics research In addition the content includes two white papers on transport challenges and prospects Given its scope the book will be of interest to students researchers engineers and practitioners whose work involves the implementation of Intelligent Transport Systems ITS software for the optimal use of roads including safety and security traffic and travel data surface and air traffic management and freight logistics

Energy-Efficient Train Operation Shuai Su, Zhongbei Tian, Rob M. P. Goverde, 2023-07-03 This book is closely related to the energy conservation problem of rail transport systems focusing on reducing the energy consumption of train operation The system process of train operation is analyzed and the relationship between train operation and energy consumption is introduced The fundamental theories modelling and application of

technologies for energy efficient train driving are presented discussing timely topics such as energy efficient train control and timetabling integrated timetabling and regenerative braking and maximizing regenerated energy usage with energy storage systems In addition the modelling and application of a traction power simulation platform is introduced to calculate the detailed energy flow over a railway network The book is enriched with a set of practical examples to illustrate the performance of the proposed methods in improving energy efficiency of both urban and long distance trains Overall the book provides a timely guide to professionals in the railway industry and to researchers and graduate students in transport electrical and control engineering

Moody's Manual of Railroads and Corporation Securities, 1920 **Crime Control** David John Farmer, 2013-03-08 The question of how to use police resources productively particularly in this era of tight municipal budgets is a major concern for police chiefs and others responsible for crime control In Crime Control The Use and Misuse of Police Resources David J Farmer provides new insights into this question and suggests a practical resource allocation approach for police policymakers and administrators The book documents the results of current police resource allocation practices and describes the major research studies that have identified a need to restructure police field operations It very usefully outlines the development and nature of allocation techniques and analyzes the political contexts which influence resource allocation

After describing planning at the neighborhood level that should inform the allocation process the author provides a comprehensive planning budgeting resources allocation approach to managing a productive police department This comprehensive approach is illustrated by an account of the Manpower Allocation Review System MARS which the author developed and introduced in the New York City Police Department in 1972 when I was commissioner As I can vii FOREWORD viii attest the MARS approach had practical utility For the author it served as a forerunner to the more elaborate system he describes in this book

Buildings and Structures under Extreme Loads Chiara Bedon, Flavio Stochino, Daniel Honfi, 2020-11-25 Exceptional loads on buildings and structures may have different causes including high strain dynamic effects due to natural hazards man made attacks and accidents as well as extreme operational conditions severe temperature variations humidity etc All of these aspects can be critical for specific structural typologies and or materials that are particularly sensitive to external conditions In this regard dedicated and refined methods are required for their design analysis and maintenance under the expected lifetime There are major challenges related to the structural typology and material properties with respect to the key features of the imposed design load Further issues can be derived from the need for risk mitigation or retrofit of existing structures as well as from the optimal and safe design of innovative materials systems Finally in some cases no appropriate design recommendations are available and thus experimental investigations can have a key role within the overall process In this Special Issue original research studies review papers and experimental and or numerical investigations are presented for the structural performance assessment of buildings and structures under various extreme conditions that are of interest for design
