Organs of the Digestive System

Function of the Digestive System
The digestive system is responsible for taking the nutrients and sugar out of the food when you eat it and gives the nutrient and sugar to the rest of your body.

How the Digestive System works

It starts in your mouth the saliva moist the food and your teeth crunch the food. The food goes through the esophagus into your stomach. Your stomach turns the food into this thick liquid. The thick liquid that was once food goes through the small intestine. The liquid is going through the small intestine and it breaks down to sugar and nutrients. The nutrients go through the intestine

Circulatory System

Organs of the Circulatory System

Function of the Circulatory System
The function of the circulatory system is that it is responsible for moving blood through the body. It transports nutrients and oxygen through the body. The system removes waste and carbon dioxide. It makes the temperature and pH regular to protect the body from diseases.

How the Circulatory System works

This is how the circulatory system works. It delivers the nutrients and oxygen to all the body. It needs the heart to pump blood vessels to

Respiratory System

Organs of the Respiratory System

Function of the Respiratory System
The function of the respiratory system is for taking in oxygen and expelling

How the Respiratory System works
The respiratory system works by people the lungs inflate and the rib cage expands because the rib cage expands in the lungs release the carbon dioxide gets rid of it because the blood oxygen and picks up the blood cells bring back the lungs and then when the carbon dioxide get out of your body repeats over and

Excretory System

Organs of the Excretory System

Function of the Excretory System
The function of the excretory system makes the waste into urine because the cells produce waste.

How the Excretory System works

The excretory system works by cells reproduce waste. The waste is now in the blood stream. The waste get removed by your kidneys. Kidneys are like filters. The waste in the kidneys convert it to urine. The urine goes to the bladder and during urination the waste leaves the body. The the system repeats over and over again.

Body Systems Lessons Kindergarten:

Teaching Literacy in Kindergarten Lea M. McGee, Lesley Mandel Morrow, 2005-05-05 Kindergarten is a time for playful and enriching learning activities that support children's literacy emergence while enhancing their social and cognitive development. The routines of a busy engaged productive kindergarten classroom are vividly brought to life in this information-packed book. Demonstrated are whole class and small group strategies for helping children acquire concepts about print and the alphabet, build phonological and phonemic awareness, learn to read sight words, develop their listening comprehension and writing abilities, and much more. *Teaching Health Science* Stephen J. Bender, 1997 Since the last edition of *Teaching Elementary Health Science* much has changed in health education. This edition contains the most recent information regarding education and health and the National Health Education Standards. Part 1 of this text covers health science foundations including the relationship between education and health, the meaning of comprehensive school health, curricular approaches, learning strategies, and instructional accountability. Part 2 covers content strategies and skills. This text is a beneficial tool for elementary and middle school teachers and students of elementary middle school health education.

Creating Teacher Immediacy in Online Learning Environments D'Agustino, Steven, 2016-03-31 Educators are finding that communication and interaction are at the core of a successful web-based classroom. This interactivity fosters community which contributes to effective and meaningful learning. Positive online communities and the communication therein encourage students to interact with others' views which not only grows one's empathy but is an integral part of constructivist learning theories. Because of this, the most important role of an educator in an online class is one that ensures student interactivity and engagement. *Creating Teacher Immediacy in Online Learning Environments* addresses the most effective models and strategies for nurturing teacher immediacy in web-based and virtual learning environments. A number of innovative methods for building an authentic personalized online learning experience are outlined and discussed at length within this publication, providing solutions for pre-service as well as in-service educators. This book is a valuable compilation of research for course designers, faculty, students of education administration, software designers, and higher education researchers. *Resources for Teaching Elementary School Science* National Science Resources Center of the National Academy of Sciences and the Smithsonian Institution, 1996-04-28 What activities might a teacher use to help children explore the life cycle of butterflies? What does a science teacher need to conduct a leaf safari for students? Where can children safely enjoy hands-on experience with life in an estuary? Selecting resources to teach elementary school science can be confusing and difficult, but few decisions have greater impact on the effectiveness of science teaching. Educators will find a wealth of information and expert guidance to meet this need in *Resources for Teaching Elementary School Science*. A completely revised edition of the best-selling resource guide *Science for Children*, *Resources for Teachers*, this new book is an annotated guide to hands-on, inquiry-centered curriculum materials and sources of help in teaching science from kindergarten through

sixth grade Companion volumes for middle and high school are planned The guide annotates about 350 curriculum packages describing the activities involved and what students learn Each annotation lists recommended grade levels accompanying materials and kits or suggested equipment and ordering information These 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to Ask questions and find their own answers Experiment productively Develop patience persistence and confidence in their own ability to solve real problems The entries in the curriculum section are grouped by scientific area Life Science Earth Science Physical Science and Multidisciplinary and Applied Science and by type core materials supplementary materials and science activity books Additionally a section of references for teachers provides annotated listings of books about science and teaching directories and guides to science trade books and magazines that will help teachers enhance their students science education Resources for Teaching Elementary School Science also lists by region and state about 600 science centers museums and zoos where teachers can take students for interactive science experiences Annotations highlight almost 300 facilities that make significant efforts to help teachers Another section describes more than 100 organizations from which teachers can obtain more resources And a section on publishers and suppliers give names and addresses of sources for materials The guide will be invaluable to teachers principals administrators teacher trainers science curriculum specialists and advocates of hands on science teaching and it will be of interest to parent teacher organizations and parents
