The 100 member A320 family (A318, A319, A320 & A320XLR) is the most recent contribution to Airbus' success as a manufacturer, with the 150 seat A320 being the best selling member of this family. The A320 program was launched in March 1982, and the first flight occurred on February 22 1982. First delivered in 1985, the A320 pioneered the use of digital fly-by-wire flight control systems in a commercial aircraft. Two engines are offered, the CFM56 and IAE V2500. With more than 3,000 aircraft of the A320 family built, it is the second best-selling family of a time after the family's primary competition the Boeing 737.

Lufthansa is the largest airline in Europe in terms of overall passengers carried (second is Air France - KLM), and the flag carrier of Germany. A320. Special Operations Facundo Conforti, The maneuvers of an Airbus A320 are extremely simple during normal operations They may present minimal complexity during abnormal operations but the aircraft is extremely easy to fly On the other hand there are special operations that require a higher level of attention and these are not necessarily abnormal operations or emergencies but rather uncommon operations such as flights in wind shear volcanic ash among others In this work you will learn all the details of each of these special operations which will take your understanding of A320 flight to the next level *Integrated Systems Engineering* G.
