Jefferis, 2008. Learn the basic skills needed to draw detail and design residential structures using standard construction practices involving wood, engineered materials, steel, concrete, and concrete block, as well as using green construction practices. CAD techniques based on the 2006 International Building Code are at the heart of this book that teaches methods to complete all the drawings needed to obtain a residential building permit. A host of real world problems expose readers to a variety of drafting experiences and require them to go through the same thought processes that a professional CAD technician faces daily, including view layout, dimension placement, section placement, and more. *Architecture* Clois E
