The Invisibility Bargain Jeffrey D. Pugh, 2021 Migrants fleeing economic hardship or violence are entitled to a range of protections and rights under domestic and international law yet they are often denied such protections in practice In an era of mass migration and restrictive responses migrant acceptance is often contingent on the expectation that they contribute economically to the host country while remaining politically and socially invisible These unwritten expectations which Jeffrey D Pugh calls the invisibility bargain produce a precarious status in which migrants visible differences or overt political demands on the state may be met with hostile backlash from the host society In this context governance networks of state and non state actors form an institutional web that can provide indirect access to rights resources and protection but simultaneously help migrants avoid negative backlash against visible political activism The Invisibility Bargain seeks to understand how migrants negotiate their place in receiving societies and adapt innovative strategies to integrate participate and access protection Specifically the book examines Ecuador the largest recipient of refugees in Latin America and assesses how it achieved migrant human security gains despite weak state presence in peripheral areas Pugh deploys evidence from 15 months of fieldwork spanning ten years in Ecuador including 170 interviews an original survey of Colombian migrants in

six provinces network analysis and discourse analysis of hundreds of presidential speeches and news media articles He argues that localities with more dense networks composed of more diverse actors tend to produce greater human security for migrants and their neighbors The book challenges the conventional understanding of migration and security providing a new approach to the negotiation of authority between state and society By examining the informal pathways to human security Pugh dismantles the false dichotomy between international and national politics and exposes the micro politics of institutional innovation
