Sapientia Astrologica: Astrology, Magic and Natural Knowledge, ca. 1250-1800 H Darrel Rutkin,2019-04-24 This book explores the changing perspective of astrology from the Middle Ages to the Early Modern Era It introduces a framework for understanding both its former centrality and its later removal from legitimate knowledge and practice The discussion reconstructs the changing roles of astrology in Western science theology and culture from 1250 to 1500 The author considers both the how and the why He analyzes and integrates a broad range of sources This analysis shows that the history of astrology in particular the story of the protracted criticism and ultimate removal of astrology from the realm of legitimate knowledge and practice is crucial for fully understanding the transition from premodern Aristotelian Ptolemaic natural philosophy to modern Newtonian science This removal the author argues was neither obvious nor unproblematic Astrology was not some sort of magical nebulous hodge podge of beliefs Rather astrology emerged in the 13th century as a richly mathematical system that served to integrate astronomy and natural philosophy precisely the aim of the New Science

of the 17th century As such it becomes a fundamentally important historical question to determine why this promising astrological synthesis was rejected in favor of a rather different mathematical natural philosophy and one with a very different causal structure than Aristotle's

The Conqueror's Gift Michael Maas, 2025-02-25 The essential role of ethnographic thought in the Roman empire and how it evolved in Late Antiquity Ethnography is indispensable for every empire as important as armies tax collectors or ambassadors It helps rulers articulate cultural differences and it lets the inhabitants of the empire especially those who guide its course understand themselves in the midst of enemies allies and friends In *The Conqueror's Gift* Michael Maas examines the ethnographic infrastructure of the Roman Empire and the transformation of Rome's ethnographic vision during Late Antiquity Drawing on a wide range of texts Maas shows how the Romans' ethnographic thought evolved as they attended to the business of ruling an empire on three continents Ethnography the conqueror's gift gave Romans structured ways of finding a place for foreigners in the imperial worldview and helped justify imperial action affecting them In Late Antiquity Christianity revolutionized the imperial ethnographic infrastructure by altering old concepts and introducing credal models of community The Bible became a source for organizing the Roman world At the same time many previously unseen collective identities emerged across Western Eurasia in reaction to the diminution of Roman power These changes deeply affected the Empire's ethnographic infrastructure and vision of the world Maas argues that a major consequence of these developments was the beginning of a sectarian age as individuals and political communities came to identify themselves primarily in terms of religion as well as ethnicity As they adjusted to changing ethnographic realities Romans understood their place among the peoples of the world in new ways Willingly or not we continue to be recipients of the conqueror's gift today

The Cycle of the Zodiac Signs Annemiek Bosch, 2022-12-10 This survey of how astrology works was not written specifically for astrologers Its purpose is to formulate a materialist theory of what is empirically demonstrated in astrology our relationship with the cosmos Starting with the most feeble part of the astrological framework Annemiek Bosch presents an explanation for the manifestation of the zodiac signs through the year This cycle appears to be correlated with Earth's angular movement towards and away from the supermassive black hole in the center of our Milky Way galaxy Drawing on the latest scientific insights of quantum physics and consciousness research she then discusses the mechanism underpinning the astrological practice and makes it plausible that our unconscious minds are able to obtain information from quantum entanglement Our coherence seems to cause us to collectively create our reality through a process of controlled prediction and automatic adaptation to the cosmic environment The phenomenon of consciousness instead of arising from individual isolated brains could be the result of this connectedness
