Dryden's Second Hundred Years Elizabeth Gutchess, 2006-11 Dryden's Second Hundred Years Part I chronicles life in a small farming village in Central New York during the first half of the twentieth century But along with a close reading of the local scene its telephones roads real and rumored milk strikes and letters back home from the trenches of two wars this narrative has a wide arc and rich texture author Elizabeth Denver Gutchess dovetails local history with national and international events which shaped and countered it as she explores connections and disconnections between this small community and the world at large Essentially in fact Dryden's Second Hundred Years records a transformation of place as Dryden's tightly woven social fabric slowly unraveled during the century while ever lengthening strands of road and

cable reached farther and farther beyond this small hill rimmed valley weaving ever wider and more life enhancing communities for the people who live here At a time when the process of globalization outweighs all things local however it is important to keep balance The global village as many have warned will be enriched not by neglecting the local but by taking care of it One way to do that is simply to know and understand the local past Like the body of fine work already produced by Dryden historians and by local historians everywhere this book might help us do that **Narrative and Critical History of America: Spanish explorations and settlements in America from the fifteenth to the seventeenth century. Play Among Books Miro Roman,Alice _ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice _ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science *Narrative and Critical History of America Edited by Justin Winsor ,1889 Talking Book Topics ,1986-07 *The Politics of Big Fantasy* John C. McDowell,2014-06-04 Bringing critical attention to a particular set of science fiction and fantasy films Larry and Andy Wachowski s The Matrix George Lucas Star Wars saga and Joss Whedon s Avengers this book utilizes a wide ranging set of critical tools to illuminate their political ideologies while also examining any resistant and complicating turns or byways the films may provide What they all have in common ideologically is that they or at least the genres they belong to tend to be regarded as belonging to politically conservative frames of sociocultural reference With the Star Wars saga however this idea is shown to be superficial and weak*
