American Blood A Novel:

American Blood Holly Jackson, 2014 The conventional view of the family in the nineteenth century novel holds that it venerated the traditional domestic unit as a model of national belonging Contesting this interpretation *American Blood* argues that many authors of the period challenged preconceptions of the family and portrayed it as a detriment to true democracy and by extension the political enterprise of the United States Relying on works by Harriet Beecher Stowe Nathaniel Hawthorne William Wells Brown Pauline Hopkins and others Holly Jackson reveals family portraits that are claustrophobic antidemocratic and even unnatural The novels examined here welcome in Jackson's reading the decline of the family and the exclusionary white privileging American social order that it supported Embracing and imagining this decline the novels examined here incorporate and celebrate the very practices that mainstream Americans felt were the most dangerous to the family as an institution interracial sex doomed marriages homosexuality and the willful rejection of reproduction In addition to historicized readings the monograph also highlights how formal narrative characteristics served to heighten their anti familial message according to Jackson the false starts interpolated plots and narrative dead ends prominent in novels like *The House of the Seven Gables* and *Dred* are formal iterations of the books interest in disrupting the family as a privileged ideological site In sum *American Blood* offers a much needed corrective that will generate fresh insights into nineteenth century literature and culture

Lederer,2008-04-24 Organ transplantation is one of the most dramatic interventions in modern medicine Since the 1950s thousands of people have lived with new hearts kidneys lungs corneas and other organs and tissues transplanted into their bodies From the beginning though there was simply a problem surgeons often encountered shortages of people willing and able to give their organs and tissues To overcome this problem they often brokered financial arrangements Yet an ethic of gift exchange coexisted with the

commodification of the body The same duality characterized the field of blood transfusion which was essential to the development of modern surgery This book will be the first to bring together the histories of blood transfusion and organ transplantation It will show how these two fields redrew the lines between self and non self the living and the dead and humans and animals Drawing on newspapers magazines legal cases films and the papers and correspondence of physicians and surgeons Lederer will challenge the assumptions of some bioethicists and policymakers that popular fears about organ transplantation necessarily reflect timeless human concerns and preoccupations with the body She will show how notions of the body intact in parts living and dead are shaped by the particular culture in which they are embedded **The**
