Essentials of Assessment Report Writing Elizabeth O. Lichtenberger, Nancy Mather, Nadeen L. Kaufman, Alan S. Kaufman, 2012-06-12 Instructive guide to preparing informative and accurate assessment reports for a variety of individuals and settings Assessment reports are central to the diagnostic process and are used to inform parents clients and clinicians among others about academic problems personality functioning neuropsychological strengths and weaknesses behavioral problems and the like Essentials of Assessment Report Writing provides handy quick reference information using the popular Essentials format for preparing effective assessment reports This book is designed to help busy mental health professionals quickly acquire the knowledge and skills they need to write effective psychological assessment reports Each concise chapter features numerous callout boxes highlighting key concepts bulleted points and extensive illustrative material as well as test questions that help you gauge and reinforce your grasp of the information covered This practical guide focuses on efficiently and effectively communicating referral and background information appearance and behavioral observations test results and interpretation summary and diagnostic impressions and treatment recommendations The authors provide examples of both good and bad case report writing and highlight ethical issues and topics relevant to presenting feedback Essentials of Assessment Report Writing is the only pocket reference illustrating how to prepare an effective assessment report

**Computer-assisted Investigative Reporting** Margaret H. DeFleur, 2013-11-26 Conducting computer analyses for the purposes of revealing information of significance to the press represents an extension of one of the most important forms of American journalism into the contemporary era of new technologies Investigative reporting had its start with the establishment of the metropolitan newspaper during the early decades of the 1900s At the time it was a continuation of the evolving tradition of freedom of the press that had characterized American political life since colonial times As it developed investigative reporting stressed facts rather than the opinions of the editor or reporter In turn that tradition had its own intellectual roots Today computer assisted investigative reporting CAIR extends that marketplace of ideas into systematic examinations of the electronic records of government In addition computer analyses of other kinds of information systematically gathered by journalists can provide the press with insights into trends and patterns unlikely to be revealed by other means This unique volume addresses procedures and issues in investigative journalism that have not been explained in other publications It sets forth for the first time a detailed and specific methodology for conducting computer assisted investigative analyses of both large and small scale electronic records of government and other agencies That methodology consists of the logic of inquiry strategies for reaching valid conclusions and rules for reporting what has been revealed by the analyses to the public in clear ways Such systematic methodologies are essential in social and other sciences and the development of a counterpart for investigative journalism has been badly needed That systematic methodology is developed within a context that explains the origin and major characteristics of those elements that have come together in American

society to make computer assisted investigative reporting both possible and increasingly a part of standard newsroom practices These include the development of traditional investigative journalism the evolution of computer technology the use of computers by government to keep records the legal evolution of freedom of information laws the rapid adoption of computers in newsrooms the increasing importance of precision journalism and the sharp increase in recent times of computer assisted investigative reporting by American newspapers both large and small The issues addressed in this book are discussed in a very readable context with an abundance of examples and illustrations drawn from the real world of journalism as it is practiced daily in newsrooms around the country Explanations of concepts principles and procedures are set forth in layperson s terms that require very little in the way of knowledge of computers or statistical methods

**Hearings Before and Special Reports Made by Committee on Armed Services of the House of Representatives on Subjects Affecting the Naval and Military Establishments** ,1993      **Computers in Education: Report of a research conference** ,1983      **Hearings, Reports and Prints of the House Committee on Armed Services** United States.
