Teaching and Learning in a Digital World Michael E. Auer, David Guralnick, Istvan Simonics, 2018-02-09 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning ICL2017 held in Budapest Hungary on 27-29 September 2017. The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general but especially in engineering education. To face these current real world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today, the ICL conferences offer a forum for exchange concerning relevant trends and research results and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

, 2015 *Teacher Quality and Teacher Education Quality* Nicholas Michelli, Robin Dada, Deborah Eldridge, Rana Tamim, Karen Karp, 2016-10-14 Accreditation of teacher education programs is increasingly embraced internationally and is being modeled after the American experience despite criticisms from some in the field of teacher education in the United States. This book examines the transformation of accreditation and the interest and perception of nations and regions choosing to use the model in their own culture, including the Middle East and Gulf Region, South America, and the United Kingdom. Its distinctive edge is the juxtaposition of three sectors: quality assurance, accreditation, teacher preparation, and global international experiences. The authors address how the adoption of a universal requirement for accreditation embraces a particular view of what teacher quality means. The emphasis on the development of teacher preparation in concert with accreditation is of academic interest to scholars in the United States and abroad. The experiences and voices of teacher educators as international colleagues in a global climate of accountability bring a fresh perspective on shared challenges.
