American Exposures American Exposures:

American Exposures Louis Kaplan, 2005 *American Exposures* sheds light on photographs from Arthur Mole's propagandistic living photographs of American icons and symbols to the exploration of contemporary subcultural communities by the Korean born photographer and performance artist Nikki Lee and asserts that the depiction of community is a central component to photography Louis Kaplan deploys a number of critical concepts and theories developed by Jean Luc Nancy in *The Inoperative Community* as well as other philosophers and applies them to the field of photography studies With an original approach to photography from Edward Steichen's *Family of Man* exhibition to Pedro Meyer and the rise of the digital image Kaplan points to a new way to think about the intimate relationship among photography American life and the artistic imagination Back cover

Exposure of the American People to Iodine-131 from Nevada Nuclear-Bomb Tests National Research Council, Division on Earth and Life Studies, Institute of Medicine, Commission on Life Sciences, Committee on Exposure of the American People to I-131 from the Nevada Atomic Bomb Tests, Committee on Thyroid Screening Related to I-131 Exposure, 1999-06-17 In 1997 after more than a decade of research the National Cancer Institute NCI released a report which provided their assessment of radiation exposures that Americans may have received from radioactive iodine released from the atomic bomb tests conducted in Nevada during the 1950s and early 1960s This book provides an evaluation of the soundness of the methodology used by the NCI study to estimate Past radiation doses Possible health consequences of exposure to iodine 131 Implications for clinical practice Possible public health strategies such as systematic screening for thyroid cancer to respond to the exposures In addition the book provides an evaluation of the NCI estimates of the number of thyroid cancers that might result from the nuclear testing program and provides guidance on approaches the U S government might use to communicate with the public about Iodine 131 exposures and health risks

Ethylbenzene exposure in North America - an update Janet E. Kester, David A. Morgott, 2023-01-01 Chronic ethylbenzene exposures and attendant potential health risks for United States children and prospective parents were first evaluated under the United States Environmental Protection Agency's Voluntary Children's Chemical Evaluation Program Using updated data and methods a 2015 reevaluation observed declines in ethylbenzene releases and concentrations in ambient and indoor air Both assessments identified inhalation as the dominant exposure route and smoking as the greatest contributor with dietary intake much lower Children's exposure concentrations were similar to that of adults but their intakes were higher Neither breastfeeding nor toy mouthing was a significant source This report updates the previous assessments summarizing current ethylbenzene concentrations in air and foods exposures during the use of household and consumer products nationally representative biomonitoring data including expanded demographic groups and a new survey of worker exposures in styrene production facilities General population ethylbenzene exposures appear to have declined for all age groups The ethylbenzene styrene chain of commerce contributes an estimated 0.1% to total air emissions and 7% 12% to

dietary concentrations Total estimated ethylbenzene intakes are consistent with biomonitoring data Lactational transfer is not a significant exposure pathway for breastfed infants Production workers exposure is well below occupational guidelines Updated exposure estimates for each pathway suitable for potential health risk assessment are proposed *Intelligence Assessments of the Exposure of U.S. Military Personnel to Chemical Agents During Operation Desert Storm* United States. Congress. Senate. Select Committee on Intelligence,1997 *Estimating Exposure to Dioxin-like Compounds* United States. Environmental Protection Agency. Office of Health and Environmental Assessment. Gulf War illnesses DOD's conclusions about U.S. troops' exposure cannot be adequately supported : report to congressional requesters. , **Occupational Radiation Exposure from U.S. Naval Nuclear Propulsion Plants and Their Support Facilities** J. J. Mangeno,1993 *Review of the U.S. Navy's Exposure Standard for Manufactured Vitreous Fibers* National Research Council,Commission on Life Sciences,Board on Environmental Studies and Toxicology,Committee on Toxicology,Subcommittee on Manufactured Vitreous Fibers,2000-09-07 Manufactured vitreous fibers MVF also known as synthetic vitreous fibers are considered to be less hazardous than asbestos to human health They are used in many thermal and acoustical insulation applications as an asbestos substitute or as a filtration medium The Navy uses MVF in shipboard and onshore applications To protect Navy personnel from harmful exposures to MVF the U S Navy Environmental Health Center NEHC developed occupational exposure standards The documentation assists industrial hygienists occupational medicine physicians and other Navy health professionals in assessing and controlling the health hazards linked with exposure to MVF In 1997 the National Research Council NRC was asked to conduct an independent review of the Navy s toxicological assessment of MVF and to evaluate the scientific validity of its exposure standard of 2 fibers per cubic centimeter of air f cm³ The NRC assigned the task to the Committee on Toxicology which established the Subcommittee on Manufactured Vitreous Fibers a multidisciplinary group of experts to determine whether all relevant toxicological and epidemiological data were correctly considered in developing the exposure standard and to examine the uncertainty variability and quality of data and the appropriateness of assumptions used in the derivation of the exposure standard The subcommittee was also asked to identify deficiencies in the MVF database and where appropriate to make recommendations for future research and data development Review of the U S Navy s exposure Standard for Manufactured Vitreous Fibers represents the subcommittee s final report The committee had expanded its review when in January 1999 the Navy revised its Occupational Safety and Health Program Manual CNO 1999 changing the occupational exposure limit for MVF to the American Conference of Governmental Industrial Hygienists ACGIH threshold limit value TLV of 1 f cm³ The report features recommendations by the subcommittee as well as information gaps found throughout investigation Overall the subcommittee found that the Navy made a good start in assessing the health effects of MVF but needed further research **Exposure of the American Population to Radioactive Fallout from Nuclear Weapons Tests** National Research Council,Division on Earth and Life

Studies, Board on Radiation Effects Research, Committee to Review the CDC-NCI Feasibility Study of the Health Consequences from Nuclear Weapons Tests, 2003-03-25 This report is a review of the draft feasibility study that was issued at the request of Congress by the Centers for Disease Control and Prevention CDC and the National Cancer Institute NCI Over 500 atmospheric nuclear weapons tests were conducted at various sites around the world during 1945-1980 As public awareness and concern mounted over the possible health hazards associated with exposure to the fallout from weapons testing a feasibility study was initiated by CDC and NCI to assess the extent of the hazard The CDC NCI study claims that the fallout might have led to approximately 11 000 excess deaths most caused by thyroid cancer linked to exposure to iodine 131 The committee noted that CDC and NCI used the best available data to estimate exposure and health hazards The committee does not recommend an expanded study of exposure to radionuclides other than 131I since radiation doses from those radionuclides were much lower than those from 131I It also recommended that CDC urge Congress to prohibit the destruction of all remaining records relevant to fallout

Long-Term Health Consequences of Exposure to Burn Pits in Iraq and Afghanistan Institute of Medicine, Board on the Health of Select Populations, Committee on the Long-Term Health Consequences of Exposure to Burn Pits in Iraq and Afghanistan, 2011-10-31

Many veterans returning from the conflicts in Iraq and Afghanistan have health problems they believe are related to their exposure to the smoke from the burning of waste in open air burn pits on military bases Particular controversy surrounds the burn pit used to dispose of solid waste at Joint Base Balad in Iraq which burned up to 200 tons of waste per day in 2007 The Department of Veterans Affairs asked the IOM to form a committee to determine the long term health effects from exposure to these burn pits Insufficient evidence prevented the IOM committee from developing firm conclusions This report therefore recommends that along with more efficient data gathering methods a study be conducted that would evaluate the health status of service members from their time of deployment over many years to determine their incidence of chronic diseases
