Applying Decision Research to Improve Clinical Outcomes, Psychological Assessment, and Clinical Prediction

David Faust, Hal R. Arkes, Charles E. Gaudet, 2024 Mental health professionals often must make judgments or decisions involving vital matters Is an individual likely to act violently Has a child been sexually abused Is a police officer fit to carry a gun An explosion of research in clinical and cognitive psychology provides practical means for enhancing the accuracy of clinical decision making and prediction and thereby improving outcomes and the quality of care Unfortunately this research has not been broadly disseminated in the mental health field The book is designed to familiarize readers with essential findings from decision science and its practical immediate applications in the mental health field **Comparative**

Effectiveness in Surgical Oncology Karl Y. Bilimoria, Christina A. Minami, David M. Mahvi, 2015-02-12 Despite tremendous recent advances in the treatment of most malignancies there remain several critical questions for each cancer This particularly true for the surgical management of solid organ malignancies Comparative effectiveness is a relatively new term which encompasses the age old concepts of how best to treat cancer patients Comparative effectiveness is defined as the direct comparison of healthcare interventions to determine which work best for which patients when considering the benefits and risks The Institute of Medicine has defined comparative effectiveness research CER as the generation and synthesis of evidence that compares the benefits and harms of alternative methods to prevent diagnose treat and monitor a clinical condition or to improve the delivery of care CER is certainly best done with well conducted randomized controlled trials Unfortunately clinical trials are not always feasible owing to the impracticality of conducting the trial the considerable cost and the time required to complete the trial These challenges are even more pronounced with respect to surgical treatment Thus alternative approaches may need to be considered in order to address pressing questions in the care of the oncology

patient These approaches may include well conducted retrospective cohort studies from cancer registries and other data sources decision and cost effectiveness analyses and other novel methodologies This book lays out the current critical questions for each major malignancy and proposes approaches to gain answers to these pressing questions Handbook of Applied Health Economics in Vaccines William V. Padula,2023 This book summarizes current theory and evidence relating to immunization supply demand distribution and financing It provides readers with an understanding of the obstacles faced in the field and the possible approaches to corresponding solutions *Debates on U.S. Health Care* Jennie Jacobs Kronenfeld,Wendy E. Parmet,Mark A. Zezza,2012-09-27 This issues based reference work available in both print and electronic formats shines a spotlight on health care policy and practice in the United States Impassioned debates about the best solutions to health care in America have perennially erupted among politicians scholars of public policy medical professionals and the general public The fight over the Health Care Reform Act of 2010 brought to light a multitude of fears challenges obstacles and passions that often had the effect of complicating rather than clarifying the debate The discourse has never been more heated The complex issues that animate the health care debate have forced the American public to grapple with the exigencies of the present system with regard to economic fiscal and monetary policy especially as they relate to philosophical often ideologically driven approaches to the problem Americans have also had to examine their ideas about the relationship of the individual to and interaction with the state and the varied social and cultural beliefs about what an American solution to the problem of health care looks like In light of the need to keep students researchers and other interested readers informed and up to date on the issues surrounding health care in the U S this volume uses introductory essays followed by point counterpoint articles to explore prominent and perennially important debates providing readers with views on multiple sides of this complex issue Features Benefits The volume is divided into three sections each with its own Section Editor Quality of Care Debates Dr Jennie Kronenfeld Economic Fiscal Debates Dr Mark Zezza and Political Philosophical Legal Debates Prof Wendy Parmet Sections open with a Preface by the Section Editor to introduce the broad theme at hand and provide historical underpinnings Each Section holds 12 chapters addressing varied aspects of the broad theme of the section Chapters open with an objective lead in piece or headnote followed by a point article and a counterpoint article All pieces headnote point article counterpoint article are signed For each chapter students are referred to further readings data sources and other resources as a jumping off spot for further research and more in depth exploration Finally the volume concludes with a comprehensive index and the electronic version of the book includes search and browse features as well as the ability to link to further readings cited within chapters should they be available to the library in electronic format **Initial National Priorities for Comparative Effectiveness Research** Institute of Medicine,Board on Health Care Services,Committee on Comparative Effectiveness Research Prioritization,2009-11-14 Clinical research presents health care providers with information on the natural history and clinical presentations of disease as well as diagnostic and

treatment options In today s healthcare system patients physicians clinicians and family caregivers often lack the sufficient scientific data and evidence they need to determine the best course of treatment for the patients medical conditions Initial National Priorities for Comparative Effectiveness Research CER is designed to fill this knowledge gap by assisting patients and healthcare providers across diverse settings in making more informed decisions In this 2009 report the Institute of Medicine s Committee on Comparative Effectiveness Research Prioritization establishes a working definition of CER develops a priority list of research topics and identifies the necessary requirements to support a robust and sustainable CER enterprise As part of the 2009 American Recovery and Reinvestment Act Congress appropriated 1.1 billion in federal support of CER reflecting legislators belief that better decisions about the use of health care could improve the public s health and reduce the cost of care The Committee on Comparative Effectiveness Research Prioritization was successful in preparing a list 100 top priority CER topics and 10 recommendations for best practices in the field Methods for the Economic Evaluation of Health Care Programmes Michael F. Drummond, Mark J. Sculpher, Karl Claxton, Greg L. Stoddart, George W. Torrance, 2015 This highly successful textbook is now in its fourth edition and has been extensively updated in order to keep pace with the considerable advances in theory and practice in recent years *Identifying Health Technologies that Work*, 1994 **Identifying Health Technologies That Work** DIANE Publishing Company, 1996-09 The Federal government is the main sponsor of research to evaluate health technologies currently in use The purpose of this report is to examine two crucial questions what are we getting out of this investment tools for effectiveness research issues in improving effectiveness research the state of cost effectiveness analysis the Federal role in health technology assessment the development of clinical practice guidelines the impact of clinical practice guidelines Glossary **Essentials of Regenerative Medicine in Interventional Pain Management** Annu Navani, Sairam Atluri, Mahendra Sanapati, 2024-05-02 Regenerative medicine is an emerging and integral part of interventional pain management and meets definitions of interventional pain management and interventional techniques Interventional techniques are defined as minimally invasive procedures including percutaneous precision needle placement with placement of drugs in targeted areas or ablation of targeted nerves and some surgical techniques such as laser or endoscopic discectomy intrathecal infusion pumps and spinal cord stimulators for the diagnosis and management of chronic persistent or intractable pain On the same token interventional pain management is defined as the discipline of medicine devoted to the diagnosis and treatment of pain related disorders principally with the application of interventional techniques in managing subacute chronic persistent and intractable pain independently or in conjunction with other modalities of treatment This new edition brings a wide array of information for interventional pain physicians and other physicians practicing regenerative medicine with its applications in managing chronic pain and other disorders The structure of the book begins with an introduction of the subject followed by sections on historical context pathophysiology applicability of regenerative medicine with its evidence base anatomy technical aspects complications and precautions for each topic

when available and applicable From across the globe leading experts in their respective fields contributed chapters on specific topics to present a cogent and integrative understanding of the field of regenerative medicine as applicable for interventional pain physicians This comprehensive text achieves its goal of providing an evidence based approach to application of principles of regenerative medicine in managing chronic pain of spinal neurological and musculoskeletal origins

Learning What Works Institute of Medicine,2011-07-09 It is essential for patients and clinicians to have the resources needed to make informed collaborative care decisions Despite this need only a small fraction of health related expenditures in the United States have been devoted to comparative effectiveness research CER To improve the effectiveness and value of the care delivered the nation needs to build its capacity for ongoing study and monitoring of the relative effectiveness of clinical interventions and care processes through expanded trials and studies systematic reviews innovative research strategies and clinical registries as well as improving its ability to apply what is learned from such study through the translation and provision of information and decision support As part of its Learning Health System series of workshops the Institute of Medicine s IOM s Roundtable on Value Science Driven Health Care hosted a workshop to discuss capacity priorities to build the evidence base necessary for care that is more effective and delivers higher value for patients Learning What Works summarizes the proceedings of the seventh workshop in the Learning Health System series This workshop focused on the infrastructure needs including methods coordination capacities data resources and linkages and workforce for developing an expanded and efficient national capacity for CER Learning What Works also assesses the current and needed capacity to expand and improve this work and identifies priority next steps Learning What Works is a valuable resource for health care professionals as well as health care policy makers
