Basic Instincts Human Behaviour And The New Economics:

Basic Instincts Pete Lunn, 2009-11-19 Human instincts are surprisingly sophisticated and subtle having adapted over generations of trading with each other Understanding how these instincts work can not only change the way you think about your own affairs it can alter how you think about a whole range of economic and business issues from what constitutes a fair salary to the impact of globalisation A new breed of economists known as behavioural economists has started to observe economic life more closely This book reveals the fascinating results of their studies Human instincts have long been ignored by traditional economics but they are crucial factors in major economic decisions and hence important for our futures This engaging book is about those human instincts and how the study of them has begun to change fundamentally the science of economics and our own behaviour in today's world *The Law of Globalization* Laurence Boulle, 2009-01-01 There is a growing clamour particularly from the main beneficiaries of globalization that rules need to be established to govern the international economy with a specific focus on questions such as copyright violations trade sanctions and protections for foreign investment Those who perceive they are disadvantaged by globalization demand other legal protections in relation to employment cultural traditions and the environment *The Marketer's Handbook* Laurie Young, 2011-04-22 This book written by a senior marketer with over thirty years experience of using marketing techniques and concepts sets out to describe contextualize and rate them Its prime emphasis is on understanding their status so that they can be used to direct the use of shareholder funds effectively Its conclusion is that seasoned professionals must use their judgement about when and how to use them but they also need to understand them in depth if they are going to make well rounded effective investment decisions Above all it asks how useful and relevant is this concept Will it improve decision making Does the damn thing have any credibility and does it work This book combines a rigorous review of a wide range of marketing concepts with many practical examples and case studies It can be read or dipped into both by seasoned professionals and by those just embarking on their marketing career Sir Paul Judge President Chartered Institute of Marketing Laurie Young casts an experienced and skeptical eye on many cherished marketing concepts and techniques He provides an antidote to the tendency to adopt them without understanding their limitations and possibilities Professor George Day The Wharton School Chairman of the American Marketing Association Laurie Young has produced nothing less than the A Z of marketing He has journeyed far and wide mapping out hundreds of business marketing and communications models to produce an extremely useful industry atlas Certainly it will find a well thumbed home on my bookshelf Hamish Pringle Director General Institute of Practitioners in Advertising This book is much needed by marketing Its value is in challenging concepts some of which have been the accepted norm for a long time But as this book shows some of these may no longer be relevant and appropriate for marketers in today's consumer environment Mike Johnston CEO Dairy Council of Northern Ireland and former Chairman of the Chartered Institute of Marketing Senior marketers like those who make up the membership of the Marketing Society

hone the methods and techniques they favour as their career develops Laurie Young clearly did that and an experienced voice shines through this critique It is heartening to find that so many concepts have a long history of producing real value for businesses but alarming to find so many of the theorists favourites to be so groundless Hugh Burkitt CEO The Marketing Society

The Positive Deviant Sara Parkin,2010-09-23 An economy low in carbon and high in life satisfaction will require thousands if not millions of exceptional leaders This book is the first to bring together sustainability knowledge with the leadership skills and tools to help you become one of those leaders In it you will find everything you need to get started straight away and to grow your effectiveness even in a world that remains perversely intent on the opposite Whether you are new to the whole idea of sustainability or reasonably well informed but not entirely confident about what to do for the best this guide will help you do sustainability Free of checklists and policy recommendations the focus is on you and on developing your capacity to identify the right thing to do wherever you are and whatever your circumstances This is essential reading for those in or aspiring to sustainability literate leadership and a must for all those teaching leadership and management

Evolutionary Psychology in the Business Sciences Gad Saad,2011-07-09 All individuals who operate in the business sphere whether as consumers employers employees entrepreneurs or financial traders to name a few constituents share a common biological heritage and are defined by a universal human nature As such it is surprising that so few business scholars have incorporated biological and evolutionary informed theories within their conceptual toolboxes This edited book addresses this lacuna by culling chapters at the intersection of the evolutionary behavioral

sciences and specific business contexts including in marketing consumer behavior advertising innovation and creativity intertemporal choice negotiations competition and cooperation in organizational settings sex differences in workplace patterns executive leadership business ethics store design behavioral decision making and electronic communication To reword the famous aphorism of T G Dobzhansky nothing in business makes sense except in the light of evolution The Systemic Nature of the Economic Crisis Arturo Hermann, 2015-03-27 The most prominent aspect of the current financial crisis is its systemic character which manifests itself in high levels of inequality rampant unemployment economic and social insecurity and environmental decay This book explores the potential of a pluralistic and interdisciplinary approach for a deeper understanding of the manifold aspects of the economic crisis This book examines the potential of a number of contributions from heterodox economics and psychoanalysis in providing a deeper understanding of these problems The book analyses some of the most debated aspects of the concepts of market democracy and socialism and explores the role of structural ties between economic social and psychological aspects of collective life It also addresses the main economic aspects of the crisis and pays particular attention to a number of structural imbalances and to the psychological interpretation of these phenomena By drawing together approaches from heterodox economics and psychoanalysis this book adopts a pluralist and interdisciplinary approach to the study of these phenomena and manages to overcome the fragmentation so often present in social sciences Personality Theories Albert Ellis, Mike Abrams, Lidia Abrams, 2009 Personality Theories by Albert Ellis the founding father of Rational Emotive Behaviour Therapy provides a comprehensive review of all major theories of personality including theories of personality pathology Importantly it critically reviews each of these theories in light of the competing theories as well as recent research **A Bigger Prize** Margaret Heffernan, 2014-02-27 One of the 100 best behavioural economic books of all time recommended by Jeff Bezos Tim Ferriss Satya Nadella Brian Tracy and Erik Brynjolfsson The Olympics Britain's Got Talent The Rich List The Nobel Prize Everywhere you look competition for fame money attention status We depend on competition and expect it to identify the best make complicated decisions easy and most of all to motivate the lazy and inspire the dreamers How has that worked out so far Rising levels of fraud cheating stress inequality and political stalemates abound Siblings won't speak to each other they're so rivalrous Kids can't make friends because they don't want to cede their top class ranking to their fellow students Their parents don't want them to either The richest men in the world sulk when they fall a notch or two in the rich list Doping proliferates among athletes Auditors and fund managers go to jail for insider trading Our dog eat dog culture has decimated companies incapacitated collaborators and sown distrust Winners take all while the desire to win consumes all inciting panic and despair Just as we have learned that individuals aren't rational and markets aren't efficient but went ahead operating as though they were we now know that competition quite regularly doesn't work the best do not always rise to the top and the so called efficiency of competition throws off a very great deal of waste It might be comforting to designate these perverse

outcomes but as aberrations mount they start to look more like a norm It doesn't have to be that way Around the world individuals and organizations are finding creative collaborative ways to work that don't pit people against each other but support them in their desire to work together While the rest of the world remains mired in pitiless sniping racing to the bottom the future belongs to the people and companies who have learned that they are greater working together than against one another Some call that soft but it's harder than anything they've done before They are the real winners
