Montgomery, 2002-09 **Management Decisions for Engineers** James Parkin, 1996-05-13 This title is a guide designed for engineering managers to the theory and practice of how good decisions are made and why poor decisions occur It is the result of many years of teaching and consultancy in organizational and social decision making and provides some of the most important concepts in managerial decision theory *Risk Analysis VI* C. A. Brebbia, Elias Beriatos, 2008 Covering a series of

important topics which are of current research interest and have practical applications this book examines all aspects of risk analysis and hazard mitigation ranging from specific assessment of risk to mitigation associated with both natural and anthropogenic hazards **Causality, Correlation And Artificial Intelligence For Rational Decision Making** Tshildizi

Marwala, 2015-01-02 Causality has been a subject of study for a long time Often causality is confused with correlation Human intuition has evolved such that it has learned to identify causality through correlation In this book four main themes are considered and these are causality correlation artificial intelligence and decision making A correlation machine is defined and built using multi layer perceptron network principal component analysis Gaussian Mixture models genetic algorithms expectation maximization technique simulated annealing and particle swarm optimization Furthermore a causal machine is defined and built using multi layer perceptron radial basis function Bayesian statistics and Hybrid Monte Carlo methods Both these machines are used to build a Granger non linear causality model In addition the Neyman Rubin Pearl and Granger causal models are studied and are unified The automatic relevance determination is also applied to extend Granger causality framework to the non linear domain The concept of rational decision making is studied and the theory of flexibly bounded rationality is used to extend the theory of bounded rationality within the principle of the indivisibility of rationality The theory of the marginalization of irrationality for decision making is also introduced to deal with satisficing within irrational conditions The methods proposed are applied in biomedical engineering condition monitoring and for modelling interstate conflict PC Mag , 1995-10-10 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology
