*Selling Tradition* Jane S. Becker, 2000-11-09 The first half of the twentieth century witnessed a growing interest in America's folk heritage as Americans began to enthusiastically collect, present, market, and consume the nation's folk traditions Examining one of this century's most prominent folk revivals, the reemergence of Southern Appalachian handicraft traditions in the 1930s, Jane Becker unravels the cultural politics that bound together a complex network of producers, reformers, government officials, industries, museums, urban markets, and consumers, all of whom helped to redefine Appalachian craft production in the context of a national cultural identity Becker uses this craft revival as a way of exploring the construction of the cultural categories folk and tradition She also addresses the consequences such labels have had on the people to whom they have been assigned Though the revival of domestic arts in the Southern Appalachians reflected an attempt to aid the people of an impoverished region, she says, as well as a desire to recapture an important part of the nation's folk heritage, in reality the new craft production owed less to tradition than to middle-class tastes and consumer culture forces that obscured the techniques used by mountain laborers and the conditions in which they worked **Folk Stories**

**Shirley Jackson, Influences and Confluences** Melanie R. Anderson, Lisa Kröger, 2016-05-20 The popularity of such widely known works as *The Lottery* and *The Haunting of Hill House* has tended to obscure the extent of Shirley Jackson's literary output which includes six novels a prodigious number of short stories and two volumes of domestic sketches Organized around the themes of influence and intertextuality this collection places Jackson firmly within the literary cohort of the 1950s The contributors investigate the work that informed her own fiction and discuss how Jackson inspired writers of literature and film The collection begins with essays

that tease out what Jackson's writing owes to the weird tale detective fiction the supernatural tradition and folklore among other influences The focus then shifts to Jackson's place in American literature and the impact of her work on women's writing campus literature and the graphic novelist Alison Bechdel The final two essays examine adaptations of *The Haunting of Hill House* and Jackson's influence on contemporary American horror cinema Taken together the essays offer convincing evidence that half a century following her death readers and writers alike are still finding value in Jackson's words

*Rhetoric in American Anthropology* Carine Risa Applegarth, 2014-05-30 In the early twentieth century the field of anthropology transformed itself from the welcoming science uniquely open to women people of color and amateurs into a professional science of culture The new field grew in rigor and prestige but excluded practitioners and methods that no longer fit a narrow standard of scientific legitimacy In *Rhetoric in American Anthropology* Risa Applegarth traces the rhetorical archeology of this transformation in the writings of early women anthropologists Applegarth examines the crucial role of ethnographic genres in determining scientific status and recovers the work of marginalized anthropologists who developed alternative forms of scientific writing Applegarth analyzes scores of ethnographic monographs to demonstrate how early anthropologists intensified the constraints of genre to define their community and limit the aims and methods of their science But in the 1920s and 1930s professional researchers sidelined by the academy persisted in challenging the field's boundaries developing unique rhetorical practices and experimenting with alternative genres that in turn greatly expanded the epistemology of the field Applegarth demonstrates how these writers' folklore collections ethnographic novels and autobiographies of fieldwork experiences reopened debates over how scientific knowledge was made through what human relationships by what bodies and for what ends Linking early anthropologists' ethnographic strategies to contemporary theories of rhetoric and composition *Rhetoric in American Anthropology* provides a fascinating account of the emergence of a new discipline and reveals powerful intersections among gender genre and science

**Performance** John Miles Foley, 1995 Building on his work in *Traditional Oral Epic* and *Immanent Art* the author aims to dissolve the perceived barrier between oral and written creating a theory from oral formulaic theory and the ethnography of speaking and ethnopoetics He argues that a work's word power derives from its performance and its implied traditional context

**The Culture Concept** Michael A. Elliott, 2002 Culture is a term we commonly use to explain the differences in our ways of living In this book Michael A. Elliott returns to the moment this usage was first articulated tracing the concept of culture to the writings folktales dialect literature local color sketches and ethnographies that provided its intellectual underpinnings in turn of the century America The Culture Concept explains how this now familiar definition of culture emerged during the late nineteenth century through the intersection of two separate endeavors that shared a commitment to recording group-based difference American literary realism and scientific ethnography Elliott looks at early works of cultural studies as diverse as the conjure tales of Charles Chesnut's *The Ghost Dance* ethnography of James Mooney and the prose

narrative of the Omaha anthropologist turned author Francis La Flesche His reading of these works which struggle to find appropriate theoretical and textual tools for articulating a less chauvinistic understanding of human difference is at once a recovery of a lost connection between American literary realism and ethnography and a productive inquiry into the usefulness of the culture concept as a critical tool in our time and times to come
