reference tracking and pronominal categories and the grammaticalization history of quotative constructions Almost all papers present a major shift away from analyzing reported discourse with the help of abstract transformational principles toward embedding it in functional and pragmatic aspects of language Another central methodological approach pervading this collection consists in the discourse oriented examination of reported discourse based on large corpora of spoken or written texts which is increasingly replacing analyses of constructed de contextualized utterances prevalent in many earlier treatments The book closes with a comprehensive bibliography on reported discourse of about 1 000 entries
