Dacus spp and exotic Bactrocera and Zeugodacus spp species inflict considerable losses to horticulture causing losses ranging from 30 90% Over the past 10 years of R coverage of African native species has been limited largely to Bactrocera oleae and Ceratitis capitata which are not economically important species in many Africa countries Indeed no book exist that have explicitly addressed economically important African fruit flies and none of the various reviews have specifically focused on the status of the bioecology economic impact and management of exotic and native fruit flies including several potentially invasive Dacus species attacking vegetables in Africa This book consolidates this status of knowledge and socio economic impact of various intervention techniques that are currently being applied across Africa The timing of the book is especially pertinent due to the changing fruit fly landscape in Africa caused by arrivals of the highly destructive alien invasives Bactrocera dorsalis B zonata and B latifrons and the priorities African countries have placed recently on export of fruits and vegetables to international markets This is an important reference material for researchers academics and students that are keen at improving horticulture and enhancing food and nutrition security in Africa and beyond
