Perseverative cognition is defined as the repetitive or sustained activation of cognitive representations of past stressful events or feared events in the future and even at non clinical levels it causes a fight or flight action tendency followed by a cascade of biological events starting in the brain and ending as peripheral stress responses In the past decade such persistent physiological activation has proven to impact individuals health potentially leading to somatic disease As such perseverative cognition has recently been proposed as the missing piece in the relationships between stress psychopathology and risk for health Perseverative cognition is indeed a hallmark of conditions such as anxiety and mood disorders that are at increased though still unexplained cardiovascular risk Although the pivotal role of ruminative and worrisome thoughts in determining the onset and maintenance of psychopathological disorders has been acknowledged for a long time its effects on the body via reciprocal influences between mental processes and the body s physiology have been neglected Moreover perseverative cognition is definitely not restricted to psychopathology it is extremely common and likely even omnipresent pervading daily life The objective of the Research Topic is to provide an interdisciplinary examination of cutting edge neuroscientific research on brain body signatures of perseverative cognition in both healthy and psychopathological individuals Despite the evident role of the brain in repetitive thinking and the assumption that our mind is embodied brain body pathways from perseverative cognition to health risk have remained largely unexplored

**Country Gentleman ,1862      The Cockleshell Raid** Ken Ford,2011-12-20 On the night of December 7 1942 five canoes were launched off the mouth of the Gironde river each containing a pair of British commandoes tasked with slipping into the port of Bordeaux and destroying as many of the merchant ships as possible Only two of the canoes made it to the target but it was enough Five enemy ships were badly damaged in the attack It then became a game of cat and mouse for the surviving commandoes in their attempt to get back to Britain Some of the men made it to Gibraltar others were caught and executed Author Ken Ford gives a blow by blow account

of one of the most daring raids of World War II which badly upset the flow of material into Germany and which gave the British public a much needed victory Flying against Fate S. P. MacKenzie, 2017-08-04 During World War II Allied casualty rates in the air were high Of the roughly 125 000 who served as aircrew with Bomber Command 59 423 were killed or missing and presumed killed a fatality rate of 45 5% With odds like that it would be no surprise if there were as few atheists in cockpits as there were in foxholes and indeed many airmen faced their dangerous missions with beliefs and rituals ranging from the traditional to the outlandish Military historian S P MacKenzie considers this phenomenon in Flying against Fate a pioneering study of the important role that superstition played in combat flier morale among the Allies in World War II Mining a wealth of documents as well as a trove of published and unpublished memoirs and diaries MacKenzie examines the myriad forms combat fliers superstitions assumed from jinxes to premonitions Most commonly airmen carried amulets or talismans lucky boots or a stuffed toy a coin whose year numbers added up to thirteen counterintuitively a boomerang Some performed rituals or avoided other acts e g having a photo taken before a flight Whatever seemed to work was worth sticking with and a heightened risk often meant an upsurge in superstitious thought and behavior MacKenzie delves into behavior analysis studies to help explain the psychology behind much of the behavior he documents not slighting the large cohort of crew members and commanders who demurred He also looks into the ways in which superstitious behavior was tolerated or even encouraged by those in command who saw it as a means of buttressing morale The first in depth exploration of just how varied and deeply felt superstitious beliefs were to tens of thousands of combat fliers Flying against Fate expands our understanding of a major aspect of the psychology of war in the air and of World War II **Lemon-Aid New and Used Cars and Trucks 2007-2017** Phil Edmonston, 2017-03-11 Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car and truck book on the market Dr Phil along with George Iny and the Editors of the Automobile Protection Association pull no punches *The Illustrated London News*, 1876 Machines of the Mind Katharine Breen, 2021-05-17 Katharine Breen challenges our understanding of how medieval authors received philosophical paradigms from antiquity in their construction and use of personification in their writings She shows that our modern categories for this literary device extreme realism versus extreme rhetoric or novelistic versus allegorical characters would ve been unrecognizable to their medieval practitioners Through new readings of key authors and works including Prudentius s *Psychomachia* Langland s *Piers Plowman* Boethius s *Consolation of Philosophy* and Deguileville s *Pilgrimage of Human Life* she finds that medieval writers accessed a richer more fluid literary domain than modern critics have allowed Breen identifies three different types of personification Platonic Aristotelian and Prudentian inherited from antiquity that both gave medieval writers a surprisingly varied spectrum with which to paint their characters while bypassing the modern confusion of conflicting relationships between personifications and persons on the path connecting divine power and human frailty Recalling Gregory the Great s phrase *machinae mentis* machines of the mind Breen demonstrates that medieval writers

applied personification with utility and subtlety much the same way that within the category of hand tools an open end wrench differs in function from a hex key wrench or a socket wrench It will be read by medievalists working at the crossroads of religion philosophy and literature as well as scholars interested in character making and gendered relationships among characters readers and texts beyond the Middle Ages
