Blume JD, MAR,2017-12-01 Written by two nationally recognized experts this book provides a comprehensive review of the legal and clinical aspects of the death penalty as it relates to intellectual disability First the facts people with intellectual disability may falsely confess to a crime because they want to please the authorities and they are often less able than others to work with lawyers to prepare a defense In addition because of the stigma attached to intellectual disability affected individuals often become adept at hiding it even from their attorney not understanding the condition s importance to the outcome of their case Having explained such harsh realities and presented a comprehensive review of what intellectual disability is the book focuses on the 2002 U S Supreme Court Atkins v Virginia decision granting a death penalty exemption to individuals with intellectual disability It outlines best practice regarding the determination of intellectual disability and discusses qualifications needed for experts in such cases Related issues such as common misconceptions regarding people with intellectual disability race socioeconomic status and the status of foreign nationals as it relates to the death penalty and intellectual disability are discussed as well A must have resource for prosecutors defense lawyers and clinicians providing expert testimony in death penalty cases this book will also prove absorbing reading for anyone concerned about this troubling issue **The Saccharine Disease** T. carbohydrates like fruits and whole meal flour The author notes that all the foregoing conditions are really the manifestations of a single master disease that many of the major diseases of modern societies are caused by consuming unreasonable amounts of refined carbohydrate foods The author discusses that in the short time that man has changed his diet evolutionary adaptation is left behind He gives two rules to prevent and arrest all saccharine disease manifestations Do not eat any food unless you definitely want it and avoid eating white flour or white sugar These two rules will prevent gastric or duodenal ulcer diabetes coronary disease constipation complications of varicose veins hemorrhoids E coli infections obesity and some skin conditions As a retired Surgeon General of the Royal Navy the author bases his assumptions on evolutionary epidemiological and other scientific or historical work This book can give insights to dieticians food researchers nutritionists people on diet and general medicine practioners
