Feminism as Life's Work Mary K. Trigg, 2014-06-23 With suffrage secured in 1920 feminists faced the challenge of how to keep their momentum going As the center of the movement shrank a small self appointed vanguard of modern women carried the cause forward in life and work *Feminism as Life's Work* profiles four of these women the author Inez Haynes Irwin the historian Mary Ritter Beard the activist Doris Stevens and Lorine Pruette a psychologist Their life stories told here in full for the first time embody the changes of the first four decades of the twentieth century and complicate what we know of the period Through these women's intertwined stories Mary Trigg traces the changing nature of the women's movement across turbulent decades rent by world war revolution global depression and the rise of fascism Criticizing the standard division of feminist activism as a series of historical waves Trigg exposes how Irwin Beard Stevens and Pruette helped push the U S feminist movement to victory and continued to propel it forward from the 1920s to the 1960s decades not included in the wave model At a time widely viewed as the doldrums of feminism the women in this book were in fact taking the cause to new sites the National Women's Party sexuality and relations with men marriage and work and financial independence In their utopian efforts to reshape work sexual relations and marriage modern feminists ran headlong into the harsh realities of male power the sexual double standard the demands of motherhood and gendered social structures In *Feminism as Life's Work* Irwin Beard Stevens and Pruette emerge as the heirs of the suffrage movement guardians of a long feminist tradition and catalysts of the belief in equality and difference Theirs is a story of courage application and perseverance a story that revisits the bleak and lonely years of the U S women's movement and emerges with a fresh perspective of the history of this pivotal era

Making the Right Choice Asha L. Abeyasekera, 2021-03-12 *Making the Right Choice* unravels the entangled relationship between marriage morality and the desire for modernity as it plays out in the context of middle class status concerns and aspirations for upward social mobility within the Sinhala Buddhist community in urban Sri Lanka By focusing on individual life histories spanning

three generations the book illuminates how narratives about a gendered self and narratives about modernity are mutually constituted and intrinsically tied to notions of agency The book uncovers how becoming modern in urban Sri Lanka rather than causing inter generational conflict is a collective aspiration realized through the efforts of bringing up educated and independent women capable of making right choices The consequence of this collective investment is a feminist conundrum agency does not denote the right to choose but the duty to make the right choice hence agency is experienced not as a sense of freedom but rather as a burden of responsibility *Chapters in the History of Popular Progress Chiefly in Relation to the Freedom of the Press and Trial by Jury. 1660-1820. With an Application to Later Years* James Routledge,1876 **Australian**

The Oxford Encyclopedia of Women in World History Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune women's and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike [Contributions Towards a Bibliography of the Higher Education of Women](#) American Association of University Women, 1897

A History of Women in Psychology and Neuroscience Dale DeBakcsy, 2024-09-30 Since virtually its first moments as an academic science women have played a major role in the development of psychology gaining from the outset research opportunities and academic positions that had been denied them for centuries in other branches of scientific investigation Look wherever you will in any branch of psychology or neuroscience in the last century and a half and what you will find are a plethora of women whose discoveries fundamentally changed how we view the brain and its role in the formation of our perceptions and behaviors A History of Women in Psychology and Neuroscience tells the story of 267 women whose work opened new doors in humanity's ongoing attempt to learn about its own nature from Christine Ladd Franklin's late 19th century studies of how the brain perceives color to Virginia Johnson's pioneering studies of the human sexual response and Augusta Dejerine Klumpke's early association of neurological conditions with their underlying brain regions to May Britt Moser's Nobel winning discovery a century later of the grid cells that allow us to mentally model our surroundings Here are the stories of when and how we learned how memories are formed what role an enriched environment plays in mental development why some individuals are better able to cope with chronic stress than others how societal stereotypes unconsciously feed into our daily interactions with other people what role evolution might have played in the formation of our social habits what light the practices of sign language might shed on our brain's basic capacity for language how children internalize the violence they experience from others and hundreds of other tales of the women who dug deep into the structures of the human mind to uncover layer by layer the answers to millennia old questions of what humans are and why they behave as they do
