Architecture, Ethics, and the Personhood of Place Gregory Caicco, 2007 Architecture and environmental design are among the last professional fields to develop a sustained and nuanced discussion concerning ethics Hemmed in by politics and powerful clients on one side and the often unscrupulous practices of the construction industry on the other environmental designers have been traditionally reluctant to address ethical issues head on And yet the rapid urbanization of the world's population continues to swell into new megacities each less healthy welcoming secure or environmentally sustainable than the next Green carbon reduced and sustainable building practices are important ways architects have recently responded to the symptoms of the crisis but are these efforts really addressing the core issues Taking the Dine Navajo Hogan Song a song used to protect and nourish the personhood of newly constructed dwellings as their inspiration the architects philosophers poets and other contemporary scholars contributing to this volume demonstrate that a deeper more radical change in our relationship to the built world needs to occur While offering a careful critique of modernist corporate or techno enthralled design practices these essays investigate an alternative relational ecology whose wisdom draws from ancient and often marginalized voices if not the whisperings of the earth itself Contributors include Richard Kearney Alberto Perez Gomez Juhani Pallasmaa Karsten Harries Edward Casey Susan Stewart David Abram Stacy Alaimo Jane and Laura Weaver Philip Sheldrake and Sebem Yucel Young

government big business big everything Kirkpatrick Sale took giantism to task in his 1980 classic *Human Scale* and today takes a new look at how the crises that imperil modern America are the inevitable result of bigness grown out of control and what can be done about it The result is a keenly updated carefully argued case for bringing human endeavors back to scales we can comprehend and manage whether in our built environments our politics our business endeavors our energy plans or our mobility Sale walks readers back through history to a time when buildings were scaled to the human figure as was the Parthenon democracies were scaled to the societies they served and enterprise was scaled to communities Against that backdrop he dissects the bigger is better paradigm that has defined modern times and brought civilization to a crisis point Says Sale retreating from our calamity will take rebalancing our relationship to the environment adopting more human scale technologies right sizing our buildings communities and cities and bringing our critical services from energy food and garbage collection to transportation health and education back to human scale as well Like *Small is Beautiful* by E F Schumacher *Human Scale* has long been a classic of modern decentralist thought and communitarian values a key tool in the kit of those trying to localize create meaningful governance in bioregions or rethink our reverence of and dependence on growth financially and otherwise Rewritten to interpret the past few decades *Human Scale* offers compelling new insights on how to turn away from the giantism that has caused escalating ecological distress and inequality dysfunctional governments and unending warfare and shines a light on many possible pathways that could allow us to scale down survive and thrive

Merleau-Ponty for Architects Jonathan Hale, 2016-07-01 The philosophy of Maurice Merleau Ponty 1908 1961 has influenced the design work of architects as diverse as Steven Holl and Peter Zumthor as well as informing renowned schools of architectural theory notably those around Dalibor Vesely at Cambridge Kenneth Frampton David Leatherbarrow and Alberto Perez Gomez in North America and Juhani Pallasmaa in Finland Merleau Ponty suggested that the value of people's experience of the world gained through their immediate bodily engagement with it remains greater than the value of understanding gleaned through abstract mathematical scientific or technological systems This book summarizes what Merleau Ponty's philosophy has to offer specifically for architects It locates architectural thinking in the context of his work placing it in relation to themes such as space movement materiality and creativity introduces key texts helps decode difficult terms and provides quick reference for further reading

BOOK JACKET Horror in Space Michele Brittany, 2017-10-27 In sharp contrast to many 1960s science fiction films with idealized views of space exploration Ridley Scott's *Alien* 1979 terrified audiences depicting a harrowing and doomed deep space mission The *Alien* films launched a new generation of horror set in the great unknown inspiring filmmakers to take Earth bound franchises like *Leprechaun* and *Friday the 13th* into space This collection of new essays examines the space horror subgenre with a focus on such films as Paul W S Anderson's *Event Horizon* Duncan Jones' *Moon* Mario Bava's *Planet of the Vampires* and John Carpenter's *Ghosts of Mars* Contributors discuss how filmmakers explored the concepts of the final girl survivor the uncanny valley the isolationism of space travel religion and supernatural phenomena

The Spaces and Places of Horror Francesco Pascuzzi, Sandra Waters, 2020-01-16 This volume explores the complex horizon of landscapes in horror film culture to better understand the use that the genre makes of settings locations spaces and places be they physical imagined or altogether imaginary In *The Philosophy of Horror* No 1 Carroll discusses the geography of horror as often situating the filmic genre in liminal spaces as a means to displace the narrative away from commonly accepted social structures this use of space is meant to trigger the audience's innate fear of the unknown This notion recalls Freud's theorization of the uncanny as it is centered on recognizable locations outside of the Lacanian symbolic order In some instances a location may act as one of the describing characteristics of evil itself In *A Nightmare on Elm Street* teenagers fall asleep only to be dragged from their bedrooms into Freddy Krueger's labyrinthine lair an inescapable boiler room that enhances Freddie's powers and makes him invincible In other scenarios the action may take place in a distant little known country to isolate characters Roth's *Hostel* films or as a way to mythicize the very origin of evil Bava's *Black Sunday* Finally anxieties related to the encroaching presence of technology in our lives may give rise to postmodern narratives of loneliness and disconnect at the crossing between virtual and real places in Kurosawa's *Pulse* the internet acts as a gateway between the living and spirit worlds creating an oneiric realm where the living vanish and ghosts move to replace them This suggestive topic begs to be further investigated this volume represents a crucial addition to the scholarship on horror film culture by adopting a transnational comparative approach to the analysis of formal and narrative concerns specific to the genre by considering some of the most popular titles in horror film culture alongside lesser known works for which this anthology represents the first piece of relevant scholarship
