two formidable challenges in the 21st century rapid ecological decline and continuing world poverty The author argues that both problems are rooted in our economic concepts which for the past 500 years have been powerfully shaped by the reality and ideology of capitalism We must now develop a new mode of economic thought to guide us through the profound changes required to achieve sustainable and global well being To this end the author proposes a set of terms concepts and analytical tools that are collectively known as the Economics of Needs and Limits or ENL Unlike conventional economic theories which
