Architectures of Colonialism Vera Egbers, Christa Kamleithner, Özge Sezer, Alexandra Skedzuhn-Safir, 2024-06-04 The question of what heritage is and how we deal with it is not a neutral one

Recent events such as the Black Lives Matter movement and the toppling of monuments have made evident how much the colonial past is inscribed in our built environment at the same time colonialism continues to affect memorialization and historiography. Hence those involved in architectural history are challenged to re-consider their positionality. Whose heritage are colonial sites? Which possibly silenced memories are attached to them? How are archives and material evidence reassessed to bring forward the stories of marginalized subjects? Following the call for decolonization, this volume explores historical methodologies and shows the entanglement of narratives at architectural sites, bringing together archaeology, architectural history, and heritage studies. A contribution to the current debate on decolonization and memorialization. Interdisciplinary perspectives on architecture and heritage. International range of authors. Proceedings of the 4th Biennial of Architectural and Urban Restoration. Host of the Itinerant Congress Hidden Cultural Heritage: Under Water, Under Ground and Within Buildings, 2018-09-02. The Biennial of Architectural and Urban Restoration is composed by a series of cultural events like seminars, shows, art exhibitions, projections of documentaries, debates, visits, all open and also aimed to the public. The purpose of these activities is to bring out the architectural and urban local heritage and raise public awareness to its protection, creating an international forum of discussion between countries with similar problems but various economic and socio-political situations.

Political Plasticity Fathali M. Moghaddam, 2023-01-05. Political plasticity refers to limitations on how fast, how much, and in what ways political behavior does or does not change. In a number of important areas of behavior such as leader-follower relations, ethnicity, religion, and the rich-poor divide, there has been long-term continuity of human behavior. These continuities are little impacted by factors assumed to bring about change, such as electronic technologies, major wars, globalization, and revolutions. In addition to such areas of low political plasticity, areas of high political plasticity are considered. For example, women in education is discussed to illustrate how rapid societal change can be achieved. This book explains the psychological and social mechanisms that limit political plasticity and shape the possibility of changes in both democratic and dictatorial countries. Students, teachers, and anyone interested in political behavior and social psychology will benefit from this volume. Buildings of Refuge and the Postcoloniality of Asylum Infrastructure Paolo Novak, 2025-06-18. This book offers a fresh perspective on the European migration crisis, chronicling its everyday realities in a central Italian province. Through vivid ethnographic accounts, it reveals how the forces and relations animating this crisis are reproduced and transformed in the rooms of ordinary buildings converted into shelters for asylum seekers. Drawing on postcolonial and feminist approaches, the author explores the intersection of global and local histories, migrant stories, and bordering processes, providing a timely lens for understanding migration today. This is an invaluable contribution to debates on EU borders, including their logistical management, their coloniality, and the autonomous force of migration that subverts them.
