POWER OF HABIT FORMING PRODUCTS (HOW TO CREATE ENGAGING AND ADDICTIVE PRODUCT EXPERIENCES) DR. PRIYAVRAT SANYAL, TILAK RAVI KRISHNASWAMY, SANDHYA SHARMA, 2023-02-20

If you look at the picture above, you can see that almost everyone in it is looking down at their hands, which are holding smartphones that are presumably loaded with social media apps and other apps they use frequently or are addicted to. Just look at the way technology has come to dominate everything in today's era. A study was conducted to see how much time people spend on their devices. *The Voice Catchers* Joseph Turow, 2021-05-18

Your voice as biometric data and how marketers are using it to manipulate you. Only three decades ago, it was inconceivable that virtually entire populations would be carrying around wireless phones wherever they went or that people's exact locations could be tracked by those devices. We now take both for granted. Even just a decade ago, the idea that individuals' voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel. Yet a new business sector is emerging to do exactly that: The first in-depth examination of the voice intelligence industry. *The Voice Catchers* exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis. Amazon and Google have numerous patents pertaining to voice profiling, and even now their smart speakers are extracting and using voice prints for identification and more. Customer service centers are already approaching every caller based on what they conclude a caller's voice reveals about that person's emotions, sentiments, and personality, often in real time. In fact, many scientists believe that a person's weight, height, age, and race, not to mention any illnesses they may have, can also be identified from the sound of that individual's voice. Ultimately, not only marketers but also politicians and governments may use voice profiling to infer personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole. Leading communications scholar Joseph Turow places the voice intelligence

industry in historical perspective explores its contemporary developments and offers a clarion call for regulating this rising surveillance regime
