Boussios, Eleftherios Pierre Samartzis, Nicholas Pavlidis, J. Alejandro Perez-Fidalgo, 2023-11-06 Epithelial ovarian cancer EOC is the most lethal gynecological disorder due to a lack of effective early detection strategies Worldwide approximately 230 000 women are diagnosed annually whereas 150 000 die It represents the seventh most commonly diagnosed cancer among women in the world with 5 year survival rate of 46% More than one fifth of EOC have been related to hereditary conditions Considerable efforts have been made to implement screening of the general population to diagnose EOC early nevertheless this has been ineffective and there is no approved strategy Nowadays new approaches for early diagnosis and prevention based on molecular genomics are in development Whole genome sequencing has established the potency of the somatic genome characterised with diverse DNA repair deficiencies that can be used to stratify EOCs into distinct biological groups with predictive signatures of resistance or relapse The incorporation of next generation sequencing NGS into clinical practice remains challenging for two reasons Firstly the EOC risk is not clear for some of the included genes and secondly the variant of uncertain significance rates increase as more genes are analyzed Finally beyond germline pathogenic variants somatic mutations may also affect therapeutic choices and as such upfront tumor sequencing may be equally important to NGS particularly as we continue to challenge treatment paradigms in the first line management of EOC **The Development**

Trajectory of Communism in Poland Bartłomiej Kapica, 2025-06-30 Charting the life and writings of Władysław Biegański

a leading politician and writer in communist Poland and sometime right hand man and ideologue of the Polish leader Wladyslaw Gomułka this book outlines the shifts in the nature of communism in Poland throughout the period of communist rule It considers the shaping of Bielecki's ideas in eastern Poland later occupied by the Soviet Union during the economic depression the development of his great hopes for socialist socio economic transformation as the right way forward and his attempts as Gomułka's aide to enact people's democracy and socialist humanism in the period 1945 to 1948 attempts which failed Stalinist repression coming to the fore instead This book further discusses Bielecki's role as a minister in the period following Stalin's death when Bielecki was a leading revisionist warning of the dangers of the petrification of the system and explains how with a sense of shattered hopes he resigned from power and became a dissident publicly critical of the regime This book concludes by examining Bielecki's writings in late communist times when now just an observer he continued to reflect on and write about the future of socialism Overall the book demonstrates to what extent communism in Eastern Europe was flexible and adaptable and not rigidly monolithic as it is often portrayed The book will be of interest to academics and scholars interested in the history of communism and Europe
