Springer Handbook of Atmospheric Measurements Thomas Foken, 2021-11-09 This practical handbook provides a clearly structured concise and comprehensive account of the huge variety of atmospheric and related measurements relevant to meteorologists and for the purpose of weather forecasting and climate research but also to the practitioner in the wider field of environmental physics and ecology The Springer Handbook of Atmospheric Measurements is divided into six parts The first part offers instructive descriptions of the basics of atmospheric measurements and the multitude of their influencing factors fundamentals of quality control and standardization as well as equations and tables of atmospheric water and soil quantities The subsequent parts present classical in situ measurements as well as remote sensing techniques from both ground based as well as airborne or satellite based methods The next part focusses on complex measurements and methods that integrate different techniques to establish more holistic data Brief discussions of measurements in soils and water at plants in urban and rural environments and for renewable energies demonstrate the potential of such applications The final part provides an overview of atmospheric and ecological networks Written by distinguished experts from academia and industry each of the 64 chapters provides in depth discussions of the available devices with their specifications aspects of quality control maintenance as well as their potential for the future A large number of thoroughly compiled tables of physical quantities sensors and system characteristics make this handbook a unique universal and useful reference for the practitioner and absolutely essential for researchers students and technicians

Test bench design for power measurement of inverter-operated machines in the medium voltage range Schneider, Simon Michael, 2018-12-21 This thesis gives an overview of test bench design for inverter operated Medium Voltage MV drives with the focus on the active power measurement The sources of measurement setup uncertainty are analysed and methods are shown to assess these uncertainties Further a possibility is shown to do quantitative uncertainty estimations which are verified with measurements through different measurement setups for MV drives operated with multilevel converters The influence of measurement transducers voltage dividers power meters and data acquisition boards are considered The digital signal processing is analysed and the possibilities to reduce its uncertainty contribution on an active power measurement is shown An analysis is made with the conventional measurement devices in the MV range The transfer behaviour of the devices and the characteristics of the uncertainty are investigated Measurements are done on typical medium voltage drives with an uncertainty analysis which shows the essential aspects of active power measurement The results show the significance of a measurement setup performance The investigations on the drives are used to indicate

the impact on the determination of the drive efficiency and gives a significant input for further standardisation processes The handling of measurement uncertainties during active power measurement of drives is shown concerning the permanent topic of energy saving and its efficient use The work proposes a way of categorising electrical drives in energy efficiency classes and to make their determination comparable Die vorliegende Dissertation gibt einen Überblick über den Pr fstandsaufbau von umrichtergetriebenen Mittelspannungsantrieben Die Unsicherheitsquellen werden analysiert und Methoden werden aufgezeigt um die Messunsicherheit zu bewerten Des Weiteren werden die Machbarkeit von Unsicherheitsabschätzungen gezeigt welche mit Messungen an typischen Mittelspannungsantrieben mit Umrichterspeisung verglichen werden Der Einfluss von Messwandlern Spannungsteilern Leistungsmessern und Messkarten zur Signalerfassung wird berücksichtigt Die digitale Signalverarbeitung wird analysiert um den Unsicherheitsbeitrag zur Wirkleistungsmessung zu reduzieren Es werden konventionellen Messwandler und teiler im Mittelspannungsbereich bezogen ihres Übertragungsverhaltens sowie Messunsicherheiten untersucht Die Ergebnisse der Untersuchungen verdeutlichen die Signifikanz eines performanten Messaufbaus Des Weiteren werden Auswirkungen auf die Bestimmung der Effizienz aufgezeigt Die Arbeit liefert einen wesentlichen Beitrag für weitere Standardisierungsprozesse Der Umgang mit Messunsicherheiten der Wirkleistungsmessung wird betrachtet im Hinblick auf Energieeinsparpotenziale und deren effiziente Nutzung Die Arbeit schlägt eine Möglichkeit vor wie elektrische Antriebe in Energieeffizienzklassen kategorisiert werden können um diese vergleichbar zu machen

and solving problems This Student Solutions Manual accompanies John Taylor s Introduction to Error Analysis 3rd Edition restating the chapter ending problems and including detailed solutions with sometimes more than one solution per problem Some solutions include the use of spreadsheets and Python both of which are introduced in tutorials for readers who want to expand their skill sets Energy Research Abstracts ,1986 **ERDA Energy Research Abstracts** United States. Energy Research and Development Administration, **Advances in Maritime Technology and Engineering** Carlos Guedes Soares,Tiago A. Santos,2024-05-08 Advances in Maritime Technology and Engineering comprises a collection of the papers presented at the 7th International Conference on Maritime Technology and Engineering MARTECH 2024 held in Lisbon Portugal on 14 16 May 2024 This Conference has evolved from the series of biannual national conferences in Portugal which have become an international event reflecting the internationalization of the maritime sector and its activities MARTECH 2024 is the seventh of this new series of biannual conferences This book comprises 142 contributions that were reviewed by an International Scientific Committee Advances in Maritime Technology and Engineering is dedicated to maritime transportation ports as well as maritime safety and reliability It further comprises sections dedicated to ship design cruise ship design and to the structural aspects of ship design such as ultimate strength and composites subsea structures as pipelines and to ship building and ship repair The Proceedings in Marine Technology and Ocean Engineering series is dedicated to the publication of proceedings of peer reviewed international conferences dealing with various aspects of Marine Technology and Ocean Engineering The series includes the proceedings of the following conferences the International Maritime Association of the Mediterranean IMAM conferences the Marine Structures MARSTRUCT conferences the Renewable Energies Offshore RENEW conferences and the Maritime Technology MARTECH conferences The Marine Technology and Ocean Engineering series is also open to new conferences that cover topics on the sustainable exploration of marine resources in various fields such as maritime transport and ports usage of the ocean including coastal areas nautical activities the exploration and exploitation of mineral resources the protection of the marine environment and its resources and risk analysis safety and reliability The aim of the series is to stimulate advanced education and training through the wide dissemination of the results of scientific research An Introduction to Error Analysis John R. Taylor,2022-08-30 John R Taylor s best selling text will be released in a new third edition that features Bayesian statistics and updated new chapter ending problems throughout Previously translated into nine languages this brilliant little text introduces the study of uncertainties to lower division science students using familiar examples This remarkable text by John R Taylor has been a non stop best selling international hit since it was first published forty years ago However the two plus decades since the second edition was released have seen two dramatic developments the huge rise in popularity of Bayesian statistics and the continued increase in the power and availability of computers and calculators In response to the former Taylor has added a full chapter dedicated to Bayesian thinking introducing conditional probabilities and Bayes theorem The several examples

presented in the new third edition are intentionally very simple designed to give readers a clear understanding of what Bayesian statistics is all about as their first step on a journey to become practicing Bayesians In response to the second development Taylor has added a number of chapter ending problems that will encourage readers to learn how to solve problems using computers While many of these can be solved using programs such as Matlab or Mathematica almost all of them are stated to apply to commonly available spreadsheet programs like Microsoft Excel These programs provide a convenient way to record and process data and to calculate quantities like standard deviations correlation coefficients and normal distributions they also have the wonderful ability if students construct their own spreadsheets and avoid the temptation to use built in functions to teach the meaning of these concepts

Search for New Heavy Charged Bosons and Measurement of High-Mass Drell-Yan Production in Proton-Proton Collisions Markus Zinser,2018-09-25 This book presents two analyses the first of which involves the search for a new heavy charged gauge boson a so called W boson This new gauge boson is predicted by some theories extending the Standard Model gauge group to solve some of its conceptual problems Decays of the W boson in final states with a lepton l e and the corresponding anti neutrino are considered Data collected by the ATLAS experiment in 2015 at a center of mass energy of $\sqrt{s} = 13$ TeV is used for the analysis In turn the second analysis presents a measurement of the double differential cross section of the process $pp \rightarrow Z \gamma X ll X$ including a $\gamma\gamma$ induced contribution at a center of mass energy of $\sqrt{s} = 8$ TeV The measurement is performed in an invariant mass region of 116 GeV to 1500 GeV as a function of invariant mass and absolute rapidity of the ll pair and as a function of invariant mass and pseudorapidity separation of the ll pair The data analyzed was recorded by the ATLAS experiment in 2012 and corresponds to an integrated luminosity of 20.3 fb It is expected that the measured cross sections are sensitive to the PDFs at very high values of the Bjorken x scaling variable and to the photon structure of the proton
