Altruism And Beyond Altruism And Beyond

Joanne B. Ciulla

Altruism And Beyond Altruism And Beyond:

Altruism and Beyond Oded Stark, 1999-10-07 Revised updated and in paperback studies altruistic and nonaltruistic motives for transfers between families and groups Beyond Altruism Willard C. Richan, 1987 When one is dealing with matters like the welfare poor and control of threatening behavior and abuse of young children and teenage pregnancy there are few neutrals So begins Willard Richan s challenging new book on social welfare policy Beyond Altruism proceeds from the assumption that social welfare policy is not formulated in an environment free from politics and special interests The allocation and redistribution of resources the setting of policy priorities and even the licensing of social workers are issues that are highly charged and are of enormous significance to both the parts and the whole of society Beyond the Dichotomy Between Altruism and Egoism Emilian Mangone, 2020-06-01 The birth of the social sciences and specifically of sociology begets some open questions among which the debate on altruism and the concept of social solidarity The term altruism was firstly used by Auguste Comte It is one of the few terms born within the scientific field that will enter the common language roughly maintaining the same meaning For the positivist Comte altruism represented the powerful impulse to the intellectual and moral development of humanity to which we must strive as a future state The term commonly means all those actions whose benefits fall on others and not on the agent actor In short for Comte altruism means to live for others vivre pour autrui The centrality of altruism as part of the reflections of social sciences can be found in many classic authors Durkheim for example explains the foundations of social solidarity in modern society precisely through the opposition between altruism and egoism and defines its implications in the book *Le Suicide* in 1897 also identifying what will later become the main typology of suicide by contrasting altruistic suicide with egoistic suicide Likewise both Weber and Marx while not using the term altruism as such refer to it indirectly The former when describing the ethics of love for the charismatic authority as opposed to legal and rational authority the latter when corroborating his polemics against Christian charity The interest in altruism as an object of study of social sciences however is progressively waning especially in Europe From the second half of the last century theoretical and empirical studies show the indifference of social scientists towards this object except for the Russian American sociologist Sorokin who in 1949 founded the Harvard Research Center in Creative Altruism In recent years however the topic seems to take renewed vigor especially in the United States with the birth in 2012 of the section Altruism Morality Social Solidarity within the American Sociological Association It considered these three aspects as a single field of disciplinary specialization since they are significantly dependent on socio cultural reality This is the situation in the United States In Europe there is a renewed interest in studies on altruism especially in French language sociology above all starting from the numerous contributions to reading and re reading work on Marcel Mauss s on gift of 1925 and in following the anti utilitarian movement and studies of the school of social representations of Moscovici which leads to the definition of the elementary forms of altruism The book aims to analyze the concept of altruism starting from classical philosophy up to the

systems of ideas of contemporaneity considering the approaches and authors of reference in an interdisciplinary and transdisciplinary way The representations of altruism and egoism in contemporary society are constantly changing following the transformations of society itself Having abandoned the idea that the factors leading to altruism or egoism lay only in human nature we find them in people s conduct freedom relationships their associative forms and society The attention is thus turned to two elements of the daily life of individuals culture and social relations The book tries therefore through the meso theories developed in recent decades which study the relationships between life world and social system to describe the links between altruism egoism culture and social relations We will pay particular attention to the relationality of individuals in an attempt to overcome the dichotomy altruism egoism by reading some aspects little considered by previous studies or contemplated only indirectly or marginally The ultimate goal is to highlight how positive actions are necessary for the contemporary society and how social sciences must go back and study positive socio cultural actions and phenomena not only negative as a way to promote them for the well being of the society

Bioethics Beyond Altruism Rhonda M Shaw,2017-08-31 This book departs from conventional bioethics approaches to consider the different moral and political economies involved in the donation and transformation of human organs gametes stem cells and breastmilk Collectively the authors draw attention to the different values associated with research and therapy on body part and tissue exchange through an examination of altruism gift and commodity relations They expertly discuss issues such as the bioethical conundrums around the circulation and use of human biological materials and services as well as their legal and regulatory limits the economic benefits and health values attributed to various body parts and products and the matter of immaterial labour and affective relations between donors recipients and others involved in tissue provision Based on new empirical research this interdisciplinary collection of original and timely essays will be of interest to students and researchers in gender and cultural studies sociology anthropology science and technology studies as well as medical professionals with an interest in health and reproduction

Moving Beyond Self-Interest Stephanie L. Brown,R. Michael Brown,Louis A. Penner,2012 Moving Beyond Self Interest is an interdisciplinary volume that discusses cutting edge developments in the science of caring for and helping others In Part I contributors raise foundational issues related to human caregiving They present new theories and data to show how natural selection might have shaped a genuinely altruistic drive to benefit others how this drive intersects with the attachment and caregiving systems and how it emerges from a broader social engagement system made possible by symbiotic regulation of autonomic physiological states In Part II contributors propose a new neurophysiological model of the human caregiving system and present arguments and evidence to show how mammalian neural circuitry that supports parenting might be recruited to direct human cooperation and competition human empathy and parental and romantic love Part III is devoted to the psychology of human caregiving Some contributors in this section show how an evolutionary perspective helps us better understand parental investment in and empathic concern for children

at risk for or suffering from various health behavioral and cognitive problems Other contributors identify circumstances that differentially predict caregiver benefits and costs and raise the question of whether extreme levels of compassion are actually pathological The section concludes with a discussion of semantic and conceptual obstacles to the scientific investigation of caregiving Part IV focuses on possible interfaces between new models of caregiving motivation and economics political science and social policy development In this section contributors show how the new theory and research discussed in this volume can inform our understanding of economic utility policies for delivering social services such as health care and education and hypotheses concerning the origins and development of human society including some of its more problematic features of nationalism conflict and war The chapters in this volume help readers appreciate the human capacity for engaging in altruistic acts on both a small and large scale

The Search for Ethics in Leadership, Business, and Beyond Joanne B. Ciulla, 2020-05-05 This book brings together a wide range of topics in leadership ethics and business ethics It approaches these topics from the perspective of the humanities as well as the social sciences About half of the book is on leadership and the other half on topics in business ethics Besides these general areas of research the book explores how to teach and study ethics in both business ethics and leadership studies Specifically it examines issues ranging from the nature of ethical leadership to studies of authenticity virtue and the public and private morality of leaders In business ethics the subjects covered span from moral imagination to casuistry meaningful work and workplace ethics The book includes a section on the importance of liberal arts for studying and teaching ethics in business and professional schools It concludes with a reflection on the ethical challenges of leaders and followers in a world where some leaders have inverted moral values

Beyond Economic Man Marianne A. Ferber, Julie A. Nelson, 2009-04-01 This is the first book to examine the central tenets of economics from a feminist point of view In these original essays the authors suggest that the discipline of economics could be improved by freeing itself from masculine biases Beyond Economic Man raises questions about the discipline not because economics is too objective but because it is not objective enough The contributors nine economists a sociologist and a philosopher discuss the extent to which gender has influenced both the range of subjects economists have studied and the way in which scholars have conducted their studies They investigate for example how masculine concerns underlie economists concentration on market as opposed to household activities and their emphasis on individual choice to the exclusion of social constraints on choice This focus on masculine interests the contributors contend has biased the definition and boundaries of the discipline its central assumptions and its preferred rhetoric and methods However the aim of this book is not to reject current economic practices but to broaden them permitting a fuller understanding of economic phenomena These essays examine current economic practices in the light of a feminist understanding of gender differences as socially constructed rather than based on essential male and female characteristics The authors use this concept of gender along with feminist readings of rhetoric and the history of science as well as postmodernist theory and personal experience as

economists to analyze the boundaries assumptions and methods of neoclassical socialist and institutionalist economics The contributors are Rebecca M Blank Paula England Marianne A Ferber Nancy Folbre Ann L Jennings Helen E Longino Donald N McCloskey Julie A Nelson Robert M Solow Diana Strassmann and Rhonda M Williams Beyond Bumper Sticker Ethics Steve Wilkens,2011-08-02 Steve Wilkens exposes the complex ethical systems lurking behind the most common slogans of our culture offering a Christian evaluation of each In this revised and expanded edition the author has updated his introductory remarks about each ethical system and has included new chapters on evolutionary ethics and narrative ethics

Beyond Collusion, Altruism Or Duty Christian Schneider-Arnspenger,Yanis Varoufakis,1999 *Evolution and Ethics* Philip Clayton,Jeffrey Schloss,2004-08-04 Certain to engage scholars students and general readers alike *Evolution and Ethics* offers a balanced levelheaded constructive approach to an often divisive debate Altruism in World Religions Suzanne Neusner,Bruce Chilton,2005-11-08 In 1830 philosopher Auguste Comte coined the term altruism to provide a general definition for the act of selflessly caring for others But does this modern conception of sacrificing one s own interests for the well being of others apply to the charitable behaviors encouraged by all world religions In *Altruism in World Religions* prominent scholars from an array of religious perspectives probe the definition of altruism to determine whether it is a category that serves to advance the study of religion Exploring a range of philosophical and religious thought from Greco Roman philia to Judaism Christianity and Islam from Hinduism in India to Buddhism and the religions of China and Japan the authors find that altruism becomes problematic when applied to religious studies because it is in fact a concept absent from religion Chapters on Judaism Christianity and Islam reveal that followers of these religions cannot genuinely perform self sacrificing acts because God has promised to reward every good deed Moreover the separation between the self and the other that self sacrifice necessarily implies runs counter to Buddhist thought which makes no such distinction By challenging our assumptions about the act of self sacrifice as it relates to religious teachings the authors have shown altruism to be more of a secular than religious notion At the same time their findings highlight how charitable acts operate with the values and structures of the religions studied Altruism and Altruistic Love Stephen G. Post,Lynn G. Underwood,Jeffrey P. Schloss,William B. Hurlbut,2002-03-28 The concept of altruism or disinterested concern for another s welfare has been discussed by everyone from theologians to psychologists to biologists In this cutting edge book evolutionary neurological developmental psychological social cultural and religious aspects of altruistic behavior are examined by renowned researchers The result is a collaborative and provocative look at one of humanity s essential and defining characteristics

Extraterrestrial Altruism Douglas A. Vakoch,2013-09-14 *Extraterrestrial Altruism* examines a basic assumption of the Search for Extraterrestrial Intelligence SETI that extraterrestrials will be transmitting messages to us for our benefit This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact Technological civilizations that transmit signals for the

benefit of others but with no immediate gain for themselves certainly seem to be altruistic But does this make biological sense Should we expect altruism to evolve throughout the cosmos or is this only wishful thinking Is it dangerous to send messages to other worlds as Stephen Hawking has suggested or might humankind benefit from an exchange with intelligence elsewhere in the galaxy Would extraterrestrial societies be based on different ethical principles or would we see commonalities with Earthly notions of morality Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth providing new insights that are critical for SETI Chapters are authored by leading scholars from diverse disciplines anthropology astronomy biology chemistry computer science cosmology engineering history of science law philosophy psychology public policy and sociology The book is carefully edited by Douglas Vakoch Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies The Foreword is by Frank Drake This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth or whether they are built into the fabric of the universe *The Evolution of Altruism and the Ordering of Love* Stephen J. Pope, 1995-04-01 In this book Stephen J Pope argues that contemporary scientifically based theories of the evolution of altruism provide important insights into one of the fundamental moral problems of Christian ethics the natural basis of love and its ordering He explores the contributions evolutionary theory makes to our understanding of the biological foundations of kin preference and reciprocal care the limits of love and the need for an ordering of love issues relevant to any ethic that accords a central role to the deeply natural affections found in friendship marriage and the family He proposes that understanding human nature in its broader evolutionary context brings to ethics a needed balance between the personal and biological dimensions of human nature In the context of Catholic ethics Pope points out functional similarities between Thomas Aquinas s use of then available scientific theories in his interpretation of the natural basis of primary relationships and Pope s own efforts to avoid the deficiencies that characterize contemporary Catholic interpretations of love based on personalism and existentialism He concludes with a call for a multidimensional interpretation of love one that incorporates scientifically based theories about human nature together with an appreciation of the significance of motives intentions and freedom for the ordering of human affections and moral responsibility This book will be of interest to moral theologians especially those concerned with the topics of love justice and natural law ethics

Support-bargaining, Economics, and Society Patrick Spread, 2013 Support Bargaining Economics and Society links support bargaining to Darwin s theory of natural selection and traces the implications of support bargaining and money bargaining across society It provides a wholly different account of the functioning of human societies from anything that has gone before Social scientists ever since there have been such people have missed the crucial human characteristic the propensity to seek support that has given rise to group formation and the myriad activities that are feasible in groups

God and Difference Linn Marie Tonstad, 2015-10-05 God and Difference interlaces Christian theology with queer and

feminist theory for both critical and constructive ends Linn Marie Tonstad uses queer theory to show certain failures of Christian thinking about God gender and sexuality She employs queer theory to dissect trinitarian discourse and the resonances found in contemporary Christian thought between sexual difference and difference within the trinity Tonstad critiques a broad swath of prominent Christian theologians who either use queer theory in their work or affirm the validity of same sex relationships arguing that their work inadvertently promotes gendered hierarchy This volume contributes to central debates in Christianity over divine and human personhood gendered relationality and the trinity and provides original accounts of God sexual difference and Christian community that are both theologically rich and thoroughly queer *Beyond Biology* Jacob M. Kohlhaas, 2021 By integrating Catholic social thought and social scientific studies of child well being in order to offer a more diverse and inclusive interpretation of parenthood Jacob M Kohlhaas's *Beyond Biology* creates room for meaningful intellectually convincing and theologically rich responses to challenges facing Catholic families today **A Brain for All Seasons** William H. Calvin, 2003-11 Winner of the 2002 Phi Beta Kappa Award in Science Mankind has recently come to the shocking realization that our ancestors survived hundreds of abrupt and severe changes to Earth's climate In this unique travelogue William H Calvin takes us around the globe and back in time showing us how such cycles of cool crash and burn provided the impetus for enormous increases in the intelligence and complexity of human beings and warning us of human activities that could trigger similarly massive shifts in the planet's climate **Crossing the Veil of Eternity** Omar Han, *Crossing the Veil of Eternity A Sufi Odyssey on Death and Beyond* By Omar Han What lies beyond the final breath Where do we go when the veil lifts and the soul is called home *Crossing the Veil of Eternity* is a soul stirring exploration of death not as an end but as a sacred passage back to the Beloved Blending the mystic depth of Sufi tradition with universal spiritual truths Omar Han offers a luminous guide to the greatest mystery of all our return to the Divine Through sixty profound chapters filled with Quranic insight Prophetic wisdom Sufi teachings poetry and interfaith reflections this book invites readers on a spiritual odyssey into the heart of impermanence From the moment of birth to the final breath from the unseen realm Barzakh to the Day of Judgment this work weaves together philosophy theology metaphysics and lived human experience to illuminate the sacred journey of the soul If you've ever wrestled with grief feared the unknown or longed to live with deeper meaning *Crossing the Veil of Eternity* will guide you gently reminding you that death is not the darkness we dread but the doorway through which we awaken Inside this book discover Sufi perspectives on death dying and the afterlife The metaphysical journey of the soul Ruh and the lower self Nafs Stories of saints Prophets and mystics who embraced mortality with grace Reflections on Paradise Hell Judgment and Divine Mercy Practical spiritual practices for remembrance surrender and inner peace Deep interfaith resonance with Jewish Christian Hindu and Buddhist views on death Poetic meditations and profound philosophical insights A book to sit with weep with reflect with and rise with A guide not just to death but to life Modernism beyond the Human, 2023-10-09 One of the defining features of modernism lies in its

far reaching rethinking of the relation between the human and the non human In the present volume this crucial aspect of modernism s legacy is investigated from an authentically transnational perspective taking an innovative stance on a diverse range of authors from posthumanist classics such as Beckett and Woolf to Valentine de Saint Point Radoje Domanovic and Aldo Palazzeschi among others On the one hand this collection sheds new light on the modernist contribution to posthumanism providing a valuable reference point for future studies on the topic On the other it offers a new take on the transnational dimension of modernism highlighting unexplored convergences between modernist authors from several different national contexts

Immerse yourself in heartwarming tales of love and emotion with is touching creation, **Altruism And Beyond Altruism And Beyond** . This emotionally charged ebook, available for download in a PDF format (Download in PDF: *), is a celebration of love in all its forms.
