Discourses of Globalisation and Higher Education Reforms Joseph Zajda, W. James Jacob, 2022-03-15 This book examines some of the major higher education reforms and policy shifts globally, particularly in the light of recent shifts in quality and standards-driven education and policy research. It critiques the neo-liberal ideological imperatives of current higher education and policy reforms and illustrates the way that changes in the relationship between the state and higher education policy affect current trends in higher education reforms. Using diverse comparative education paradigms from critical theory to historical comparative research, the chapters focus on globalisation ideology and higher education reforms and examine both the reasons and outcomes of higher education reforms and policy change. The book analyses and evaluates the policy shifts in methodological approaches to globalisation and higher education reforms and their impact on education policy and pedagogy. The book contributes in a very scholarly way to a more holistic understanding of the nexus between globalisation, comparative education research, and higher education reforms.

In the aftermath of the disputed presidential election on 27 December 2007, Kenya descended into its worst crisis since independence. The 2007/08 post-election crisis in Kenya was among the first situations in which there was an appeal to both the responsibility to protect and a responsibility to prosecute. Despite efforts to ensure compatibility between R2P and the ICC, the two were far from coherent in this case as the measures designed to protect the population in Kenya undermined the efforts to prosecute perpetrators. This book will highlight how the African Union sponsored mediation process effectively brought an end to eight weeks of bloodshed while simultaneously entrenching those involved in orchestrating the violence. Having secured positions of power, politicians bearing responsibility for the violence set out to block prosecutions at both the domestic and international levels, eventually leading the cases against them to unravel. As this book will reveal by utilising the machinery of the state as a shield against prosecution, the Government of Kenya reverted to an approach to sovereignty that both R2P and the ICC were specifically designed to counteract. This book will be of interest to students of the Responsibility to Protect, humanitarian intervention, African politics, war and conflict studies, and IR Security Studies in general. **Youth Language Practices and Urban Language Contact in Africa**, Rajend Mesthrie, Ellen Hurst-Harosh, Heather Brookes, 2021-09-09 An up-to-date, theoretically informed study of male in-group street-aligned youth language practice in various urban centres in Africa. **Intra-Africa Student Mobility in Higher Education**, Chika Trevor Sehoole, Jenny J. student mobility is among the central activities of higher education internationalization As the number of international students increase so do the destinations in both number and geographic diversity Historically international student mobility has followed South North and North North patterns However recent literature show the growth in North South and South South patterns of student mobility There has also been a rise in regional mobility In what is referred to in the book as intra Africa mobility the books explores and analyzes the patterns of intra Africa mobility based on seven African countries South Africa Kenya Uganda Nigeria Ghana Senegal and Egypt The editors and contributors address three central research questions Why did the students choose the country they are studying in Why did they choose the institution they are studying in What are their academic and social experiences in these countries and their respective institutions This book is the first comprehensive exploration of intra Africa student mobility in a field that traditionally centers on the Global North

In twentieth-century Kenya, age and gender were powerful cultural and political forces that animated household and generational relationships. They also shaped East Africans' contact with and influence on emergent colonial and global ideas about age and masculinity. Kenyan men and boys came of age achieving their manhood through changing rites of passage and access to new outlets such as town life, crime, anticolonial violence, and nationalism. And as they did, the colonial government appropriated masculinity and maturity as means of statecraft and control. In *An Uncertain Age*, Paul Ocobock positions age and gender at the heart of everyday life and state building in Kenya. He excavates in unprecedented ways how the evolving concept of youth motivated and energized colonial power and the movements against it, exploring the masculinities boys and young men debated and performed as they crisscrossed the colony in search of wages or took the Mau Mau oath. Yet he also considers how British officials' own ideas about masculinity shaped not only young African men's ideas about manhood but the very nature of colonial rule. *An Uncertain Age* joins a growing number of histories that have begun to break down monolithic male identities to push the historiographies of Kenya and empire into new territory. *Making Sense of Planning and Development for the Post-Pandemic Cities* Kh Md Nahiduzzaman, 2024-09-08.
