Chilton Manual Equinox 2010 2014:

Anti-Atheist Nation Petra Klug, 2022-12-30 Atheists are a growing but marginalized group in the American religious patchwork and they have been the target of ridicule and discrimination throughout the nation's history. This book is the first comprehensive study of anti-atheism in the United States. It traces anti-atheism through five centuries of American history from colonization to the era of Donald Trump and contemporary conspiracy ideologies such as the atheist New World Order. Describing anti-atheist prejudices and explaining the social and psychological mechanisms behind anti-atheist attitudes, it will appeal to scholars of sociology, religious studies, and history with interests in religion in the United States. **The**

Conversational Interface Michael McTear, Zoraida Callejas, David Griol, 2016-05-19 This book provides a comprehensive introduction to the conversational interface, which is becoming the main mode of interaction with virtual personal assistants, smart devices, various types of wearable, and social robots. The book consists of four parts. Part I presents the background to conversational interfaces, examining past and present work on spoken language interaction with computers. Part II covers the various technologies that are required to build a conversational interface, along with practical chapters and exercises using open source tools. Part III looks at interactions with smart devices, wearables, and robots, and discusses the role of emotion and personality in the conversational interface. Part IV examines methods for evaluating conversational interfaces and discusses future directions. **Proceedings of 15th International Conference on Electromechanics and Robotics**

"Zavalishin's Readings" Andrey Ronzhin, Vladislav Shishlakov, 2020-09-01 This book features selected papers presented at the 15th International Conference on Electromechanics and Robotics Zavalishin's Readings ER ZR 2020 held in Ufa, Russia, on 15-18 April 2020. The contributions, written by professionals, researchers, and students, cover topics in the field of automatic control systems, electromechanics, electric power engineering, and electrical engineering, mechatronics, robotics, automation, and vibration technologies. The Zavalishin's Readings conference was established as a tribute to the memory of Dmitry Aleksandrovich Zavalishin (1900-1968), a Russian scientist, corresponding member of the USSR Academy of Sciences, and founder of the school of valve energy converters based on electric machines and valve converters' energy. The first conference was organized by the Institute of Innovative Technologies in Electromechanics and Robotics at the Saint Petersburg State University of Aerospace Instrumentation in 2006. **The Rise and Fall of Osama Bin Laden** Peter L. Animal Labor and Colonial Warfare James L. Hevia, 2018-08-23 Until well into the twentieth century pack animals were the primary mode of transport for supplying armies in the field. The British Indian Army was no exception. In the late nineteenth century, for example, it forcibly pressed into service thousands of camels of the Indus River basin to move supplies into and out of contested areas, a system that wreaked havoc on the delicately balanced multispecies environment of humans, animals, plants, and microbes living in this region of Northwest India. In *Animal Labor and Colonial Warfare*, James Hevia examines the use of camels, mules, and donkeys in colonial campaigns of conquest and pacification, starting with the Second Afghan War during which an astonishing 50,000 to 60,000 camels perished and ending in the early twentieth century. Hevia explains how, during the nineteenth and twentieth centuries, a new set of human-animal relations were created as European powers and the United States expanded their colonial possessions and attempted to put both local economies and ecologies in the service of resource extraction. The results were devastating to animals and human communities alike, disrupting centuries-old ecological and economic relationships. And those effects were lasting. Hevia shows how a number of the key issues faced by the postcolonial nation-state of Pakistan, such as shortages of clean water for agriculture, humans, and animals, and limited resources for dealing with infectious diseases, can be directly traced to decisions made in the colonial past. An innovative study of an underexplored historical moment, *Animal Labor and Colonial Warfare* opens up the animal studies to non-Western contexts and provides an empirically rich contribution to the emerging field of multispecies historical ecology.

Case Studies of Linguistic Representations of Motion Yo Matsumoto, 2025-02-17 How languages describe spatial motion events has been a hotly discussed topic in recent years in cognitive linguistics and linguistic typology. This two-volume book provides new descriptions and proposals on this fascinating topic based on a large-scale experimental study of motion event descriptions in almost 20 languages across the globe as part of a research project conducted by NINJAL. The chapters are based on papers presented at international conferences, most at NINJAL international symposium held in January 2019, some at International Cognitive Linguistics Conferences in 2017 and 2019. This volume provides valuable descriptions of familiar and unfamiliar languages as well as insightful discussions of controversial issues based on those descriptions. This book would interest students in linguistics and cognitive science in Asia, Pacific, Europe, and North America.
