American Genesis The Evolution Controversies From Scopes To Creation Science:

American Genesis Jeffrey P. Moran, 2012-03-07 In *American Genesis* Jeffrey P Moran offers a novel cultural and social history of the ways in which antievolution struggles have reverberated beyond the confines of legislatures and courthouses to touch upon race region religion gender and identity from the early twentieth century to the present *Creation and Evolution in the Early American Scientific Affiliation* Mark A. Kalthoff, 2021-10-17 Originally published in 1995 *Creation and Evolution in the Early American Scientific Affiliation* is the tenth volume in the series *Creationism in Twentieth Century America* reissued in 2021 The volume comprises of original primary sources from the American Science Affiliation a group formed following an invitation from the president of the Moody Bible Institute in Chicago in answer to the perceived need for an academic society for American Evangelical Scientists to explicate the relationship between science and faith The society confronted the debate between creation and evolution head on leaving a paper trail documenting their thoughts and struggles This diverse and expansive collection includes 53 selections that appeared during the organisation s first two decades and focuses on the encounter between science and American evangelicalism in the twentieth century in particular the debates surrounding the ever increasing preference for evolutionary theory The collection will be of especial interest to natural historians and theologians as well as academics of philosophy and history *Early Creationist Journals* Ronald L. Numbers, 2021-10-17 Originally published in 1995 *Early Creationist Journals* is the ninth volume in the *Creationism in Twentieth Century America* series reissued in 2021 The book is a concise primary source collection containing a selection of journal articles from the early twentieth century outlining discoveries in biology geology physiology and archaeology and their relation to Christianity The aim of the journals was to provide a platform for creationists of the 1920s to voice their theories on new science and how more recent discoveries fit within creationist beliefs including flood theory These interesting and unique journals will be of interest to academics working in the field of religion and natural history and provide a unique snapshot into the debates between evolutionists and Christianity during a period of great scientific change

The Oxford Handbook of Christian Fundamentalism Andrew Atherstone, David Ceri Jones, 2024-01-18 This authoritative volume offers the fullest account to date of Christian fundamentalism its origins in the nineteenth century and its development up to the present day It looks at the movement in global terms and through a number of key subjects and debates in which it is actively engaged **Creationism in Europe** Stefaan Blancke, Hans Henrik Hjermitsev, Peter C Kjærgaard, 2014-12-15 A history of Creationism in Europe from its reception to its rise and the response that has followed For decades the creationist movement was primarily situated in the United States Then in the 1970s American creationists found their ideas welcomed abroad first in Australia and New Zealand then Korea India South Africa Brazil and elsewhere including Europe where creationism plays an expanding role in public debates about science policy and school curricula In this the first comprehensive history of creationism in Europe leading historians philosophers and scientists narrate the rise of and

response to scientific creationism creation science intelligent design and organized antievolutionism in countries and religions throughout Europe Providing a map of creationism in Europe the authors chart the history of creationist activities and strategies Over the past forty years creationism has spread swiftly among European Catholics Protestants Jews Hindus and Muslims even as anti creationists sought to halt it Anti evolution messages gained such widespread approval in fact that in 2007 the Parliamentary Assembly of the Council of Europe passed a resolution advising member states to defend and promote scientific knowledge and firmly oppose the teaching of creationism as a scientific discipline on an equal footing with the theory of evolution Creationism in Europe offers an introduction to the cultural history of modern Europe the variety of worldviews in Europe and the interplay of science and religion in a global context It will be of interest to students and scholars in the history and philosophy of science religious studies and evolutionary theory as well as policy makers and educators concerned about the spread of creationism in our time

The Early Writings of Harold W. Clark and Frank Lewis Marsh Ronald L. Numbers, 2021-10-17 Originally published in 1995 The Early Writings of Harold W Clark and Frank Lewis Marsh is the eighth volume in the Creationism in Twentieth Century America series reissued in 2019 The book is a collection of original writings by the prominent creationist Harold W Clark and the biologist educator and young Earth creationist Frank Lewis Marsh Although both were significant figures in the anti evolutionist movement of the early 20th century unlike other members of the movement both Marsh and Clarke were trained scientists studying under eminent evolutionists of the time Both writers struggled to reconcile new scientific understandings of geology botany and palaeontology supported by Darwin s theory of evolution with their own creationist beliefs in genesis and flood theory Both scientists as such began to develop their own theories of evolution that remained in line with creationist beliefs This compact and unique collection includes the writings of Marsh and Clark from this period featuring some of their well known works on the subject including Back to Creation and Fundamental Biology This volume of original sources will be of interest to academics of religion natural history and historians of the 19th century

Righting America at the Creation Museum Susan L. Trollinger, William Vance Trollinger, 2016-05-15 In Righting America at the Creation Museum Susan L Trollinger and William Vance Trollinger Jr take readers on a fascinating tour of the museum The Trollingers vividly describe and analyze its vast array of exhibits placards dioramas and videos from the Culture in Crisis Room where videos depict sinful characters watching pornography or considering abortion to the National Selection Room where placards argue that natural selection doesn t lead to evolution The book also traces the rise of creationism and the history of fundamentalism in America

Evolution Education in the American South Christopher D. Lynn, Amanda L. Glaze, William A. Evans, Laura K. Reed, 2017-03-08 This volume reaches beyond the controversy surrounding the teaching and learning of evolution in the United States specifically in regard to the culture politics and beliefs found in the Southeast The editors argue that despite a deep history of conflict in the region surrounding evolution there is a wealth of evolution research taking place from biodiversity in species to cultural evolution

and human development In fact scientists educators and researchers from around the United States have found their niche in the South where biodiversity is high culture runs deep and the pace is just a little bit slower

Selected Works of George McCready Price Ronald L. Numbers, 2021-10-17 Originally published in 1995 The Selected Works of George McCready Price is the seventh volume in the series Creationism in Twentieth Century America reissued in 2021 The volume brings together the original writings and pamphlets of George McCready Price a leading creationist of the early antievolution crusade of the 1920s McCready Price labelled himself the principal scientific authority of the Fundamentalists and as a self taught scientist he enjoyed more scientific repute amongst fundamentalists of the time This interesting and unique collection of original source material includes five of his writings between 1906 and 1924 challenging the new Darwinian theory of evolution and natural selection through his writings on the natural sciences His literature covers the topics of evolution and biology and critiques biological arguments for evolution He also wrote widely on geology offering his own alternative argument of flood geography in opposition to the Darwinian theory concerning palaeontology and geology This volume will be of interest to historians of natural history and the creationism movement as well as scholars of religion and American history Science and Christianity J. B. Stump, 2016-10-17 Science and Christianity is an accessible engaging introduction to topics at the intersection of science and Christian theology A philosophically orientated treatment that introduces the relationship of science to Christianity and explores to what extent the findings of science affect traditional Christian theology Addresses important theological topics in light of contemporary science including divine action the problem of natural evil and eschatology Historically oriented chapters and chapters covering methodological principles for both science and theology provide the reader with a strong foundational understanding of the issues Includes feature boxes highlighting quotations biographies of major scientists and theologians key terms and other helpful information Issues are presented as fairly and objectively as possible with strengths and weaknesses of particular interpretations fully discussed

The Evolution Controversy in America George E. Webb, 2021-05-11 A comprehensive intellectual history of America s century old debate over teaching evolution in public schools For well over a century the United States has witnessed a prolonged debate over the teaching of organic evolution in the nation s public schools The controversy that began with the publication of Darwin s Origin of the Species had by the 1920s expanded to include theologians politicians and educators The Scopes trial of 1925 provided the growing antievolution movement with significant publicity and led to a decline in the teaching of evolution In The Evolution Crisis in America George E Webb details how efforts to improve science education in the wake of Sputnik resurrected antievolution sentiment and led to the emergence of creation science as the most recent expression of that sentiment Creationists continue to demand balanced treatment of theories of creation and evolution in public schools even though their efforts have been declared unconstitutional in a series of federal court cases Their battles have been much more successful at the grassroots level garnering support from local politicians and educators Webb attributes the success of

creationists primarily to the lack of scientific literacy among the American public *Science, Belief and Society* Stephen H Jones, Rebecca Catto, Tom Kaden, 2019-05-22 The relationship between science and belief has been a prominent subject of public debate for many years one that has relevance to everything from science communication health and education to immigration and national values Yet sociological analysis of these subjects remains surprisingly scarce This wide ranging book critically reviews the ways in which religious and non religious belief systems interact with scientific theories and practices Contributors explore how for some secularists science forms an important part of social identity Others examine how many contemporary religious movements justify their beliefs by making a claim upon science Moving beyond the traditional focus on the United States the book shows how debates about science and belief are firmly embedded in political conflict class community and culture **Criticizing Science** Myrna Perez, 2024-12-17 How Stephen Jay Gould s career illustrates that criticizing science is important for American democracy The question of public trust in science feels newly urgent but today is not the first time that opposing ends of the American political spectrum have critiqued modern science This dynamic has historical roots in the early 1970s when critiques of science emerged simultaneously out of Civil Rights feminist and decolonization movements on the left as well as within the creationism of the Christian Right In *Criticizing Science* Myrna Perez follows the public career of evolutionary biologist political leftist and anti creationist Stephen Jay Gould during the final decades of the American twentieth century Gould believed that denaturalizing scientific objectivity could be part of the greater work of racial and gender justice in the United States Perez shows the promises and limitations of Gould s view most famously expressed in his 1981 book *The Mismeasure of Man* that the collective self reflection on the history of scientific bias would lead to a better less oppressive science She argues that we must instead contend with the radical possibilities that are opened by working for a resolutely democratic science By centering Gould Perez clarifies divides among left liberal and right wing movements over evolutionary science during the rise of the Christian Right and the expansion of academic feminism These divides continue to shape contemporary debates over climate change vaccines abortion policy and the nature of gender in present day American politics *Diverse Excursions in the Southeast: Paleozoic to Present* Ann E. Holmes, 2015-03-09 This volume contains field guides to the 2015 GSA Southeastern Section Meeting s field trips The guides explore geologic history and visit four regional geologic provinces the Nashville dome Blue Ridge Valley and Ridge and Cumberland Plateau **The Other School Reformers** Adam Laats, 2015-02-09 The idea that American education has been steered by progressivism is accepted as fact by liberals and conservatives alike Adam Laats shows that this belief is wrong Calling to center stage conservatives who shaped America s classrooms he shows that in the long march of American public education progressive reform has been a beleaguered dream *America s Religious Wars* Kathleen M. Sands, 2019-06-04 How American conflicts about religion have always symbolized our foundational political values When Americans fight about religion we are also fighting about our conflicting identities interests and commitments Religion talk has been a ready vehicle

for these conflicts because it is built on enduring contradictions within our core political values The Constitution treats religion as something to be confined behind a wall but in public communications the Framers treated religion as the foundation of the American republic Ever since Americans have translated disagreements on many other issues into an endless debate about the role of religion in our public life Built around a set of compelling narratives George Washington's battle with Quaker pacifists the fight of Mormons and Catholics for equality with Protestants Teddy Roosevelt's concept of land versus the Lakota's concept the creation evolution controversy and the struggle over sexuality this book shows how religion throughout American history has symbolized but never resolved our deepest political questions

Life on Display Karen A. Rader, Victoria E.M. Cain, 2014-10-03 Rich with archival detail and compelling characters Life on Display uses the history of biological exhibitions to analyze museums shifting roles in twentieth century American science and society Karen A Rader and Victoria E M Cain chronicle profound changes in these exhibitions and the institutions that housed them between 1910 and 1990 ultimately offering new perspectives on the history of museums science and science education Rader and Cain explain why science and natural history museums began to welcome new audiences between the 1900s and the 1920s and chronicle the turmoil that resulted from the introduction of new kinds of biological displays They describe how these displays of life changed dramatically once again in the 1930s and 1940s as museums negotiated changing often conflicting interests of scientists educators and visitors The authors then reveal how museum staffs facing intense public and scientific scrutiny experimented with wildly different definitions of life science and life science education from the 1950s through the 1980s The book concludes with a discussion of the influence that corporate sponsorship and blockbuster economics wielded over science and natural history museums in the century's last decades A vivid entertaining study of the ways science and natural history museums shaped and were shaped by understandings of science and public education in the twentieth century United States Life on Display will appeal to historians sociologists and ethnographers of American science and culture as well as museum practitioners and general readers

Creation-Evolution Debates Ronald L. Numbers, 2021-10-17 Originally published in 1995 Creation Evolution Debates is the second volume in the series Creationism in Twentieth Century America reissued in 2021 The volume comprises eight debates from the early 1920s and 1930s between prominent evolutionists and creationists of the time The original sources detail debates that took place either orally or in print as well as active debates between creationists over the true meaning of Genesis I The essays in this volume feature prominent discussions between the likes of Edwin Grant Conklin Henry Fairfield Osbourne and William Jennings Bryan John Roach Francis and Charles Francis Potter George McCready Price and Joseph McCabe and William Bell Riley versus Charles Smith amongst many others The collection will be of especial interest to natural historians and theologians as well as academics of philosophy and history

Agents of God Jeffrey Guhin, 2021 Based on a year and a half of ethnographic observation and interviews with teachers and students at four high schools in the New York City area two of them Sunni Muslim and two

Evangelical Christian sociologist Jeffrey Guhin argues that these schools use politics gender sex and the internet to separate themselves from the rest of America a country they view as both a promise and a threat In examining these boundaries he describes how the schools use scripture prayer and science as a means of maintaining their authority over the students lives

The Species Maker Kristin Johnson,2021-10-26 An extensively researched novel about the role of science in modern life set against the backdrop of the 1925 Scopes Trial
