discussion of many non essential variations and technical details of the models *The Methodology of Economic Model Building (Routledge Revivals)* Lawrence A. Boland,2014-05-01 The major methodological task for modern economists has been to establish the testability of models Too often however methodological assumptions can make a model virtually impossible to test even under ideal conditions yet few theorists have examined the requirements and problems of assuring testability in economics In *The Methodology of Economic Model Building* first published in 1989 Lawrence Boland presents the results of a research project that spanned more than twenty years He examines how economists have applied the philosophy of Karl Popper relating methodological debates about falsifiability to wider discussions about the truth status of models in natural and social sciences He concludes that model building in economics reflects more the methodological prescriptions of the economist Paul Samuelson than Popper s falsificationism This title will prove invaluable to both students and researchers and represents a substantial contribution to debates about the scientific status of economics **Modeling at Any Age** Ro Martinez,2010-12 **Positive Aging and Precarity** Irina Catrinel Crăciun,2019-05-10 This book explores positive aging through the lens of precarity aiming to ground positive aging theories in current social contexts In recent years research on aging has been branded by growing disagreements between supporters of the successful aging model and critical gerontologists who highlight the widening inequalities disadvantages and precarity that characterize old age This book comes to fill a gap in knowledge by offering an alternative view on positive aging informed by precarity and its impact on projections concerning aging The first part of the book places aging in broader theoretical and empirical context exploring the complex links between views on aging successful aging theories policy and social reality The second part uses results from a qualitative research conducted in Germany to illustrate the dissonance between successful aging ideals and both negative and positive views on aging as well as aging preparation strategies inspired by precarity Findings from this section provide a solid starting point for comparisons with countries that are both similar and different from Germany in terms of welfare regimes and aging policies The final part of the book discusses the psychological implications of these findings within and beyond the German case study and outlines potential solutions for practice This book provides health psychologists gerontologists sociologists social workers health professionals as well as students and aging individuals themselves with better understanding of the meaning of aging in precarious times and builds confidence about aging well despite precarity
