Zondor the Great John Greenridge,2010 The events depicted in this book have all been adapted and embellished in order to create this science fiction novel spot the join if you can However most of the content espouses a more or less true record of time travels by the author The scientific theory embodied within the novel should give cosmic scientists a nudge in the right direction It offers a brand new hypothetical understanding of how the Universe actually operates John knows that as normal living and breathing human beings rather than the Mechanical Intelligent Memory Units MIM Units as described by Zondor you wont be tempted to believe this story That is until it happens to you the average sane human reader Yet recent scientific discoveries offer some credence to the tale Those new theories while similar to my experience depend on the idea of the projection of the Universe as a hologram and modern scientists owe some sympathy to the idea They have not had the dubious benefit of my experiences as a guide however So the idea of projecting serial electronic pictures across a time continuum and onto an event horizon has not hit the new science headlines so far even though the technology exists for such events Like all new science my idea will have its arm chair critics The reader of this book is about to become one of those critics To the sceptic I would ask the question How long is it since radio and television were invented discovered If you wrote a book about radio and television in the 19th Century would you have ended up in the loony bin Most likely John Greenridge 2009

Raising the Spiritual Light Quotient David K. Miller, 2011-04-25 The concept of raising the spiritual light quotient is similar to the intelligence quotient used in modern psychology the IQ test However the spiritual light quotient is not the same as intelligence Rather the SLQ reflects one's ability to understand spiritual concepts to meditate and to connect with other dimensions It also is a measurement of one's ability to understand the relationship between Earth and the environment of the Earth and Earth's relationship to the galaxy Finally it is a measurement of one's ability to understand the existence of other dimensions as well as the relationship between the ascended masters and guides and our journey to higher realms for soul evolution Thus it appears necessary to look at the SLQ of a person the SLQ of an area and the SLQ of a planet All of the channeling I bring forth is based on the concept of the Sacred Triangle which is a new paradigm for spirituality This paradigm states that in order to heal Earth and bring everything into balance one must unite the concepts of galactic spirituality with ancient mystical thought and with the energies of native peoples including Native Americans
