The Risk of Trading Michael Toma, 2012-03-23

Develop the skills to manage risk in the high stakes world of financial speculation. The Risk of Trading is a practical resource that takes an in-depth look at one of the most challenging factors of trading: risk management. The book puts a magnifying glass on the issue of risk, something that every trader needs to understand in order to be successful. Most traders look at risk in terms of a stop loss that enables them to exit a losing trade quickly. In The Risk of Trading, Michael Toma explains that risk is ever present in every aspect of trading and advocates that traders adopt a more comprehensive view of risk that encompasses the strategic trading plan, account size, drawdowns, maximum possible losses, psychological capital and crisis management. Shows how to conduct a detailed statistical analysis of an individual's trading methodology through back testing and real time results so as to identify when the methodology may be breaking down in actual trading. Reveals why traders should think of themselves as project managers who are strategically managing risk. The book is based on the author's unique focus on the risk approach to trading using data driven risk statistical analytics. Using this book as a guide, traders can operate more as business managers and learn how to avoid market busting losses while achieving consistently good results.

What the book coversThis book is about day trading Using the price action itself rather than any of the usual array of indicators based on it The US 30 year Treasury Bond Futures is the favoured instrument the T Bonds as they are commonly called There are good reasons for choosing this instrument to learn to trade one being that they do not require a detailed knowledge of bonds themselves The other attractions whether you are a beginner or a seasoned veteran are to do with liquidity range behaviour patterns and the price action displayed at the key support and resistance points it encounters Most days the T bonds offer trading opportunities which can be taken within a money management environment that can give you an edge for profit and this book has been designed to show you how to do just that Fully illustrated with charts taken from a live trading screen and displayed in exactly the way you would have seen them for yourself on your computer monitor What you see is not just what happened in detail but also clear evidence of just how you could have profited yourself from each trading situation 2 Who the book is forThis book has been written for anyone wishing to day trade using a discretionary method rather than a mechanical system It is a learning tool which should commend itself to the experienced trader as much

as to someone new to this business Certainly I hope that any raw recruit would find it an easy read even if it took a while longer to digest the subject matter as a whole

3 How the book is structured The seasoned trader will probably start by skip reading to see if he can cut to the chase quickly The lessexperienced will immediately see from the detail of the charts alone that there is a great deal of info

How to make High Profits from Trading Josef Lefric, It is huge step when you make the decision to become a trader Most brand new traders are getting into this business because they think they can make quick money and become rich beyond their dreams While that may be true it is not as easy as one thinks and certainly will not happen as soon as one thinks There are only two groups of people who are doing business in the markets the professionals and the retail investors and traders What is that lyric in that one song The lure of easy money has a very strong appeal Maybe you decided to get into the trading business of investing and or investing and trading because you saw some late night TV commercial about day trading with flashy offers Perhaps you received a spam e mail touting some fancy trading method or system that said you could make easy money in the markets I suggest you reconsider if that s the case I wrote this book to give beginners some simple actionable easy to use investment and trading ideas for writing their own rule based trading plan which will give them an edge over the competition in the live financial markets All of the techniques presented in this book are simple enough for total beginners with zero experience to use in order to begin making money right away If you re already ready investing and trading live and are struggling or losing money the techniques in this book can help you to turn you re trading around The live markets are a harsh and challenging environment to work in to say the least and the better tools you have the more money you will make The simple strategies in this book are not for the weak minded and will challenge you to go against everything you may have studied thus far in your trading career The methods in this book can be used as a baseline and if employed properly will give any trader some ideas on how to build their own rule based trading plan which is unique to their style of investing and trading This book will be a valuable resource for beginner investors and traders who wish to expedite their learning curve and begin making money from investing and trading right away versus spending a lot of valuable education time and perhaps losing a lot of hard earned money from not having composed a rule based trading plan the idea is to start small and build on success The concepts presented in this book work on any market in any time frame and are not hard to employ and build into a working rule based plan that makes money consistently and will also help you to avoid the stress as well as the fear and greed which are inherent of working in this business and is a must read for any brand new self directed investor and trader The only thing you are in control of in the live market is how much money you don t lose and investing and trading with a rule based plan is the edge you ll need to compete with the top traders in the world

How to get Rich from Trading Josef Argent, New people getting into financial market trading most of the time have not done their research and have no idea they are entering a business where there are people in the live market who will walk over dead bodies to make money They are entering a business where the smart money in the business are

looking to drain your trading capital account on a daily basis and most of the time they do because new people come into the business unprepared or at best under prepared as well as underfunded and have not developed a trading edge before they enter the market with real money How to get Rich from Trading is meant to expedite your learning curve which can sometimes be long and costly You can Google this or that information however it would take you many years to learn what I am going to tell you in this book before you could invest any of your hard earned real money in the live markets and have a chance making real money trading in the financial markets of the world and some of the information in the book is specific to it and can t be found anywhere else The best part about the method of trading in this book is that it can be used in any tradable liquid market on any time frame you wish to work in and anyone can learn it fast and make money right away with once they master learning how to use it properly How to get Rich from Trading gives you the first steps needed to end up in the group of traders that achieves consistent low risk profits on a daily basis the professionals and the smart money If you are not ready to take that step yet then you may end up part of the group called the sheeple of the herd that provides those profits and make up the 97% of traders who lose all of their money from not being prepared to work in this brutal and harsh business While that may seem like a harsh statement I think it s important to point out the a few of the harshest realities of how the markets work right up front so you know what s at stake when your hard earned money is at risk in the live market it is the sole purpose of this book Ask yourself this question do I want to be the one who pays or do I want to be the one who gets paid
