Basic Sciences For Obstetrics And Gynaecology:

Basic Sciences for Obstetrics and Gynaecology Tim Chard, 1998 Basic Sciences for Obstetrics and Gynaecology has become the standard revision aid for students preparing for examinations in obstetrics and gynaecology particularly those candidates for the MRCOG Part I A wealth of information is presented in a concise didactic format focusing on those facts that are generally considered to be neither contentious nor speculative The fifth edition has been substantially updated to reflect the current understanding of the basic sciences underpinning the practice of obstetrics and gynaecology This book will also be of value to professionals wishing to refresh their basic scientific knowledge Cell Biology Embryology and the Placenta Anatomy General Physiology and biochemistry Endocrinology Pathology Microbiology Pharmacology Tim Chard is Professor of Obstetrics and Gynaecology at St Bartholomew's Hospital in London Richard Lilford is Professor of Health Services Research at the University of Birmingham

Basic Sciences for Obstetrics and Gynaecology: Core Materials for MRCOG Part 1 Austin Ugwumadu, 2014-06-19 This textbook takes a new dynamic approach to the basic sciences in obstetrics and gynaecology It teaches candidates all they need to know for the MRCOG Part 1 examination by extending the understanding of the basic medical sciences and their relevance to obstetrics and gynaecology Like conventional textbooks it teaches what is true but it also what is false and why The most complex concepts are discussed in a problem based format so that the relevant basic sciences are taught and drawn together in context

Basic Sciences for Obstetrics and Gynaecology Tim Chard, Richard Lilford, 2012-12-06 In the four years since the publication of the third edition this book has been very well received by those for whom it was intended candidates for primary examinations in Obstetrics and Gynaecology In consequence we make no excuse for repeating the formula of addressing only those facts which are neither speculative nor contentious An attempt to widen this brief would multiply the length of the book by three or four times and would place it in an identical category with several much larger texts As the underlying philosophy remains the same the main changes in the fourth edition are the addition of new material and revision of existing material Revision of existing material has been extensive with many detailed changes aimed at expanding the factual base while retaining or improving the clarity of explanation In addition the book is now associated with an MCQ Tutor which has proved especially popular Finally and probably most importantly many of the changes are those which have been suggested by readers and reviewers of the previous editions this feedback has been invaluable to the authors and we now hope will be equally valuable to readers of the new edition In this edition we wish to express our particular gratitude to Dr John Clark and Miss Lois Hague for the very elegant new illustrations in Chapter 2

Basic Sciences for Obstetrics and Gynaecology Tim Chard, Richard Lilford, 2014-09 **Basic Sciences for Obstetrics and Gynaecology** T. Chard, R. Lilford, 2012-12-06 The aim of this book is to provide a straightforward summary of the knowledge required for preliminary examinations in specialist obstetrics and gynaecology the first part of the examination for Membership of the Royal College of Obstetricians and Gynaecologists would

be a good example Thus the field covered is that of the basic sciences anatomy physiology biochemistry etc as applied to human reproduction Most examinations of this type are based on multiple choice questions MCQ No apology is made for the fact that the present book addresses the sort of fact which lends itself to testing by this approach There is no discussion of speculative or contentious areas no account of present or future research and no references Excellent books are available which treat the topic in a much fuller and more discursive manner and the present volume does not seek to emulate them Readers will be aware that even apparently immutable facts are subject to occasional revision We have attempted to present the state of the art most of the material is generally if not universally accepted A particular problem arises with numerical information

Tindall,1987 Basic Sciences in Obstetrics and Gynaecology Victor Ronald Tindall,1992 **Strengthening Research in Academic OB/GYN Departments** Institute of Medicine,Committee on Research Capabilities of Academic Departments of Obstetrics and Gynecology,1992-02-01 Research conducted in academic departments of obstetrics and gynecology could result in substantial improvements in the health of women and the outcomes of pregnancy Strengthening Research in Academic OB

GYN Departments determines whether such departments are capable of fulfilling this promise The committee finds that these departments have a poor track record in their ability to compete for research funds and in the extent to which their faculty contribute to research Adding to the problem are factors that deter OB GYNs from a research career and a dearth of dynamic research leaders in the profession The volume explores reasons for this situation and makes recommendations to counteract them Also included is an agenda of needed research
