Intelligent Tutoring Systems for Foreign Language Learning Merryanna L. Swartz, Masoud Yazdani, 2012-12-06 Multilingual communication within the world community is important for economic political and cultural interactions In a global environment where other languages are increasing in importance in addition to recognized international standards i e English and French language learning is becoming more important for improved international relations At the same time recent advances in instructional technology make the promise of building intelligent tutoring systems in advanced technology laboratories to teach these language skills a reality in the near future These tutoring systems therefore may help us foster improved methods for acquiring languages As active language learners and instructional technology researchers we felt an international meeting with similar individuals was needed to discuss how

such advanced tutoring systems are to be designed and implemented We held such a meeting the results of which are presented in this volume The purpose of this Advanced Workshop sponsored by the NATO Scientific Affairs Division was to bring together a multidisciplinary group of researchers who were active in the development of intelligent tutoring systems for foreign language learning Participants came from computer science computational linguistics psychology and foreign language learning Washington D C was selected for the Workshop site since it is Merryanna s home city the capitol of the United States and an international multilingual community in its own right Masoud agreed to the location with a promise to be shown the White House and graciously volunteered to coordinate activities from the European side
