Roadways for People Lynn Peterson, Elizabeth Doerr, 2022-12-06 Seventy years of a car only approach not car centric it s car only is actually not just non driver hostile it s driver hostile No one benefits Beth Osborne Director Transportation for America The car only approach in transportation planning and engineering has led to the construction of roadways that have torn apart and devalued communities especially Black and Brown communities Forging a new path to repair this damage requires a community solutions based approach to planning designing and building our roadways When Lynn Peterson began working as a transportation engineer she was taught to evaluate roadway projects based only on metrics related to driver safety allowable

speed for the highest number of cars project schedule and budget Involving the community and collaborating with peers were never part of the discussion Today Peterson is a recognized leader in transportation planning and engineering known for her approach that is rooted in racial equity guided by a process of community engagement and includes collaboration with other professionals In *Roadways for People* Lynn Peterson draws from her personal experience and interviews with leaders in the field to showcase new possibilities within transportation engineering and planning She incorporated a community solutions based approach in her work at Metro TriMet and while running the Washington State Department of Transportation where she played an instrumental role in the largest transportation bill in that state s history The community solutions based approach moves away from the narrow standards of traditional transportation design and focuses instead on a process that involves consistent feedback learning loops and meaningful and regular community engagement This approach seeks to address the transportation needs of the most historically marginalized members of the community *Roadways for People* is written to empower professionals and policymakers to create transportation solutions that serve people rather than cars Examples across the U S from Portland Oregon to Baltimore Maryland show what is possible with a community centered approach As traditional highway expansions are put on pause around the country professionals and policymakers have an opportunity to move forward with a better approach Peterson shows them how

Reliability and Statistics in Transportation and Communication Igor Kabashkin,Irina Yatskiv,Olegas Prentkovskis,2020-03-28 This book reports on cutting edge theories and methods for analyzing complex systems such as transportation and communication networks and discusses multi disciplinary approaches to dependability problems encountered when dealing with complex systems in practice The book presents the most noteworthy methods and results discussed at the International Conference on Reliability and Statistics in Transportation and Communication RelStat which took place in Riga Latvia on October 16 19 2019 It spans a broad spectrum of topics from mathematical models and design methodologies to software engineering data security and financial issues as well as practical problems in technical systems such as transportation and telecommunications and in engineering education

Jakarta Jorgen Hellman,Marie Thynell,Roanne van Voorst,2018-02-19 Jakarta is being transformed in an unknown speed and manner by new types of urban authorities and drivers of transformation These actors are moving in a field of opportunity that was created by recent and severe changes in the economic socio political and natural environment of Jakarta Including chapters written by contributors who have lived and worked in Jakarta for years this book shows how urban space in Jakarta is increasingly created by the entanglement of different layers that co exist in political and socio economic life with actors criss crossing between formal and informal spheres In each case the authors explore who are the drivers of urban change and what are the processes in shaping the current and future city of Jakarta Not denying that former elites are still a critical force in shaping Jakarta the book analyses to what extent former stakeholders are undermined and what types of new authorities or social institutions are emerging It

examines how drivers of transformation claim their right to space in the city and how their actions and strategies reflect their vision on the future of Jakarta An important addition to the discussion of urban change and development this book will be of interest to scholars interested in Indonesia South East Asia urbanization development research anthropology and globalization

Safe Mobility Dominique Lord, Simon Washington, 2018-04-18 This book increases the level of knowledge on road safety contexts issues and challenges shares what can currently be done to address the variety of issues and points to what needs to be done to make further gains in road safety

Autonomous Driving Markus Maurer, J. Christian Gerdes, Barbara Lenz, Hermann Winner, 2016-05-21 This book takes a look at fully automated autonomous vehicles and discusses many open questions How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers Where do automated vehicles fall under current legal frameworks What risks are associated with automation and how will society respond to these risks How will the marketplace react to automated vehicles and what changes may be necessary for companies Experts from Germany and the United States define key societal engineering and mobility issues related to the automation of vehicles They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment interact with other road users and choose actions that may have ethical consequences The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving While the safety benefits of such vehicles are tremendous the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks By covering all of these topics the book aims to provide a current comprehensive and scientifically sound treatment of the emerging field of autonomous driving

transformation of business and entrepreneurship for the forward industry Sustainable Cities in American Democracy Carmen Sirianni, 2020-09-25 We face two global threats the climate crisis and a crisis of democracy Located at the crux of these crises sustainable cities build on the foundations and resources of democracy to make our increasingly urban world more resilient and just Sustainable Cities in American Democracy focuses on this effort as it emerged and developed over the past decades in the institutional field of sustainable cities a vital response to environmental degradation and climate change that is shaped by civic and democratic action Carmen Sirianni shows how various kinds of civic associations and grassroots mobilizing figure in this story especially as they began to explicitly link conservation to the future of our democracy and then develop sustainable cities as a democratic project These organizations are national local or multitiered from the League of Women Voters to the Natural Resources Defense Council to bicycle and watershed associations Some challenge city government agencies contentiously while others seek collaboration many do both at some point Sirianni uses a range of analytic approaches from scholarly disciplines policy design urban governance social movements democratic theory public administration and planning to understand how such diverse civic and professional associations have come to be both an ecology of organizations and a systemic and coherent project The institutional field of sustainable cities has emerged with some core democratic norms and civic practices but also with many tensions and trade offs that must be crafted and revised strategically in the face of new opportunities and persistent shortfalls Sirianni's account draws ambitious yet pragmatic and hopeful lessons for a Civic Green New Deal a policy design for building sustainable and resilient cities on much more robust foundations in the decades ahead while also addressing democratic deficits in our polarized political culture Human Factors Guidelines for Road Systems John L. Campbell, 2012 This report completes and updates the first edition of NCHRP Report 600 Human Factors Guidelines for Road Systems HFG which was published previously in three collections The HFG contains guidelines that provide human factors principles and findings for consideration by and is a resource document for highway designers traffic engineers and other safety practitioners Foreword
