Earths **Terry Pratchett's Ethical Worlds** Kristin Noone, Emily Lavin Leveret, 2020-08-05 Terry Pratchett's writing celebrates the possibilities opened up by inventiveness and imagination. It constructs an ethical stance that values informed and self-aware choices, knowledge of the world in which one makes those choices, the importance of play and humor in crafting a compassionate worldview, and acts of continuous self-examination and creation. This collection of essays uses inventiveness and creation as a thematic core to combine normally disparate themes such as science fiction, studies of the effect of collaborative writing and shared authorship, steampunk aesthetics, productive modes of ownership, intertextuality, neomedievalism, and colonialism, adaptations into other media, linguistics and rhetorics, and coming of age as an act of free will. [The Medusa Chronicles](#) Stephen Baxter, Alastair Reynolds, 2017-08-08 A sequel to Sir Arthur C. Clarke's Nebula Award-winning novella *A Meeting with Medusa*, this novel continues the thrilling adventure of astronaut Howard Falcon, humanity's first explorer of Jupiter, from two modern science fiction masters. Howard Falcon almost lost his life in an accident as the first human astronaut to explore the atmosphere of Jupiter, and a combination of human ingenuity and technical expertise brought him back. But he is no longer himself. Instead, he has been changed into an augmented human, part man, part machine, and exceptionally capable. With permission from the Clarke Estate, Stephen Baxter and Alastair Reynolds continue this beloved writer's enduring vision and have created a fresh story for new readers. *The Medusa Chronicles* charts Falcon's journey through the centuries granted by his new body, but always back to the mysteries of Jupiter and the changing interaction between humanity and the universe. A compelling read full of incredible action right from the beginning, this is a modern classic in the spirit of *2001* and *The Martian*. **Research and Advanced Technology for Digital Libraries** Jaap Kamps, Giannis Tsakonas, Yannis Manolopoulos, Lazaros Iliadis, Ioannis Karydis, 2017-09-04 This book constitutes the proceedings of the 21st International Conference on Theory and Practice of Digital Libraries (TPDL 2017) held in Thessaloniki, Greece, in September 2017. The 39 full papers, 11 short papers, and 10 poster papers presented in this volume were carefully reviewed and selected from 106 submissions. In addition, the book contains 7 doctoral consortium papers. The contributions are organized in topical sections named: linked data, corpora, data in digital libraries, quality in digital libraries, digital humanities, entities, scholarly communication, sentiment analysis, information behavior, information retrieval. Nearly six decades after *Step Day* and in the *Long Earth* the new Next post-human society continues to evolve. Alone and facing death, his only hope of salvation lies with a group of trolls. But as Joshua confronts his mortality, the *Long Earth* receives a signal from the stars. A signal that is picked up by radio astronomers but also in more abstract ways by the trolls and by the Great Traversers. Its message is simple but its
