Keystone Literature Review For 2013:

Clinical Management of the Rheumatoid Hand, Wrist, and Elbow Kevin C. Chung,2016-03-17 This book provides comprehensive coverage of the management and related surgery of the rheumatoid hand wrist and elbow It provides a much needed authoritative discussion of the epidemiology surgical techniques and outcomes of rheumatoid surgery The book begins by introducing important background concepts and then goes on to present up to date details on pre and postoperative management indications and treatment options Each section ends with case based coverage of common clinical scenarios and features numerous illustrations that showcase the sequential approach in managing this disease Clinical Management of the Rheumatoid Hand Wrist and Elbow has broad appeal for rheumatologists and primary care physicians and will assist them in providing appropriate referrals for surgery consultations It also serves as a valuable reference for surgeons treating and managing patients with this unique disease **Construction and utilization of digital twins for personalized therapeutic predictions** Samuel Schäfer,2024-10-18 Modern healthcare faces a significant challenge namely that 25 70% of patients with common diseases do not benefit from standard treatments despite the availability of over 13 000 drugs registered in DrugBank This discrepancy is likely due to these diseases complex and heterogeneous molecular nature rather than a lack of therapeutic options Emerging technologies have revealed the immense molecular complexity underlying common diseases For instance singlecell RNA sequencing scRNA seq has demonstrated altered gene interactions in and across multiple cell types in numerous tissues Furthermore these technologies have revealed vast molecular differences between patients with the same diagnosis There is a wide gap between this complexity and the current diagnostic and therapeutic approaches Aim To bring personalized medicine one step closer to the clinic this thesis focuses on developing digital disease models that can capture the molecular biological complexity of disease in individual patients We aim to harness these disease models to identify optimal treatments for each individual patient Paper I We started by exploring the usefulness of OMIC based approaches for diagnostic and therapeutic predictions Utilizing a single cell RNA sequenced mouse model of antigen induced arthritis we aimed to prioritize cell types and therapeutic targets Initial pathway enrichment analyses did not yield relevant prioritization prompting an investigation into network based approaches Multi cellular disease models MCDMs for AIA and human rheumatoid arthritis were constructed incorporating predicted cell type interactions Centrality analysis indicated that these interactions could quantify a cell type s relative importance in disease pathogenesis We hypothesized that transcriptomic alterations in central cell types might reflect the MCDM serving as potential diagnostic markers An analysis of CD4 T cells from patients with 13 different inflammatory diseases and healthy controls demonstrated that these profiles could discriminate between healthy and diseased states and among diseases Furthermore a network based approach identified drugs targeting disease associated changes common to multiple inflammatory diseases Notably one of these drugs bezafibrate successfully dampened inflammation in the AIA mouse model Paper II Building on the insights from

Paper I we investigated multicellular network models MNMs with time as an additional dimension Using seasonal allergic rhinitis SAR as a disease model we analyzed time series scRNAseq data to construct MNMs of inflammatory diseases We identified thousands of disease associated expression changes across multiple cell types varying at different disease stages Notably upstream regulators URs of these changes were also stage dependent and multidirectional To prioritize URs for drug discovery we focused on those causing significant expression changes in multiple cell types across all time points This strategy was validated through similar analyses of atopic dermatitis ulcerative colitis and Crohn s disease confirming that ranked URs aligned with the efficacy of existing drugs targeting the URs in the respective diseases Furthermore experimental validation included targeting the top ranked regulatory gene in SAR which was more effective than previously discovered IL4 inhibition Paper III While Paper I established the use of transcriptomic data for therapeutic predictions it focused on overlapping disease related changes across multiple inflammatory diseases and considered transcriptomic changes in only one cell type Paper II indicated a potential benefit in UR prioritization in numerous cell types However it yielded heterogeneous results and was limited by the fact that few drugs directly target URs Neither of these approaches was feasible for individualized drug predictions Drawing on previous insights by us and others we next aimed to develop digital disease models for individual patients termed digital twins with the capability for drug efficacy screening We proposed scDrugPrio a strategy utilizing single cell scRNA sequencing based multicellular disease models incorporating key biological and pharmacological properties such as varying gene expression levels varying gene interactions within and between cell types and drug effect scDrugPrio was constructed based on a mouse model of arthritis and validated by improved precision recall for known drugs and in vitro studies of predicted drugs that were FDA approved for other diseases and had not yet been tried in rheumatoid arthritis or mouse arthritis For validation scDrugPrio was applied to human multiple sclerosis as well as Crohn s disease data that included tissue samples from healthy and sick tissue of all patients scDrugPrio was able to identify relevant treatments for individual patients and could distinguish anti TNF responders from non responders Conclusion This thesis demonstrates a framework for constructing digital disease models for personalized therapeutic predictions that might hold potential for better clinical treatment decisions By leveraging advanced genome wide analyses and network based approaches we may enhance the precision and efficacy of treatments for immune mediated inflammatory diseases bringing personalized medicine closer to clinical reality   **Handbook of Human and Planetary Health** Walter Leal Filho,2022-09-06 This book contains a set of papers which explore the subject matter of human and planetary health at various angles The year 2015 was a special year in the field of human and planetary health In that year the report produced by the Rockefeller Foundation and the journal The Lancet called Safeguarding human health in the Anthropocene epoch report of The Rockefeller Foundation Lancet Commission on planetary health was launched Also in 2015 the World Health Organization and the Secretariat of the Convention on Biological Diversity published the report Connecting global priorities

biodiversity and human health a state of knowledge review with over 100 contributors meant to guide future joint actions Both documents comprehensively address the need for a better understanding of the connections between human health and ecosystems and the risks associated with damages to the integrity of the planet The period in which humanity finds itself right now the Anthropocene is a risk one since mankind is putting the planet under considerable pressure These elements have led to the emergence of a new field of research namely planetary health Planetary health seeks to address a very concrete and urgent contemporary problem namely the need to understand quantify and act in order to reverse the effects of human population growth and the acceleration of socioeconomic activities on the environment and inter alia the disturbances in the Earth s natural ecosystems and how these in turn impact human health and well being Anthropic disturbances in natural ecosystems are characterized by changes in climate land use changes in the nitrogen and phosphorus cycle chemical pollution of soil water and air reduction in the availability of drinking water loss of biodiversity destruction of the ozone layer and ocean acidification among others In all these areas there is a perceived need to document and promote examples of initiatives and good practice which may change current trends This book addresses this need It documents experiences case studies and projects which explore the connections between human and planetary health and illustrates examples which show the consequences of ecosystemic disturbances to the health and well being of humanity with the emergence of new diseases worsening of infectious diseases and increase in chronic non communicable diseases related to the deterioration of the current food system hyper urbanization microbial resistance climate led migration and zoonoses among others Planetary health is a new effort to deal with the question of sustainability and human life on the planet under an increasingly integrative transdisciplinary and global perspective since the problems of this planetary crisis cross geopolitical borders and academic boundaries and affect humanity as a whole This book provides a contribution to this emerging field Thanks to its design and the contributions by experts from various areas it provides a welcome contribution to the literature on planetary health and it inspires further works in this field   *Doing A Literature Review In Health And Social Care: A Practical Guide* Aveyard, Helen,2014-01-01 This popular book demystifies literature reviewing and answers the questions students have about how to tackle the process   Kelley and Firestein's Textbook of Rheumatology Gary S. Firestein,Ralph C. Budd,Sherine E Gabriel,Iain B McInnes,James R. O'Dell,2016-06-21 Consult the definitive resource in rheumatology for an in depth understanding of scientific advances as they apply to clinical practice Masterfully edited by Drs Gary S Firestein Ralph C Budd Sherine E Gabriel Iain B McInnes and James R O Dell and authored by internationally renowned scientists and clinicians in the field Kelley and Firestein s Textbook of Rheumatology 10th Edition delivers the knowledge you need for accurate diagnoses and effective patient care From basic science immunology anatomy and physiology to diagnostic tests procedures and specific disease processes this state of the art reference provides a global authoritative perspective on the manifestations diagnosis and treatment of rheumatic diseases An ideal balance of the basic science you need to know and

how to apply that information to clinical practice An integrated chapter format allows you to review basic science advances and their clinical implications in one place and get dependable evidence based guidance for the full range of rheumatologic diseases and syndromes Consult this title on your favorite e reader conduct rapid searches and adjust font sizes for optimal readability New content on the latest diagnostic perspectives and approaches to therapy including five brand new chapters Metabolic Regulation of Immunity Principles of Signaling Research Methods in the Rheumatic Diseases Novel Intracellular Targeting Agents and IgG4 Related Diseases New and expanded chapter topics on small molecule treatment biologics biomarkers epigenetics biosimilars and cell based therapies More schematic diagrams clearly summarize information and facilitate understanding **Bridging the Gap Between Policy and Science in Assessing the Health Status of Marine Ecosystems, 2nd Edition** Angel Borja,Michael Elliott,María C. Uyarra,Jacob Carstensen,Marianna Mea,2017-03-22 Marine management requires approaches which bring together the best research from the natural and social sciences It requires stakeholders to be well informed by science and to work across administrative and geographical boundaries a feature especially important in the inter connected marine environment Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services Once those marine ecosystem services have been created they deliver societal goods as long as society inputs its skills time money and energy to gather those benefits However if societal goods and benefits are to be limitless society requires appropriate administrative legal and management mechanisms to ensure that the use of such benefits do not impact on environmental quality but instead support its sustainable use *Research and Innovation Forum 2024* Anna Visvizi,Orlando Troisi,Vincenzo Corvello,Mara Grimaldi,2025-07-26 This book features research presented and discussed during the Research Innovation Forum Rii Forum 2024 As such this book offers a unique insight into emerging topics issues and developments pertinent to the fields of technology innovation and education and their social impact Papers included in this book apply inter and multi disciplinary approaches to query such issues as technology enhanced teaching and learning smart cities information systems cognitive computing and social networking What brings these threads of the discussion together is the question of how advances in computer science which are otherwise largely incomprehensible to researchers from other fields can be effectively translated and capitalized on so as to make them beneficial for society as a whole In this context Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders including academics the think tank sector and decision makers can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science **Mosaic of Autoimmunity** Carlo Perricone,Yehuda Shoenfeld,2019-02-13 The Mosaic of Autoimmunity The Novel Factors of Autoimmune Diseases describes the multifactorial origin and diversity of expression of autoimmune diseases in humans The term implies that different combinations of factors in autoimmunity produce varying and unique clinical pictures in a wide spectrum of autoimmune diseases Most of the factors involved in autoimmunity can be categorized into four groups genetic

immune defects hormonal and environmental factors In this book the environmental factors are reviewed including infectious agents vaccines as triggers of autoimmunity smoking and its relationship with rheumatoid arthritis systemic lupus erythematosus thyroid disease multiple sclerosis and inflammatory bowel diseases An entirely new syndrome the autoimmune inflammatory syndrome induced by adjuvants ASIA is also included along with other diseases that are now recognized as having an autoimmune etiopathogenesis **Software Business** João M. Fernandes,Ricardo J. Machado,Krzysztof Wnuk,2015-06-11 This book contains the refereed proceedings of the 6th International Conference on Software Business ICSOB 2015 held in Braga Portugal in June 2015 The theme of the event was Enterprising Cities focusing on a noticeable spillover of software within other industries enabling new business models Companies bundle their physical products and software services into solutions and start to sell independent software products in addition to physical products The 16 full five short and three doctoral symposium papers accepted for ICSOB were selected from 42 submissions The papers span a wide range of issues related to contemporary software business from strategic aspects that include external reuse ecosystem participation and acquisitions to operational challenges associated with running software business Routledge Handbook of Rewilding Sally Hawkins,Ian Convery,Steve Carver,Rene Beyers,2022-11-30 This handbook provides a comprehensive overview of the history theory and current practices of rewilding Rewilding offers a transformational paradigm shift in conservation thinking and as such is increasingly of interest to academics policymakers and practitioners However as a rapidly emerging area of conservation the term has often been defined and used in a variety of different ways both temporally and spatially There is therefore the need for a comprehensive assessment of this field and the Routledge Handbook of Rewilding fills this lacuna The handbook is organised into four sections to reflect key areas of rewilding theory practice and debate the evolution of rewilding theoretical and practical underpinnings applications and impacts and the ethics and philosophy of rewilding Drawing on a range of international case studies the handbook addresses many of the key issues including land acquisition and longer term planning transitioning from restoration human led nature enabled to rewilding nature led human enabled and the role of political and social transformational change Led by an editorial team who have extensive experience researching and practising rewilding this handbook is essential reading for students academics and practitioners interested in rewilding ecological restoration natural resource management and conservation *Cutting-Edge Technologies and Social Media Use in Higher Education* Benson, Vladlena,2014-02-28 This book brings together research on the multi faceted nature and overarching impact of social technologies on the main opportunities and challenges facing today s post secondary classrooms from issues of social capital formation to student support and recruitment Anchored in Place Bank, Leslie,Cloete, Nico,2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the

contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges **Beavers** Frank Rosell,Róisín Campbell-Palmer,2022 Over the last 20 years there has been a huge increase in the number of scientific papers published on these remarkable creatures and an authoritative synthesis is now timely This accessible text goes beyond their natural history to describe the impacts on humans conflict mitigation animal husbandry management and conservation **Collaboration in a Data-Rich World** Luis M. Camarinha-Matos,Hamideh Afsarmanesh,Rosanna Fornasiero,2017-09-06 This book constitutes the refereed proceedings of the 18th IFIP WG 5 5 Working Conference on Virtual Enterprises PRO VE 2017 held in Vicenza Italy in September 2017 The 68 revised full papers were carefully reviewed and selected from 159 submissions They provide a comprehensive overview of identified challenges and recent advances in various collaborative network CN domains and their applications with a strong focus on the following areas collaborative models platforms and systems for data rich worlds manufacturing ecosystem and collaboration in Industry 4 0 big data analytics and intelligence risk performance and uncertainty in collaborative data rich systems semantic data service discovery retrieval and composition in a collaborative data rich world trust and sustainability analysis in collaborative networks value creation and social impact of collaboration in data rich worlds technology development platforms supporting collaborative systems collective intelligence and collaboration in advanced emerging applications collaborative manufacturing and factories of the future e health and care food and agribusiness and crisis disaster management **Research Anthology on Ecosystem Conservation and Preserving Biodiversity** Management Association, Information Resources,2022-04-08 In today s rapidly evolving world it has never been more critical to consider key environmental issues such as climate change pollution and endangered species Society faces an

unknown future where the fate of the environment is continuously in flux based on current preservation initiatives that governments develop In order to ensure the world is protected moving forward further study on the importance of securing environments ecosystems and species is necessary to successfully implement change The Research Anthology on Ecosystem Conservation and Preserving Biodiversity considers the best practices and strategies for protecting our current ecosystems as well as the potential ramifications of failing to implement policies Society is at a crossroads where if we continue to ignore the danger and warning signs brought about by environmental issues we will be unable to maintain a healthy environment Covering essential topics such as extinction climate change and pollution this major reference work is ideal for scientists industry professionals researchers academicians policymakers scholars practitioners instructors and students   Ecological, Behavioral and Genomic Consequences in the Rodent Family Sciuridae: Why Are Squirrels So Diverse? Toni Gossmann,Jane Waterman,John Lad Koprowski,Oleg Brandler,2021-11-29   *Research Anthology on Recent Trends, Tools, and Implications of Computer Programming* Management Association, Information Resources,2020-08-03 Programming has become a significant part of connecting theoretical development and scientific application computation Computer programs and processes that take into account the goals and needs of the user meet with the greatest success so it behooves software engineers to consider the human element inherent in every line of code they write Research Anthology on Recent Trends Tools and Implications of Computer Programming is a vital reference source that examines the latest scholarly material on trends techniques and uses of various programming applications and examines the benefits and challenges of these computational developments Highlighting a range of topics such as coding standards software engineering and computer systems development this multi volume book is ideally designed for programmers computer scientists software developers analysts security experts IoT software programmers computer and software engineers students professionals and researchers   **Rheumatology E-Book** Marc C. Hochberg,Ellen M Gravallese,Josef S. Smolen,Desiree van der Heijde,Michael E. Weinblatt,Michael H. Weisman,2022-07-29 Covering both the scientific basis of rheumatology and practical clinical information for rheumatologists and trainees Rheumatology 8th Edition remains a leading text in this fast changing field Dr Marc Hochberg and his team of worldwide editors and authors keep you abreast of recent advances in the field all in a user friendly accessible manner Fully updated from cover to cover this two volume text is designed to meet the needs of all practicing and academic rheumatologists as well as arthritis related health care professionals and scientists interested in rheumatic and musculoskeletal diseases Covers the epidemiology pathogenesis clinical manifestations therapeutic approach and management of all major as well as rarely encountered rheumatic and musculoskeletal diseases Discusses clinical examination imaging principles differential diagnosis established and novel therapies perioperative evaluation pain management basic science and genetics of rheumatic and musculoskeletal diseases Uses a consistent logical reader friendly format with templated chapters concise text and large scale state of the art illustrations for efficient visual

reference Contains new chapters covering pre clinical disease and how to address these patients common comorbidities in rheumatoid arthritis emerging therapies for systemic sclerosis immune mediated complications of checkpoint inhibitors the epidemiology of COVID 19 and rheumatic and musculoskeletal diseases emerging treatments for osteoarthritis and big data analytics Provides updates to key topics such as systems biology and its impact on our understanding of the pathogenesis of rheumatic and musculoskeletal diseases the microbiome in rheumatic musculoskeletal diseases how to manage chronic pain in the patient with a rheumatic disease drugs and reproductive health and emerging therapies for patients with RA SLE spondyloarthritis inflammatory muscle disease and vasculitis Shares the knowledge and expertise of numerous new contributing authors as well as new co editor Dr D sir e van der Heijde who is an expert in psoriatic arthritis spondyloarthritis imaging and clinical epidemiology Provides access to concise videos depicting the use of ultrasound for diagnosis and treatment Enhanced eBook version included with purchase Your enhanced eBook allows you to access all of the text figures and references from the book on a variety of devices If you encounter issues with your eBook please contact Elsevier eBook support via textbookscom support elsevier com   Proceedings of the 2nd International Workshop on Design in Civil and Environmental Engineering Mary Kathryn Thompson,2013-09-24   **Humidification and Ventilation Management in Textile Industry** B. Purushothama,2024-02-13 This book is a comprehensive guide for professionals in the textile industry It delves into the intricate balance of moisture and air control that shapes textile production From enhancing quality to optimizing efficiency this book is an indispensable resource for the industry professionals
