Forman, Norris Minick, C. Addison Stone, 1996 This work presents

landmark research concerning the vital dynamics of childhood psychological development Its origin can be traced to the late 1970s when several psychologists began to challenge existing notions of cognitive development by suggesting that such functioning is bound to specific contexts and that cognitive development is based on the mastery of culturally defined ways of speaking thinking and acting About the same time several translations were made available in this country of the seminal work of Vygotsky the noted theoretician offering a conceptual base on which these workers could build This volume with contributions from many of the scholars who pioneered this area and translated the work of Vygotsky looks at the complex mechanisms by which children acquire the cultural and linguistic tools to carry out cognitive activities and explores the

implications of this research for education The book is organized around three main parts Discourse and Learning in Classroom Practice Interpersonal Relations in Formal and Informal Education and The Sociocultural Institutions of Formal and Informal Education An afterword by Jacqueline Goodnow suggests new directions for sociocultural research and education The intended audience is composed of developmental educational and cognitive psychologists along with advanced students in developmental and educational psychology

Interpersonal Argumentation in Educational and Professional Contexts Francesco Arcidiacono, Antonio Bova, 2017-07-11 This book provides a comprehensive overview of empirical studies based on various approaches devoted to examining the interpersonal argumentative processes involved in different contexts It also identifies context dependent similarities and differences in the ways in which argumentative interactions are managed by individuals in a range of educational and professional settings How can some forms of negotiation change and debate result from engaging in interpersonal processes during argumentation How do interpersonal dimensions affect the interdependencies between argumentative exchanges and construction of knowledge and skills The book clarifies these open questions by providing a discussion of theoretical and empirical issues at the forefront of research in order to provide a view of how interpersonal argumentation in educational and professional contexts is actually questioned and investigated It offers readers an opportunity to discover the crucial importance of an in depth understanding of the role and functions played by the interpersonal dynamics within argumentative interactions occurring in a wide range of educational and professional contexts

Vygotsky and Research Harry Daniels, 2008-08 Looking at L S Vygotsky s original thesis this book provides readers with an overview of the implications for research of the theoretical work and discusses Vygotsky s own approach to research methods Followed by an exploration of the research practices which have arisen in fields which have developed on the basis of the original thesis chapters provide accounts of specific studies which illustrate the underlying methodological principles and the specific methods which are being deployed The book closes with some proposals for future developments at both methodological and conceptual levels

The Silent Experiences of Young Bilingual Learners Caroline Bligh, 2014-09-11 Many teachers are increasingly concerned with how to best support the learning of the rising numbers of bilingual learners in schools particularly those children who are new to English and therefore cannot yet communicate with the teacher or their peers in their first language during the silent period This book offers an alternative insight to that which is most commonly available to teachers and researchers as instead of examining language acquisition purely from a linguistic approach it explores the learning that is occurring through a sociocultural lens and even more significantly from the young child s perspective the worm s eye view Investigated through the experiences of young bilingual learners allows the reader to make sense of the making meaning that occurs when the child cannot make sense of his her new world nor communicate verbally in the language of instruction in the classroom Remarkably learning through the silent period is revealed as both complex and messy as the bilingual child mediates his or her own learning through a synthesis of alternative learning

pathways The silent period is presented as a crucial time for learning distributed through a synthesis of close observation intense listening and most significantly copying the practices of others Throughout the silent period the children are not only seen to be learning but also contributing to the classroom practices The book not only initiates new understandings of second language learning but also offers creative ideas on how to raise the achievement of children who are learning English as an additional language

Cognitive Psychology In and Out of the Laboratory Kathleen M. Galotti, 2020 **New Directions for Situated Cognition in Mathematics Education** Anne Watson, Peter Winbourne, 2008-01-03 This book draws together a range of papers by experienced writers in mathematics education who have used the concept of situated cognition in their research within recent years No other books are available which take this view specifically in mathematics education Thus it provides an up to date overview of developments and applications to which other researchers can refer and which will inspire future research

Thinking Constructively About Science, Technology, and Society Education Dennis W. Cheek, 1992-07-01 This book defines STS science technology and society education and discusses current thinking about its conceptual evolution It synthesizes a broad range of research and thought in the history and philosophy of science and technology STS studies and education as they are informed by the the dual perspectives of cognitive and social psychology A model for STS curriculum development in science social studies or technology education is presented with well chosen examples The book includes an extensive and invaluable bibliography that will enable students teachers and researchers to explore the richness of this emerging field

Teacher Agency for Equity Raquel Ríos, 2017-07-06 This book provides educators with a conceptual framework to explore and develop authenticity and agency for equity In response to growing cynicism within the field of education Raquel Ríos argues that in order to become authentic agents of change teachers must take a stance of mindful inquiry and examine the role of a teacher within the broader socio political context By utilizing the six principles of Conscientious Engagement teachers can expand their awareness of the power of language and thought the complex nature of our professional relationships and how we channel energy in ways that can impede or strengthen our work for equity Full of real world stories and input from practitioners in the field this book helps teachers of all levels develop the skills and confidence to grapple with tough philosophical and ethical questions related to social justice and equity such as What is poverty consciousness and what responsibility do we owe students who come from poorer communities How does racist ideology impact our thinking and practice in education How can we tap into an evolutionary consciousness and collective purpose in order to transform how we advocate for equity How can we expand our professional network for the integration of new ideas How can teachers really make a difference that matters a difference that extends beyond the four walls of the classroom

Discourses on Professional Learning Christian Harteis, Andreas Rausch, Jürgen Seifried, 2014-06-30 This book analyses and elaborates on learning processes within work environments and explores professional learning It presents research indicating general characteristics of the work environment that support learning as well as barriers to workplace

learning Themes of professional development lifelong learning and business organisation emerge through the chapters and contributions explore theoretical and empirical analyses on the boundary between working and learning in various contexts and with various methodological approaches Readers will discover how current workplace learning approaches can emphasise the learning potential of the work environment and how workplaces can combine the application of competence that is working with its acquisition or learning Through these chapters we learn about the educational challenge to design workplaces as environments of rich learning potential without neglecting business demands Expert authors explore how learning and working are both to be considered as two common aspects of an individual's activity Complexity significance integrity and variety of assigned work tasks as well as scope of action interaction and feedback within its processing turn out to be crucial work characteristics amongst others revealed in these chapters Part of the Professional and Practice based Learning series this book will appeal to anyone with an interest in workplaces as learning environments those within government community or business agencies and within the research communities in education psychology sociology and business management will find it of great interest

Bilingual Children's Language and Literacy Development Roger Barnard, Ted Glynn, 2003-01-01 This book contains case studies relating the experience of bilingual children in various settings in New Zealand primary schools The contexts include a Maori bilingual school a Samoan bilingual unit and mainstream classrooms which cater for immigrant and deaf children Suggestions for educational policy teacher development and research are made

Understanding Teacher Expertise in Primary Science Anna Traianou, 2007-01-01 What does it mean to be an expert primary science practitioner How do primary teachers use science subject knowledge in their practice This book addresses these questions from a sociocultural perspective challenging currently influential constructivist accounts It treats the nature of teacher expertise as a dynamic capacity exemplified by those who are recognised as experts in their local communities of practice In line with this it provides an in depth case study of the perspective and practices of a primary science teacher who is locally and more widely recognised as an expert practitioner One of the conclusions is that primary science expertise is eclectic in character requiring the employment in a flexible way of a variety of forms of knowledge views of learning and teaching strategies in order to deal successfully with the contingent situations faced in the classroom The study of expertise in action is particularly important at a time when teaching is increasingly configured in terms of competencies and standards Its implications for the education of primary science practitioners are profound Students on education courses teachers and researchers will find this book of value for its careful exploration of arguments about the nature of knowledge and learning and how these are implicated in classroom practice
