Cruising the Queensland Coast: Second Edition Greg Luck, 2022-10-23. Cruising the Queensland Coast is a cruising guide for yachts cruising the Queensland coast. Each of the 13 coasts from the Gold Coast to the Cooktown Coast is covered in detail including marinas, anchorages, passages, wind and wave averages, public pontoons, and quick reference information and links for vital weather search and rescue notices to mariners and other vital information. It features hundreds of chartlets and high resolution aerial photos of anchorages to take the guesswork out of anchoring. Each anchorage has information on depth, bottom, mobile reception, marine park zone, and recommended wind directions and strengths. The book is also integrated with Navionics and C Map. Anchorages and passages can be imported into Navionics and C Map simply by clicking on the Navionics link and GPX link icons throughout the book. The book also provides an extensive reference of useful information for the Queensland Coast such as skills and experience, recommended apps, charts, and books, equipping the yacht for cruising, cruising logistics, climate and weather systems, marine hazards, and the three major marine parks and their rules. This book will help get the first time cruiser of the Queensland coast started. For those familiar with the coast, the wealth of information, data, and links all pulled together into one place and organised in a systematic way will prove invaluable. For both the more than one thousand external reference links make it easier to cruise the coast safely and simplify many of the everyday tasks of living on a cruising yacht such as finding and entering a marina and restocking once there.

Global Networking, Communication and Culture: Conflict or Convergence? Halit Ünver, 2018-03-19. Pursuing an interdisciplinary approach, this book offers detailed insights into the empirical relationships between overall social key figures of states and cultures in the fields of information and communication technology, ICT, digital divide, inequality, the economy, education, and religion. Its goal is to bridge the cultural gap between computer scientists, engineers, economists, social and political scientists by providing a mutual understanding of the essential challenges posed and opportunities offered by a global information and knowledge society. In a sense, the historically unprecedented technical advances in the field of ICT are shaping humanity at different levels and forming a hybrid intelligent human technology system, a so-called global superorganism. The main innovation is the combined study of digitization and globalization in the context of growing social inequalities, collapse, and sustainable development and how a convergence towards a kind of global culture could take place. Accordingly, the book discusses the spread of ICT, Internet Governance, the balance between the central concentration of power and the extent of decentralized power distribution, the inclusion or exclusion of people and states in global communication processes, and the capacity for global empathy or culture.
