

Major praise for Richard Rhodes' *The Making of the Atomic Bomb*:

"A gripping, intellectual adventure, and a clear, balanced and indisputable history of events on which our future depends. From Einstein describing his intellectual development as 'intended' to Edward Teller saying, 'world government now or else, here for survival,' the book is surprising and revealing."

—Carl Sagan

"Rhodes' *The Making of the Atomic Bomb* is the best, the richest, and the deepest description of the development of physics in the first half of this century that I have written, and it is certain to remain so."

—Isaac Asimov

"Mr. Rhodes has given a convincing picture of an era and provided lucid explanations of the science and technology behind the creation of the atomic bomb. Moreover, he has brought a high level of fascinating characters to life on the page. The long, rich book is filled with suspense. It is a comprehensive history of the bomb, and it is also a work of literature."

—Tacy Kiddier

"... what most deeply impressed me with the author's knowledge of much of the history of the era was not just his development of nuclear energy and nuclear bombs, and the personalities which contributed to the U.S. to the development of them. I was particularly impressed by his evaluation of the importance of the Soviet contribution, which are almost always underestimated but which he fully explains and perhaps over-exaggerates. I hope the book will find a wide readership."

—Eugene P. Wigner,
Nobel Laureate for Physics, 1952

"Rhodes' *The Making of the Atomic Bomb* will excite, inform and awe the layman in the scientific community on the subject. It is fascinating as a novel, and I have learned from it many things I did not know. Mr. Rhodes has done his homework—carefully and intelligently."

—Charles Serph,
Nobel Laureate for Physics, 1959

"This is the best book I have ever read on the atomic bomb, and I shall use these words as a motto."

—John W. Almon,
Nobel Laureate for Physics, 1954

Mariner,G. Kurt Piehler,2009 Drawing on the latest research on the atomic bomb and its history the contributors to this provocative collection of eighteen essays set out to answer two key questions First how did the atomic bomb a product of unprecedented technological innovation rapid industrial scale manufacturing and unparalleled military deployment shape U S foreign policy the communities of workers who produced it and society as a whole And second how has American society s perception that the the bomb is a means of military deterrence in the Cold War era evolve under the influence of mass media scientists public intellectuals and even the entertainment industry In answering these questions *The Atomic Bomb and American Society* sheds light on the collaboration of science and the military in creating the bomb the role of women working at Los Alamos the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness the revolutionary change in military strategy following the invention of the bomb and the development of Cold War ideology the image of the bomb that was conveyed in the popular media and the connection of the bomb to the commemoration of World War II As it illuminates the cultural social political environmental and historical effects of the creation of the atomic bomb this volume contributes to

our understanding of how democratic institutions can coexist with a technology that affects everyone even if only a few are empowered to manage it Rosemary B Mariner is formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College She is currently a lecturer in history at the University of Tennessee Knoxville G Kurt Piehler is associate professor of history and former director of the Center for the Study of War and Society at the University of Tennessee Knoxville which hosted the conference that formed the basis of this volume He is the author of *Remembering War the American Way and World War II in the American Soldiers Lives Series* as well as the coeditor with John Whiteclay Chambers II of *Major Problems in American Military History* **The Oxford Handbook of World War II** G. Kurt Piehler, Jonathan A. Grant, 2023 World War II dramatically transformed human life and society resulting in the deaths of 100 million people and shaping the worldview and psyches of generations The Oxford Handbook of World War II broadens traditional narratives of the war and in the process changes our understanding of this epic conflict Spanning the rise and fall of the Versailles system to the postwar reintegration of veterans and the eventual commemoration of the conflict and its victims The Oxford Handbook of World War II marks a landmark contribution to the historical literature of war *Weapons of Mass Destruction* Britannica Educational Publishing, 2011-11-01 With their potential to wreak massive or total devastation nuclear chemical and biological weapons have dramatically escalated the stakes of war As stockpiles of such weapons continue to grow around the world especially in the years since the Second World War countries have recognized the need to check their powers This detailed volume examines various weapons of mass destruction and the science behind them their effects on conflict and the various arms control treaties and agreements that have been introduced to help curb the possibility of overwhelming loss *Minutes to Midnight* Paul Dukes, 2011 The book examines the evolution of the predicament symbolised by the setting of the Doomsday Clock at a few minutes to midnight in the context of the Anthropocene Era from 1763 making special reference to the study of history throughout the period It seeks to demonstrate the necessity for history as science while pointing out the inadequacy of some previous approaches It argues for a multidisciplinary approach to today's crisis *The Nuclear Non-Proliferation Regime* Raju G.C. Thomas, 2016-07-27 Leading international security scholars and policy advisors from universities think tanks and nuclear weapons laboratories in the United States analyze the future of nuclear weapons proliferation In April 1995 the earlier 1970 Nuclear Non Proliferation Treaty was renewed indefinitely and without change to the original clauses of the treaty The authors examine the continuing relevance or irrelevance of the old treaty the role of coercive sanctions in enforcing restraint and the impact of biological chemical and missile proliferation on the nuclear motives and ambitions of various states Attention is given to proliferation conditions in the former Soviet republics East and South Asia and the Middle East *Dark Star* Matthew H. Hersch, 2023-12-26 A captivating history of NASA's Space Transportation System the space shuttle chronicling the inevitable failures of a doomed design In *Dark Star* Matthew Hersch challenges the existing narrative of the most significant human

space program of the last 50 years NASA's space shuttle He begins with the origins of the space shuttle a century long effort to develop a low cost reusable rocket powered airplane to militarize and commercialize space travel which Hersch explains was built the wrong way at the wrong time and for all the wrong reasons Describing the unique circumstances that led to the space shuttle's creation by President Richard Nixon's administration in 1972 and its subsequent flights from 1981 through 2011 Hersch illustrates how the space shuttle was doomed from the start While most historians have accepted the view that the space shuttle's fatal accidents including the 1986 Challenger explosion resulted from deficiencies in NASA's management culture that lulled engineers into a false confidence in the craft Dark Star reveals the widespread understanding that the shuttle was predestined for failure as a technology demonstrator The vehicle was intended only to give the United States the appearance of a viable human spaceflight program until funds became available to eliminate its obvious flaws Hersch's work seeks to answer the perilous questions of technological choice that confront every generation and it is a critical read for anyone interested in how we can create a better world through the things we build
