issues of blockchain technology adoption and development on China's own terms is critical if policy makers and others are to make effective sense of one of the key dynamics shaping the next few decades of the global landscape. The work challenges the trust trope that dominates much discussion of blockchain technology's application. It argues contrary to the predominant trust trope that blockchain is not about trust at all. It shows that China's reimagining of the 21st century global order is premised on driving intensified cross border economic interactions without the presupposition of trust and blockchain technology makes that possible. It also explores the paradox of technological decentralisation being taken up with vigour by a centralist polity, the role of blockchain technology as a critical condition of existence for the successful globalisation of China's digital currency initiative and the need to devise governance institutions that are multilateral in nature to reflect the multi polar nature of decentralised information systems with domestic and cross border permutations. This book is of significant interest to readers of political economy, public policy, blockchain technology and Chinese studies. **Resources in**

Education, 2001-04 [Policing the Global South](#) Danielle Watson, Sara N. Amin, Wendell C. Wallace, Oluwagbenga (Michael) Akinlabi, Juan Carlos Ruiz-Vásquez, 2022-11-11 Policing the Global South provides scholarship which further transnationalises and democratises ideas about policing practices and philosophies, highlighting renovations in approaches to policing studies and injecting innovative perspectives into the study of policing from scholars positioned on the periphery. Criminological knowledge depolarisation underscores a conscious effort by scholars from the Global South to increase intellectual knowledge focused on developing context specific responses to issues not aligned to Northern ideological positions and specific to the non Northern context. Such shifts draw attention to the expanse of spaces beyond Northern centres rife with challenges unlike any specific to those experienced or conceptualised by scholars from the Global North with an applied Northern criminological lens. Applying a postcolonial lens to empirical knowledge from country specific cases in former colonies in Africa, Asia, the Caribbean, the Pacific and Latin America, this book examines how policing issues not aligned to Northern ideological positions and specific to non Northern contexts are addressed. The primary purpose is to share innovations in the field of policing, service provision, threats to security, crime responses, justice and international trends developed in postcolonial developing country contexts. Given the aim of the book and the contributors' own research on issues of policing across the globe, it discusses themes including but not limited to the colonial legacies and their impact on policing, how plural regulatory systems and partnerships are navigated by the police, the linkages between access to justice, community perceptions and police legitimacy, innovations and challenges in organisational reform, crime prevention and community partnerships and the expanding roles of police organisations in the Global South. While each chapter presents a policing issue in a country within a specific part of the Global South, the book highlights how important it is to frame responses based on contextual realities informed by an awareness of the past and present with a goal of informing the future. Delivering a much needed introduction to those specialising in policing in developing countries, this book is invaluable.
