International Business Shad Morris, James Oldroyd, 2020-07-21 Leveraging their extensive background at multi-national corporations, co-authors Shad Morris and James Oldroyd created an International Business course that is current, concise, and easy to implement. As instructors themselves, the authors focused on engaging pedagogy that prepares students for the global marketplace and created interactive resources to deepen the learning experience. This second edition of International Business includes extensive updates including coverage on important topics like COVID-19, Brexit, and the US-China trade war. Additionally, the WileyPLUS course provides just-in-time resources like chapter introductory videos, whiteboard animations, cases, case application problems, adaptive practice, and more to help students apply their learning and think critically.

Electric Vehicles Joao Vitor Fernandes Serra, 2013-03-01 Modern electric vehicles (EVs) are well suited to most people's general transport needs. Despite this, their adoption at a large scale has been grindingly slow. What are the reasons for this? Unlike most books which focus on the technical aspects of EV performance, this guide sets out the commercial and political barriers to their increased use and lays out the ways in which these barriers can be overcome. It

begins by charting the rise of the internal combustion engine and detailing the problems associated with it which are driving efforts to electrify transportation. It goes on to introduce readers to the main EV technologies and examines the key issue of energy storage and recharging infrastructure. The remaining chapters explore the cost effectiveness of electric mobility, the differing adoption trajectories by which EVs may come to increase in prominence and the way in which policy can be tailored to encourage this rise. The book covers industrialized and emerging economy contexts, the latter of which have the greatest opportunities and most urgent need to take the EV development route. Requiring no specialist engineering knowledge to understand and written in an engaging accessible style, this is a valuable primer and resource for people in business policy or study who are keen to understand, encourage and capitalize on the transition to electric mobility. Green Alternatives and National Energy Strategy Philip G. Gallman, 2011-10-01. It is no secret that the United States' dependence on oil, mostly foreign, puts the country in a precarious position. The United States needs innovative ways not only to power millions of automobiles on its highways but also to secure sustainable sources of fuel for the future. This book presents the latest facts and figures about alternative energy to any physicist, engineer, policymaker or concerned citizen who needs a reliable source of information on the nation's looming energy crisis. Philip G. Gallman focuses especially on green vehicles and the interrelationship between their design and various energy sources. He explains simply and clearly the complex energy and automotive engineering issues involved in developing green vehicles, measures their likely effect on energy resource demand and considers what they might mean for national energy strategy. Addressing problems associated with renewable resources often overlooked or ignored in the popular press, Gallman explains what replacing oil with alternative sources of energy realistically entails. Can the nation satisfy its energy demands with wind turbines, solar power, hydroelectric power or geothermal power? Is biodiesel or electricity the answer to our gas-guzzling ways? Organized logically and with an accessible narrative, Green Alternatives and National Energy Strategy guides readers through the essential questions and hurdles the United States must answer and overcome to transition from a petroleum-dependent nation to one that runs on sustainable renewable energy. Driven to Succeed Rod McQueen, Susan M. Papp, 2012-10-20. Hungarian-born Frank Hasenfratz fled his native land in 1956 after the revolution to free his nation from Soviet domination failed. He eventually settled in Guelph, Ontario, where he founded Linamar, now the second largest maker of auto parts in Canada. This is Frank's story as well as that of the company he created. Python Programming Fundamentals Kent D. Lee, 2015-01-07. This easy-to-follow and classroom-tested textbook guides the reader through the fundamentals of programming with Python, an accessible language which can be learned incrementally. Features include numerous examples and practice exercises throughout the text, with additional exercises, solutions and review questions at the end of each chapter. Highlights the patterns which frequently appear when writing programs, reinforcing the application of these patterns for problem solving through practice exercises. Introduces the use of a debugger tool to inspect a program, enabling students to discover for themselves how programs work and enhance

their understanding presents the Tkinter framework for building graphical user interface applications and event driven programs provides instructional videos and additional information for students as well as support materials for instructors at an associated website
